COMMENTS: "I object to the proposed permit 177217L002 in regards to Raptor Ready mix Inc establishing a temporary concrete production site due to numerous concerns regarding air quality of nearby residents. Currently we have a functioning organic materials plant, Silver Creek Materials, which produces large amounts of dust, debris, and odor pollution. An additional materials manufacturing site within such close proximity of multiple residential neighborhoods would most definitely cause a

cumulative effect. This cumulative effect poses an elevated health danger, quality of life issue, and would be an overall nuisance to the citizens of Fort Worth and surrounding county residents. We have officially contacted our representative, Maci Hill, and have asked a public hearing be granted to further voice concerns and educate the public about this permit. Thank you

COMMENTS: I object to the proposed permit 177217L002 submitted by Raptor Ready Mix, Inc. to establish a temporary concrete production site for several concerns. Particularly the impact on air quality and transportation in/around the site affecting nearby residents, I am one of those affected by this proposed site. The portion of Silver Creek where the site is proposed is already a precarious stretch of road due to the sharp angle of the road and existing large trucks from Silver Creek Materials. Silver

Creek Materials produces a large amount of dust, debris, and odor pollution that we are already subjected to. The infrastructure of this road does not support the increased traffic, large trucks, and other potential hazards due to the byproducts of concrete transfer (particulate dust obstructing the road comes to mind). Additionally, this stretch of road is also very close to a High School, where my children attend. Not only will my children be subjected to air quality concerns at home, but also in their learning environment and after school, outdoor activities. Furthermore, I am empowered to speak up against this proposed site to emphasize preservation of the Lakeside/SilverCreek watershed and rural aesthetic that contributes to property values. The cumulative effect of these factors elevates the health danger, quality of life, and would be an overall hazard to the surrounding residents. My neighborhood has officially contacted Maci Hill, our representative, to advocate on our behalf for a public hearing to bring awareness about this permit and its potential impact on our community. Thank you for this opportunity to object to the requested concrete batch plant.

COMMENTS: I strongly object to the proposed permit 177217L002 for Raptor Ready Mix Inc. to establish a temporary concrete production site. My concerns center around the adverse impact this facility will have on the health, quality of life, and environment for nearby residents and surrounding communities. Currently, the existing Silver Creek Materials plant generates significant levels of dust, debris, and odor pollution. Introducing an additional materials manufacturing site in such close proximity to multiple residential neighborhoods would create a cumulative effect that poses serious risks: Air Quality and Health Risks: The increased dust and particulate matter would exacerbate respiratory issues, allergies, and overall public health, particularly for children and older adults. Traffic and Infrastructure Impact: Additional heavy truck traffic along Silver Creek Road will worsen congestion, strain infrastructure, and increase safety risks for residents and commuters. Environmental and Aesthetic Concerns: The Lakeside/Silver Creek area is valued for its rural character and natural beauty, which contributes to local property values. Another industrial site jeopardizes this balance. We have officially contacted our representative, Maci Hill, to express our concerns and request support in addressing this matter. I respectfully ask that the Texas Commission on Environmental Quality (TCEQ) grant a public hearing to ensure residents and stakeholders have an opportunity to voice their objections and gain further clarity about this permit. Thank you for your attention to this matter.

FAX:

COMMENTS: I object to the proposed permit 177217L002 in regards to Raptor Ready mix Inc establishing a temporary concrete production site due to numerous concerns regarding air quality of nearby residents. Currently we have a functioning organic materials plant, Silver Creek Materials, which produces large amounts of dust, debris, and odor pollution. An additional materials manufacturing site within such close proximity of multiple residential neighborhoods would most definitely cause a

cumulative effect. This cumulative effect poses an elevated health danger, quality of life issue, and would be an overall nuisance to the citizens of Fort Worth and surrounding county residents. We have officially contacted our representative, Maci Hill, and have asked a public hearing be granted to further voice concerns and educate the public about this permit. Thank you.

