Contents

Chapter 1. General Information	1
Introduction	1
What This Publication Contains	1
About 30 TAC Section 101.10.....	2
A Self-Reporting Process.....	2
Nonattainment Designations	3
Special Inventory Request	3
Emissions Inventory Reporting Requirements Map	4
Due Date	4
What Constitutes a Complete Submission?.....	5
Requirements for a New Emissions Inventory or Updating an EI	6
Special Requirements for a Site with Insignificant Changes in Emissions.....	6
If a Site Doesn't Meet the Requirements of 30 TAC 101.10 for the Current Year	8
If a Site Doesn't Expect to Meet the Requirements of 30 TAC 101.10 in Future.....	8
Hard Copy Signature Requirements.....	9
If a Site Is Permitted but Not Built.....	10
Sample Calculations.....	10
Confidential Data and Other Information	10
Web Reporting.....	11
Reporting an IEI or Submitting an AEIU through Interactive Web Entry	11
Reporting an IEI or Submitting a Text File of the AEIU Online through STEERS.....	12
Chapter 2. Creating an Initial Emissions Inventory	15
The Emissions Inventory Process	15
Requirements for Submitting an Emissions Inventory	15
Understanding Emissions Inventory Structure.....	16
Facilities and Emission Points	16
Paths	17
Chapter 3. Emissions Inventory Structure	19
Identifying Emission Sources.....	19
Guidelines for Including Sources in Emissions Inventory Structure	19
Sources that Must Be Added to the EI and May Be Grouped as Collective.....	19
Representing the Structure of a Regulated Entity in the Emissions Inventory	20
Facilities and Facility Identification Numbers	20
Emission Points and Emission Point Numbers	21
Abatement Devices and Control Identification Numbers	21
Emission Paths	22
Collective Sources (Collective Facilities).....	22
Representing Combustive Abatement Devices.....	24
Appropriate Structural Representation of Common Industrial Processes	24
Cooling Towers	24
Glycol Units and Amine Units.....	25
Sulfur Recovery Units	27
Loading Operations.....	29
Blowdown Operations.....	30
Surface Coating Operations	33
Aggregate Operations.....	34
Marine Operations.....	36

Wastewater Collection and Treatment	39
Chemical Production.....	39
Modifying Existing Emissions Inventory Structure.....	39
Removing Structure.....	40
Changing Facility, Emission-Point, or Abatement-Device Nomenclature	40
Chapter 4. Determining and Reporting Emissions.....	41
Required Emissions Data	41
Acceptable Determination Methodologies.....	41
Source-Specific Determination Methodologies	42
Choosing a Methodology when More than One Is Used for a Contaminant	48
General Order of Preference	49
Using Factors from a Permit	50
Speciating Emissions	50
Speciating Volatile Organic Compounds.....	50
Speciating Hazardous Air Pollutants and Other Compounds of Interest	52
Speciating Particulate Matter	53
Speciation Criteria Summary	55
Reporting Emissions	57
Annual Emissions	57
Ozone Season Emissions.....	57
Ozone Season Daily Rates Are Required from Sites in These Counties	58
Emissions Events	59
Scheduled Maintenance, Startup, and Shutdown.....	60
Chapter 5. Example Initial Emissions Inventory.....	61
Identifying Emission Sources.....	61
Representing Emission Sources in the Emissions Inventory.....	63
Chapter 6. Updating an Emissions Inventory.....	69
Updating EI Data.....	69
Special Notes.....	69
Account Information	70
Contact Information	70
Criteria Emissions Totals.....	70
Site Quantifiable Event Totals	70
Emissions Events Certifying Signature	71
Signature of Legally Responsible Party	71
Facility Information.....	72
Control Device Information	77
Emission Point Information	77
Total Aggregate Annual Heat Input	78
Emissions Factors	78
Updating Reported Emissions	79
Chapter 7. EI Revisions, EI Data, Site Coordinate Data	81
Revising an EI	81
Current and Previous Reporting Year.....	81
Other Reporting Years.....	82
EI Data.....	83
View and Download Data from the EAS Webpage	83
Run TCEQ Central Registry Integrated Web Reports	83

Request Detailed Emissions Data from the EAS.....	83
File a TCEQ Open Records Request.....	84
View Paper EI Data.....	84
Coordinate Data.....	84
Spatial Queries and Mapping Application Viewer.....	84
Appendix A. Technical Supplements.....	85
Miscellaneous VOC Sources.....	85
Casing Head Gas Releases.....	85
Coking Units.....	85
Confined Entry Ventilation.....	86
Merox Units.....	86
Glycol Dehydration Operations.....	86
Amine Units in Carbon Dioxide Service.....	87
Limitations of AMINECalc.....	87
Pigging Units.....	88
VOCs and HAPs from Metal Shredding.....	88
References.....	88
Technical Supplements.....	89
Technical Supplement 1: Selected Combustion Sources.....	90
Introduction.....	90
Internal Combustion Engines.....	90
External Combustion Sources Burning Gaseous Fuel.....	97
Combined-Cycle Turbines with Heat Recovery Steam Generators.....	100
Portable Engines.....	102
Coal-Fired Boilers.....	102
Technical Supplement 2: Cooling Towers.....	107
Introduction.....	107
Cooling Tower Structure.....	107
Cooling Tower Source Classification Codes.....	108
Expected Emissions.....	108
Emissions Determination.....	109
Annual and Ozone Season Rates.....	112
Speciation.....	112
Supporting Documentation.....	112
Issues of Special Concern.....	112
References.....	113
Technical Supplement 3: Fugitive Emissions from Piping Components.....	114
Introduction.....	114
Fugitive Component Structure.....	114
Expected Emissions.....	115
Quantifying Fugitive Emissions from Piping Components.....	115
Determining Emissions from Monitored Components.....	116
Determining Emissions from Unmonitored Components.....	120
Speciation.....	125
Supporting Documentation.....	125
Issues of Special Concern.....	125
References.....	129
Technical Supplement 4: Flares.....	130
Introduction.....	130

