**COMMENTS:** I am concerned about the impact of the proposed wastewater treatment facility. Neighboring properties are on private wells that could be negatively affected. These properties are in the ETJ and do not have access to City water. This property is on the Edwards Aquifer's recharge zone. A nearby cave is protected because of endangered species. This facility would be detrimental to all of the above.

**COMMENTS:** In reviewing the Application on file at the library, there is an unresponded letter regarding connecting to the Berry Creek WWTF. the letter states that the plant is 2.13 miles away, however, across Shell Road to the north there will be the Berry Creek Interceptor, servicing subdivisions basically adjacent to the property. Rather than a standalone plant which would have to be maintained for years to come, why is hooking up to the interceptor not the most economical, and safest disposal of the wastes?

**COMMENTS:** When reviewing the application, there is very little information on the intended use of the property, or how the treatment plant and housing units built on it will be situated. The black and white map included is deceptive when compared to a color example obtained in a separate discussion. Is there any regulations of protections in place regarding putting in this system and spray fields taking up most all space which will not be housing or parking? This does not seem to be save or in the best interests of tenants.

**FAX:**

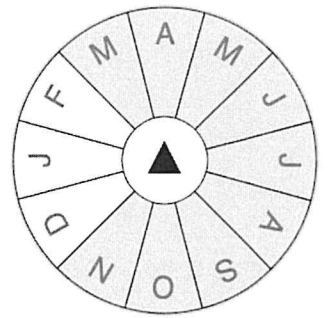

**COMMENTS:** Using the buffer zone map that is in the application and in the current permit, it is difficult to tell if the anerobic and anoxic treatment units will meet the rule in 30 TAC § 309.13(e)(1), which states: Lagoons with zones of anaerobic activity (e.g., facultative lagoons, un-aerated equalization basins, etc.) may not be located closer than 500 feet to the nearest property line. All other wastewater treatment plant units may not be located closer than 150 feet to the nearest property line. Land used to treat primary effluent is considered a plant unit. Buffer zones for land used to dispose of treated effluent by irrigation shall be evaluated on a case-by-case basis. The permittee must hold legal title or have other sufficient property interest to a contiguous tract of land necessary to meet the distance requirements specified in this paragraph during the time effluent is disposed by irrigation. "LAND USED TO DISPOSE OF TREATED EFFLUENT", is shown as immediately abutting the adjacent properties to the south. There is ZERO buffer from the limits of the disposal zones and the neighbors, and when included with a wind map from current times which shows a reasonable % of winds from the north, would cause both effluent to be sprayed onto neighboring property, but also an increased odor nuisance. "BUFFER ZONES FOR LAND USED TO DISPOSE OF TREATED EFFLUENT BY IRRIGATION SHALL BE EVALUATED ON A CASE-BY-CASE BASIS." - we ask that there be a buffer between the fields and neighboring property lines.

**COMMENTS:** I am concerned about the impact of this request to local homes on wells, the Edwards Aquifer recharge zone and the impact on quality of life of neighbors. I have been told that karst formations exist nearby and potentially into the subject areas. Immediately south of the property is ETJ, with no city water, and all homes are on wells. At least 5 such properties are directly adjacent to the requesting location.

**COMMENTS:** I am writing to express my concerns about this proposed development and the request for the wastewater permit. The application contemplates a large multifamily development that would have to accommodate thousands of gallons of water and wastewater. The surrounding neighbors are all on well and depend on the flow and cleanliness of the water extracted from the wells. In addition, the effect on the wildlife and overall quality of life will be severely impacted by such a massive build. The caves below present an issue as the wastewater can leach into those polluting the ground water. The owners of this property left the ETJ for the express purpose of pursuing their plans despite public opposition & a denial by the GTX P&Z. Their partner NexMetro left the project because of the issues presented by the citizens. GTX is opposed to further multifamily development and in fact denied the application for Hope Ranch which is located directly across on Shell Rd. This build is incongruent with its surroundings & would adversely affect all who live here human and wildlife alike. We ask that you please strongly consider denying this permit to maintain the integrity of the surrounding areas and neighborhoods.

**COMMENTS:** I am a home owner that is in close proximity to the proposed aeration septic plan for this property. My home is run completely off of well water and I am concerned about the extremely large amount of wastewater that will be coming from this development. This property is in the Edwards Aquifer recharge zone with various caves that support wildlife and will flow into the underground sources of our

well water. We currently have no other water source. Please note: I am sending in my objection to this septic plan.

**COMMENTS:** John and Paula Lynne Krog are opposed to the Shell Road/Shell Spur project due to the multi family aspect and the aeration septic system. We are concerned about the private wells in our neighborhood as well as the aquifers that we get our water from. Our personal well is only 120 ft. deep and we are worried that this project could have a negative affect on our water. We have used this well since 1995 and have never had to worry about any kind of contamination from building projects. Several of our neighbors that back up to the property have wells within 500 ft. of the proposed septic plans for this property. Please deny this request. Thank you.

**COMMENTS:** Hell , I'm very concerned about a development like this so close to our neighborhood. Many years ago a small water company (brushy creek in round rock) had a power failure and untreated water contaminated their water supply. Many of my neighbors are on wells and I'm concerned about the water quality! This could also be detrimental to the berry creek neighborhood because you'll have to dive past a sewage treatment system in a residential neighborhood. Thank you for listening to my concerns.

**COMMENTS:** I am concerned about the impact that the proposed wastewater treatment facility will have on the neighboring private wells. These properties are in the ETJ and do not have access to city water. This property is on the Edward's Aquifer Recharge Zone. It is my understanding that the property has caves on it. A nearby property (less than 500 feet) has a protected cave owned by the city of Georgetown. It has

several endangered species in it. A meeting with someone from TCEQ to talk to near by residents about concerns would be appreciated.
