COMMENTS: Concerned with water quality of the Bayou and dischsrginf effluent water from the sewer plant. It's not if but when it fails who is responsible? This might be an option but it should not be concidered. they need to tie into the public system. Do not dump sewage water into the Bayou. Why is there not a report on the water quality of the Bayou that is part of the decision. How can you add toxic water to an already failing water way. This is absurd. Sizing of discharge pipes, retention ponds, erosion issues and changing the natural flow. So much to consider for those up and down stream. On a high tide or storm surge that water becomes tidal, that system can not discharge and will fail. That water comes onto my property and I will have to deal with their crap. Literally, I can not think how any part of this is a good idea.

COMMENTS: PLEASE do not approve this permit. My husband's grandparents lived on this street decades ago and sold small pieces of land to home owners looking to create homes and communities in this quiet, peaceful area. We bought my in-laws home less than a year ago and are now raising our 3 and 5 year olds in this family home around the neighbors that have worked so hard to keep this a safe, happy community. When it rains, our yards turn to lakes- what will this look like when you add MORE homes and a water treatment facility? What will happen to these roads? Country side cannot handle the amount of traffic this will bring and we don't want our quaint roads widened. Let us keep our community as it is! Let our kids be able to wander freely and live safely in and around our homes. Please don't rob us of the dreams that have been in our family for multiple generations spanning multiple decades. Not one single person currently living in this area wants this- does that mean anything at all? Shouldn't that speak volumes? Please hear our pleas. The lands can't support it and the community won't support it. PLEASE.

COMMENTS: I object to the issuance of this permit. This construction is going to affect the local environment, damaging the wildlife, waterways of Dickinson Bayou and flora. I live right by this property and am deeply concerned about failures of this system and the possibility of damaging the nearby areas and my property. Any overflow will pollute our land and water affecting downstream area residents and essentially being dumped into water that people's livestock and pets could drink. I also believe the construction of the sewage plant will affect our property values and be a smell nuisance, which affects our property values.
