

# New Technology Solutions for Emissions Reductions

## New Technology Implementation Grant Program (NTIG)

The Texas Commission on Environmental Quality (TCEQ) provides grants for projects to reduce emissions from facilities and other stationary sources in Texas. Grants may reimburse up to 50% of total project costs.

Total funding available:  
**\$10.9 million**

### Who Can Apply?

- An owner or operator of a stationary source (or facility) located in the state of Texas that emits pollutants.\*
- Entities that have an active registration with the Texas Secretary of State.

*\*Applicants who are not owners of the stationary source must provide evidence of operational control.*

### Eligible Project Categories

**Stationary Source Projects** that reduce emissions from stationary sources, targeting pollutants like:

- Criteria pollutants
- Hazardous air pollutants (HAPs)
- Other pollutants regulated by the Federal Clean Air Act or TCEQ

**Oil and Gas Projects** that reduce emissions from upstream, midstream, and downstream oil and gas industry activities, including production, completions, gathering, storage, processing, transmission, and refining through one of the methods listed below:

- Replacement, repower or retrofit of stationary compressor engines
- Installing systems to minimize gas loss, flaring, or combustion
- Reducing flaring and other site emissions

**Electricity Storage Projects** related to renewable energy such as:

- Lithium-ion batteries
- Energy-retaining flywheels
- Compressed-air energy storage
- Pumped hydropower or other gravity batteries
- Sodium-sulfur storage batteries

Apply today!  
Applications accepted October 31, 2024 - January 7, 2025
