COMMENTS: My husband & I would like to request a Contested Case Hearing regarding the Cielo Garden Reclamation Facility, Permit #WQ00116374001. We own a farm/ranch on 1801 CR 318, Bartlett, TX 76511. Willis Creek runs through the back portion of our property and is approximately 0.5 miles downstream from the proposed facility. We are very concerned about how the discharged water will affect the quality of the water that our livestock and wildlife drink and the fauna & flora along Willis Creek. The creek is an important resource which needs to be protected. Jane T. Bessent

COMMENTS: My husband and I own property on Willis Creek that will be affected by Pollutant Discharge Elimination System. We are very concerned about the quality of the discharged water and how it will affect our creek and livestock. Also, in drought conditions that we have all too often in Texas we do not see how any wastewater could be released. Current conditions of the creek are bone dry. Please contact me with any additional information about this project.
