

Credit and Allowance Registry Abbreviations

The [Credit and Allowance Registry](#) is a tool used to track the use, trading, and banking of credits and allowances for the following programs found in [30 Texas Administrative Code Chapter 101, Subchapter H](#):

- Emission Credit (EC) Banking and Trading;
- Emissions Banking and Trading of Allowances (EBTA);
- Mass Emissions Cap and Trade (MECT);
- Discrete Emission Credit (DEC) Banking and Trading; and
- Highly Reactive Volatile Organic Compounds (HRVOC) Emissions Cap and Trade (HECT).

The Credit and Allowance Registry contains projects which are either the submission of an Emissions Banking and Trading form or an internal process. Each project has an associated project type (the general action) and transaction type (a more specified action). For example, a project with a project type of BRPT and a transaction type of CAP_PEN means that a company submitted an Annual Compliance Report for MECT or HECT and there were not enough allowances in the compliance account for the specified control period.

The following lists explain the common abbreviations found in the Credit and Allowance Registry.

Table 1: Project Types

Project Type	Banking Action
BCRT	Certification of EBTA, HECT, or MECT allowances
BDIU	Intending to use DEC's for compliance with a rule requirement
BDRC	Certifying emission reductions as DEC's
BEIU	Intending to use EC's for compliance with a rule requirement
BERC	Certifying emission reductions as EC's
BERR	Verifying if EC's are surplus to all rules and regulations
BISC	Miscellaneous (internal process)
BMDC	Certifying emission reductions from mobile sources
BMEC	Certifying emission reductions as EC's
BNME	Legal name change (internal process)
BRPT	Annual Compliance Report for EBTA, HECT, or MECT
BRVN	Revision to an Annual Compliance Report or the compliance account's allowance allocation
BTSF	Transferring EC's, DEC's, EBTA allowances, HECT allowances, or MECT allowances
BUSE	Using DEC's from compliance with a rule requirement

Table 2: Transaction Types

Transaction Type	Banking Action
CAP BALL	Company bought the site along with all of the available HECT and MECT allowances in the previous compliance account
CAP BUY	Company bought either HECT or MECT allowances
CAP BUY_CONVERTED	Company bought HECT allowances that were once certified volatile organic compound (VOC) emission reductions from a stationary source (ERC)
CAP BUY_POST_ALLOC	Company bought HECT allowances (generally, application received in 2013 or later)
CAP CERT	Compliance account certified with HECT or MECT allowances
CAP END	No additional HECT and/or MECT Annual Compliance Reports needed unless subject facilities/equipment are brought back onto the site
CAP PEN	Compliance account did not have enough MECT or HECT allowances for the specified control period

Credit and Allowance Registry Abbreviations

Transaction Type	Banking Action
CAP_RCRT	Revising the amount of allowances in the compliance account
CAP_RPT	Annual Compliance Report for HECT or MECT
CAP_RRPT	Annual Compliance Report revision for HECT or MECT
CAP_SALL	Company sold the site along with all of the available HECT and MECT allowances held in its compliance account
CAP_SELL	Company sold either HECT or MECT allowances
CAP_SELL_CONVERTED	Company sold HECT allowances that were once certified VOC ERCs
CAP_SELL_POST_ALLOC	Company sold HECT allowances (generally, application received in 2013 or later)
CAP_VINT	Compliance account had enough HECT or MECT allowances for the specified control period
CNAME_OLD	Legal name change - old company name
CNAME_NEW	Legal name change - new company name
DERC_BUY	Company bought DEC equal to the amount in the specified certificate
DERC_GEN	Company certifying emission reductions as DEC equal to the amount in the specified certificate
DERC_INTEN	Company intending to use DEC from the specified certificate (may not equal the full amount available in this certificate)
DERC_RET	Company retained DEC equal to the amount in the specified certificate
DERC_SELL	Company sold DEC from the specified certificate (may not equal the full amount available in this certificate)
DERC_USE	The actual amount of DEC used for a rule requirement
ERC_BUY	Company bought EC equal to the amount in the specified certificate
ERC_GEN	Company certifying emission reductions as EC equal to the amount in the specified certificate
ERC_HECT	Company converting VOC ERCs into HECT allowances
ERC_INTEN	Company intending to use EC from the specified certificate (may not equal the full amount available in this certificate)
ERC_RET	Company retained EC equal to the amount in the specified certificate
ERC_REV	Having devalued, the company retains the remaining ECs equal to the amount in the specified certificate
ERC_RRVW	Company or individual requesting the review an EC certificate to determine if it is still surplus to all rules and regulations
ERC_SELL	Company sold ECs in the specified certificate (may not equal the full amount available in this certificate)
ERC_USE	The actual amount of ECs used for a rule requirement
SB7_BALL	Company bought the site along with all of the available EBTA allowances in the previous compliance account
SB7_END	No additional EBTA Annual Compliance Reports needed
SB7_BUY	Company bought EBTA allowances
SB7_RPT	Annual Compliance Report for EBTA
SB7_RRPT	Annual Compliance Report revision for EBTA
SB7_SALL	Company sold the site along with all of the available EBTA allowances in its compliance account
SB7_SELL	Company sold EBTA allowances
SB7_VINT	Compliance account had enough EBTA allowances for the specified control period
