\*\*\*\* Important Notice to Applicants \*\*\*\*  
SOLICITATION NO.: 582-22-30656  
FOR

**LIGHT-DUTY MOTOR VEHICLE PURCHASE OR LEASE INCENTIVE PROGRAM**

This Addendum to the Light-Duty Motor Vehicle Purchase or Lease Incentive Program (LDPLIP) serves to suspend acceptance of applications for hydrogen fuel cell or other electric-drive (plug-in or plug-in hybrid) vehicles.

Per Section 2.2 of the LDPLIP Notice of Rebates, TCEQ may award no more than 1,000 rebate grants for a combination of CNG and LPG vehicles and 2,000 rebate grants for hydrogen fuel cell or other electric-drive (plug-in or plug-in hybrid) vehicles during this funding period. The current number of applications and reservations received by TCEQ for hydrogen fuel cell or other electric drive (plug-in or plug-in hybrid) vehicles exceeds the 2,000 rebate grants available for this funding period. Applications received for hydrogen fuel cell or other electric-drive (plug-in or plug-in hybrid) vehicles after the date of this Addendum will not be considered for a rebate grant.

TCEQ will continue to accept applications for compressed natural gas and liquefied petroleum gas (propane) until 5:00 p.m. Central Time on January 7, 2023.
