COMMENTS: As a resident of Josephine, I ippose the MuD for this large community as it poses very big concern for me and my husband as we are elderly and have hard time resting and need to rest throughout the day for health conditions. This community and the noise pollution it will bring for calls to prayer and large speakers with the horns blowing will severely impact our rest periods especially at night. Please do not allow this to be approved as our quality of life will severely be impacted by it.

COMMENTS: Why I believe my property is affected. Potential Flooding - Our property is 5732 FM 6 JOSEPHINE TX 75189, and we were NOT notified. Our property is in the flood path of the unnamed tributary/Brushy Creek and has flooded before. With the increase of housing subdivisions added to our area, long with this new place, we are worried that our flooding will increase. We have a creek that runs in the back part of our land that runs into a pond- with our property already being partly in a flood plain we worry about the future flooding. When it rains heavy, our property takes on water through the ground from the east. We are getting land erosion already with the increase (about 185 houses) of Deberry, Murray Manor, Bradley Estates, and the 12 houses added to East St. which are west of our property.

I anticipate it will be worse when almost 1900 homes (currently) are completed. From reading this document looks like the new Wastewater plant will dispense more water than is currently dispensed by the current lagoon. into the creeks. DR Horton is building 820 or more houses on the north side of the creek. We have a huge downhill ditch to the east and towards our pond from a stormwater culvert which will flood the creek in addition to the wastewater. Additionally, there has been no consideration about potential flooding and other issues associated with the PENDING NTMWD Monofil TCEQ PERMIT NO. WQ0005323000. This matter is currently being reviewed by SOAH which has not been scheduled for a hearing as of Dec 21, 2023. More houses PLUS more usage equals more water in the creek daily and potential monofil run-off gives an increased risk of adding my property to a zone A on FEMA flood map. All property owners along or near this creek are at risk of flooding. Air pollution: We were not aware there was going to be a new sewer plant in the vicinity of the old wastewater pond, I was not notified of this particular permit and know my property is in the immediate area within 1100 ft of the flow of the plan sewer wastewater flow and/or LeChau easement. I have identified 8 other property owners who were not notified. We are worried about flooding but also the smell that this may cause to our beautiful homestead! Please consider our feelings, thoughts, and worries about what's to come.

COMMENTS: Please do not approve this. There are so many concerns about this land purchase agreement being built in our quiet community. If this center is built, noise disturbances all through the night during sleep hours will be interrupted due to loud calls cause noise pollution and air pollution rights violations. We will not be able to sleep. This will cause children to be unable to sleep. Poor attendance in schools, poor results thereof. Exhausted drivers on the road increases incidents of accidents due to high risk of falling asleep at the wheel. The roads are only 1 lane each direction, that's increase the risk for an accident even higher. I am not comfortable leaving any other information for public record as this presents a safety risk.

COMMENTS: This development should absolutely NOT get approved. Josephine and surrounding towns are already struggling to provide the proper infrastructure. Last summer we were put on a water restriction, what would a development of this size do to our water supply? The roads are in constant disarray due to the potholes, electricity already struggles when there is a storm. Additionally, it's not right to have an entire neighborhood that is exclusive to one type of religion. I guarantee that this will push out any local/natives to this area and cause a lot more issues than anticipated.

COMMENTS: I have lived in Josephine near the north sewer plant with the open lagoons since about 1986. Only in the last year has the sewer plant begun to smell very bad. The horrible odor now reaches for quite a distance in all directions. Several of my neighbors have commented on how poorly quality of life here has become. It seems as if the maintenance of the facility is not being seen to as it should be. The infrastructure in this town has always been slow track but it almost seems to be going backwards. It's very disappointing and I'm afraid the future will be that corners are being cut without the correct checks and balances being done to insure things are being done in the best interest of the

residents. Increased flooding concerns do not seem to be a concern. All the building being done in an area that already has unaddressed flooding issues makes this apparent. It is truly a shame for this to be happening right where we live.

COMMENTS: I oppsoe this Mud district for a couple reasons. As a nurse the placement of this community will be too close to sewage and poses risks to the community that this Islamic center intends to build. The biggest concern is the disruption of their loud horns for prayer calls is going to interfere severely with rest and sleep periods for myself personally as a nurse working hard long hours of the day and night there is no ab I pity to get quality rest which will impact judgment and driving ability. It will create noise pollution that impact my ability to keep Migraines away as sounds are a trigger for me. Please do not allow this center to be approved on this land

COMMENTS: Please do NOT post public notices in the Collin County Commercial Record as it costs a prohibitive \$200 to subscribe to CCCR. Please post public notices wherever the local municipality prefers. I just discovered from my small town city administrator that you are planning a new Texas Pollutant Discharge Elimination System (TPDES) to discharge treated domestic wastewater at a daily average flow not to exceed 750,000 gallons per day into an unnamed tributary and the average citizen taxpayer will never know until its too late. Please stop the hiding of projects from the public by placing the notice in places the average resident has never heard of.
