COMMENTS: I am asking for TCEQ to deny Valero's application for an amended and renewed air permit. I also request for the agency to grant a public meeting to give the residents the opportunity to learn more about the permit application and request concerns. Valero's facilities have been found to emit dangerous levels of benzene which cause leukemia and other blood borne diseases. TCEQ is also negligent in the handling of the situation when Valero has exceeded emissions. Rather than fining the facility and holding them accountable, they are able to pay a small fine (if fined), and resume operations as usual and are granted an increase in emissions. All the residents near the facility and those surrounding the area bear the consequences of the increase of carcinogens and pollutants. TCEQ must do better and deny Valero's request.
