**COMMENTS:** 08/15/24 @4:45pm; original date filed 04/08/24 @3:52pm Regina & Larry Joe Kresta. Our Internet is not working. Having to use my cell phone. (I have 5 photos but your download won't allow to do) photo (s) along with our other concerns and comments! In the photos you will see Irons Creek flooding our pasture(s). This is as recent as January 24, 2024. Please NOTE: We do not let our livestock drink from Irons Creek. We provide fresh water constantly. However, please note the flooding water "encroaches" onto our higher pastures. We are requesting a CONTESTED CASE HEARING based on several of the issues. We have raised in both posted comments that we hereby incorporate by reference - our livelihood is ranching hay and raising cattle on this property and we will be affected by the unnamed Tributary/creeks (both Harris & Irons Creek) which is not being sufficient in their banks and or beds to contain the exhaust of effluent from the Trails at Cochran Ranch Development - Texas Water code Chapter 26. Who will maintain these creeks and water flow. Often times these creeks flooding bring along debris, logs, dead carcasses (health issues just right there), trash, diseases just to name a few.... E.colic, chemotherapy RX, feces, and Covid. Bleach doesn't always kill these diseases or they become resistant. 08/15/24 - 04/08/24 @3:52pm ...the following info will include a (I have 5 photos but your download won't allow to do) photo (s) along with our other concerns and comments! In the photos you will see Irons Creek flooding our pasture(s). This is as recent as January 24, 2024. Please NOTE: We do not let our livestock drink from Irons Creek.