COMMENTS: Please accept this concern from the Tejas Trails neighborhood. We have a long-standing issue with Silver Creek Materials and have already participated in the legal action requiring Silver Creek Materials to be better neighbors by regulating their compost grounds. The issue has become air quality and a noxious smell. We are worried that adding a cement plant would create a compounding issue. In our first round of concerns, Raptor Ready Mix has installed signage to inform the community, but the

signs are very small and on the curve of a very busy road where they can easily be missed and it is dangerous to stop and get the details. Please give us the opportunity of a public hearing to review the plans and raise concerns.

COMMENTS: I object to the proposed permit 177217L002 in regards to Raptor Ready mix Inc establishing a temporary concrete production site due to numerous concerns regarding air quality of nearby residents. Currently we have a functioning organic materials plant, Silver Creek Materials, which produces large amounts of dust, debris, and odor pollution. An additional materials manufacturing site within such close proximity of multiple residential neighborhoods would most definitely cause a

cumulative effect. This cumulative effect poses an elevated health danger, quality of life issue, and would be an overall nuisance to the citizens of Fort Worth and surrounding county residents. We have officially contacted our representative, Maci Hill, and have asked a public hearing be granted to further voice concerns and educate the public about this permit.

COMMENTS: Good afternoon, My name is Ross Perez and I am the current President of the Tejas Trails Neighborhood Association. Our neighborhood directly connects to property for the proposed concrete plant. Our board needs to oppose this project for several reasons: We object to the proposed permit 177217L002 in regards to Raptor Ready mix Inc establishing a temporary concrete production site due to numerous concerns regarding air quality of nearby residents. Currently we have a functioning organic

materials plant, Silver Creek Materials, which produces large amounts of dust, debris, and odor pollution. An additional materials manufacturing site within such close proximity of multiple residential neighborhoods would most definitely cause a cumulative effect. This cumulative effect poses an elevated health danger, quality of life issue, and would be an overall nuisance to the citizens of Fort Worth and surrounding county residents. We have officially contacted our representative, Maci Hill, and have asked a public hearing be granted to further voice concerns and educate the public about this permit. Thank you. Respectfully, Ross Perez

An additional materials manufacturing site within such close proximity of multiple residential neighborhoods would most definitely cause a

cumulative effect. This cumulative effect poses an elevated health danger, quality of life issue, and would be an overall nuisance to the citizens of Fort Worth and surrounding county residents. I have asthma and this would exacerbate the condition. I work for a construction company and we do large pours all the time. They are done in the middle of the night or the road is closed temporarily to facilitate the concrete trucks. This is done all the time in the industry. I do not feel that we should compromise our health for the convenience of the concrete company and the construction company. I also think it is in the best interest of the residents to perform a current air quality test so that when the lawsuits start from the people being sick in a year we can compare it with the tests we do at that time. We have officially contacted our representative, Maci Hill, and have asked a public hearing be granted to further voice concerns and educate the public about this permit. Thank you.

RN NUMBER: RN112027602

PERMIT NUMBER: 177217L002

DOCKET NUMBER:

COUNTY: TARRANT

PRINCIPAL NAME: RAPTOR READY MIX INC

CN NUMBER: CN606227288

NAME: Garland Tate

EMAIL: tatefw@aol.com

COMPANY:

ADDRESS: 656 Paint Pony Trl. N.
Fort Worth, TX 76108

PHONE: 8173077937

FAX:

COMMENTS: We oppose the concrete business in our neighborhood due to the following: I object to the proposed permit 177217L002 in regards to Raptor Ready mix Inc establishing a temporary concrete production site due to numerous concerns regarding air quality of nearby residents. Currently we have a functioning organic materials plant, Silver Creek Materials, which produces large amounts of dust, debris, and odor pollution. An additional materials manufacturing site within such close proximity of

multiple residential neighborhoods would most definitely cause a cumulative effect. This cumulative effect poses an elevated health danger, quality of life issue, and would be an overall nuisance to the citizens of Fort Worth and surrounding county residents. We have officially contacted our representative, Maci Hill, and have asked a public hearing be granted to further voice concerns and educate the public about this permit. Thank you

Kimberly Muth