TCEQ 2010 Flare Study.....	131
Expected Emissions.....	131
Emissions Determination.....	131
Annual and Ozone Season Rates	135
Speciation of Uncombusted Flared Gas Compounds	135
Supporting Documentation.....	136
Reporting Emissions from a Shared Flare.....	136
References	137
Technical Supplement 5: Marine Facilities	138
Introduction.....	138
Expected Emissions.....	139
Determining Emissions	139
Annual and Ozone Season Emission Rates.....	141
VOC and Particulate Speciation.....	142
Supporting Documentation.....	142
Issues of Special Concern	143
Technical Supplement 6: Aboveground Liquid Storage Tanks	144
Introduction.....	144
Expected Emissions and Determination Methods.....	145
Quantifying Storage Tank Emissions	146
Speciation	160
Supporting Documentation.....	161
References	161
Appendix B. Sample Letters.....	163
Letters that May Be Submitted Instead of an EI	163
Printing and Updating EIQ Pages Required with These Letters.....	163
Inapplicability Notification.....	164
Insignificant Emissions Change Notification	166
Appendix C. EAS Contact Information and Other Resources.....	168
Contacting the EAS.....	168
Emissions Inventory Mailing Addresses.....	168
EAS Staff Mailing Addresses	168
EAS Assistance	168
EAS Webpage	168
Air Fees Webpage.....	169
EPA Resources	169
Air CHIEF	169
AP-42	169
WebFIRE	169
Green Book.....	169
Protocol for Equipment Leak Emission Estimates	169
TCEQ Resources.....	170
Tools for Completing the EI.....	170
Information about Online Reporting	170
Central Registry IWR.....	170
EI Account Mailing Status.....	170
Air Permits Guidance Documents.....	170
Small Business and Local Government Assistance Information.....	170
Public Education and Pollution Prevention.....	170

Abbreviations..... 171
 Glossary..... 175

Tables

4-1. Example of Speciated VOC Emissions..... 51
 4-2. Example of Speciated Particulate Matter Emissions 55
 4-3. Summary of Speciation Criteria 56
 5-1. Identifying Emission Sources for a Hypothetical Upstream Gas-Field Site..... 62
 5-2. Assigning FINs to Emission Sources for a Hypothetical Upstream Gas-Field Site... 63
 5-3. Identifying Emissions Points for FINs for a Hypothetical Upstream Gas-Field Site 64
 5-4. Assigning EPNs to Emissions Points for a Hypothetical Upstream Gas-Field Site... 65
 5-5. Assigning CINs to Paths for a Hypothetical Upstream Gas-Field Site 66
 5-6. Selecting Group Types and Profiles for a Hypothetical Upstream Gas-Field Site... 68
 6-1. STARS Facility Group Types, Profiles, and Attributes..... 74
 A-1. Reporting Particulate Emissions..... 92
 A-2. Reporting VOC Emissions from Internal Combustion—Includes Formaldehyde... 95
 A-3. Reporting VOC Emissions from Internal Combustion—Excludes Formaldehyde... 96
 A-4. Reporting VOC Emissions from External Combustion 100
 A-5. Determining Emissions Using Correlation Equations..... 118
 A-6. Appropriate Substitute Factors for Nontraditional Components..... 123
 A-7. Flare Emissions Factors 133
 A-8. Maximum Destruction or Removal Efficiencies for EI Determinations 134
 A-9. Inputs for Calculating Ozone Season Emissions Using E&P TANK..... 152

Figures

3-1. Glycol Unit: Separate Still and Heater Vents 25
 3-2. Glycol Unit: Common Still and Vents..... 26
 3-3. Glycol Unit: Flared Still Emissions 26
 3-4. Glycol Unit: Still Emissions Routed through Heater 27
 3-5. Sulfur Recovery Unit, Unabated 27
 3-6. Sulfur Recovery Unit with Scrubber 28
 3-7. Sulfur Recovery Unit with Incinerator 28
 3-8. Sulfur Recovery Unit with Scrubber Prior to Incinerator..... 29
 3-9. Loading Area, Unabated 29
 3-10. Loading Area Controlled by a Flare..... 30
 3-11. Blowdown: Separate Compressor Engine and Blowdown Vents..... 30
 3-12. Blowdown: Common Compressor Engine and Blowdown Vent..... 31

3-13. Blowdown: Flared Blowdown Emissions	32
3-14. Blowdown Operations: Grouped Compressor Blowdowns	33
3-15. Paint Booth: Unabated	33
3-16. Paint Booth: Particulate Emissions Abated by a Filter	34
3-17. Spray Booth Controlled by an Incinerator	34
3-18. Fine and Coarse Piles: Emissions Controlled by Water Supply	35
3-19. Continuous and Batch Operations, Separated	35
3-20. Conveyor Transport: Interdependent Systems	36
3-21. Uncontrolled Bulk Liquid Material Emissions	36
3-22. Liquid Loading Controlled by a Vapor Recovery Unit and Incinerator	37
3-23. Uncontrolled Degassing and Cleaning Emissions	37
3-24. Pneumatic Transfer of Solids Controlled by a Baghouse	38
3-25. Uncontrolled Degassing and Cleaning Emissions	38
3-26. Degassing and Cleaning Emissions Routed to VRU and Incinerator	39
