Houston, TX 77040

PHONE: 2812174228

FAX:

COMMENTS: Concrete batch plants contribute to particulate matter air pollution. Fine particulate matter particles can get caught in the lungs and enter the bloodstream. Particulate matter pollution has been linked to a variety of problems, including premature death in people with heart or lung disease, nonfatal heart attacks, irregular heartbeat, aggravated asthma, and decreased lung function. People with heart or lung diseases, children, and older adults are most likely to be affected by particulate

pollution exposure. WE WOULD LIKE TO REQUEST A PUBLIC MEETING WITH PARK ENVIRONMENTAL EQUIPMENT, LLC.
