**COMMENTS:** I own land along Boggy Creek that this wastewater plant will discharge into. My land is divided by Boggy Creek with about 7 acres on the South side and 15 acres on the North side of the creek. My public road access to my property is from the South side. I can currently drive accross Boggy Creek an average of 300+ days a year because the creek is often dry or very low flowing in my area. I am concerned with 4.5MGD of discharge that the creek might never be dry enough or low enough to allow me to access the North side of my property.
