COUNTY: HARRIS

PRINCIPAL NAME: PARK ENVIRONMENTAL EQUIPMENT LLC

CN NUMBER: CN606070829

NAME: Kimberly Garcia

EMAIL: kymgar@hotmail.com

COMPANY:

ADDRESS: 8719 Cataldo Court
Houston, TX 77040

PHONE: 7138846303

FAX:

COMMENTS: Subject: Opposition, Formal Request for Public Meeting, and Contested Case Hearing – Permit Registration No. 79400 (Park Environmental Equipment) To Whom It May Concern: I am writing to you today as a deeply concerned long-time resident of the community located near the proposed site for the continued operation of a concrete batch plant by Park Environmental Equipment, referencing air quality standard permit registration number 79400. I recently received your letter regarding this matter, and the information contained within is both very alarming and concerning to me and my neighbors. I am writing to formally state my strong objection and request that this authorization for continued operation be rescinded. In addition to my strong opposition to this permit renewal, I formally request the following immediate actions: A Public Meeting: I request that a public meeting be held in our community to allow for open discussion and for residents to formally provide oral testimony. A Contested Case Hearing: I formally request a Contested Case Hearing be held for this permit application. As a person with a pre-existing heart condition (arrhythmia), I believe I qualify as an "affected person" and must be granted the opportunity to challenge this permit at a formal hearing. As a resident who lives in the vicinity of this proposed plant, the potential impact on air quality is a personal and urgent matter. The particulates mentioned in your correspondence—the same fine matter that can enter the lungs and bloodstream, potentially causing lung disease, heart attacks, and asthma—directly threatens my health. I have a diagnosed heart arrhythmia, which places me in a particularly vulnerable category for complications due to air pollution exposure. I am also concerned about the potential for long-term health effects, including neurological issues such as brain fog and forgetfulness, due to years of exposure to these contaminants. I have lived here for years and can attest that this facility has been operating for a long period of time. I frequently hear loud machinery operation from this area, often late at night. This ongoing noise pollution, combined with the air contaminants and the cumulative impact of other industrial businesses nearby, creates an unacceptable public health and quality-of-life burden on our neighborhood. Simply put, the continued operation of this plant near our homes would severely limit my ability to safely utilize the outdoor spaces in my own neighborhood. I am a contributing member of this community and have spent years helping to keep it clean, safe, and healthy. We deserve to be able to use our yards and public spaces without the constant worry of inhaling harmful contaminants. My concerns extend far beyond my own health. I am also worried about the small children within my household who spend time outside playing. Their young, developing lungs would be directly exposed to these harmful substances. Furthermore, many people in my neighborhood are elderly residents who are often outdoors, and they are also at a significantly increased risk from this kind of pollution. The construction and continued operation of this type of industrial facility should not be authorized in a densely populated area utilized by families, children, and people with existing health complications. This location is not an appropriate place for a concrete batch plant. Facilities of this nature should be located in areas that minimize the exposure risk to vulnerable populations. I want to be sure that my voice is heard, and I would like to be kept up to date on any actions, public meetings, or decisions related to Permit Registration No. 79400. I urge you to consider the severe and negative impact this decision will have on the health and quality of life for the residents of this neighborhood. Our well-being must be prioritized over authorizing continued operation of this type of plant here.

The coding on this is correct. I just want to make sure this comment is associated to NSR 79400 and disassociated from MSW 2185A. Thanks, bp.
