COMMENTS: I request a public meeting for this permit and a contested case hearing on this permit 210-215-5752 4370 E loop 1604 Elmendorf tx 78112 Southwaste Compost permit # 2317 - 20805 lamm Rd Elmendorf tx I have property less than a block away . the smell of rotten egg, sewage, restaurant grease is so strong that we cannot spend time outside . It is effecting me doing any kind of Buissness at the property . It is also effecting other surrounding Buisness and our schools . children complain of strong gas smell , some children with asthma can't breath when smell gets to strong . It's also effecting any new Buissness to our area for growth. All surrounding communities and facilities complain of the smell but nothing is being done. We have requested numerous times for TECQ to come out when smell is bad. Reports were made back in 2018 results came back as a faint smell . We can't allow more hours of operation and a bigger facility. This smell is not common to living in any community.

COMMENTS: I request a public meeting and contested case hearing for Southwaste Compost permit #2317. I have a property located 2 miles away from Southwaste Compost. The smell of rotten egg, sewage, and restaurant grease is so strong that we cannot spend time outside. This odor is also seeping into my house which causes nausea. It is also affecting the surrounding businesses and our schools: staff complain of a strong gas smell creating fear of a potential gas leak, some children with asthma can't breathe well when the smell gets too strong, and the rancid smell keeps any new businesses from wanting to operate in our area affecting its growth and development. All surrounding communities and

facilities complain of the smell, but nothing is being done by Southwaste Compost. Local community groups have requested numerous times for TCEQ to come out when the smell is really bad, but by the time someone responds to the complaints, the smell subsides. This is why reports made to TCEQ back in 2018 only resulted in a report of "a faint smell." We cannot allow Southwaste Compost to expand their hours of operation or their facility. This smell affects our quality of life and is not common to living in any healthy community.

COMMENTS: I am the Superintendent of Schools at Southside ISD. Unfortunately, there is a strong stench that infiltrates our buildings having a negative impact on our students and staff. Monthly our maintenance staff are dispatched to investigate the foul odor at our buildings. They check for gas leaks in the buildings just to find out that the bad smell is caused by the Southwaste Disposal Facility. The district has invested in air purifiers in our buildings to mitigate the bad smell. However, the stench is still there even with the air purifiers are in operation. In addition to the manpower and resources used to address the bad smell, it is negatively impacting our students and staff who suffer from respiratory illnesses such as asthma or hypertension. This should not be something that our students and staff experience when attending our school district. On behalf of the Southside community we request that this be investigated and addressed. I request a public hearing so that I have an opportunity to speak in more detail the serious concerns I have in regards to the wellbeing of our students and staff.
