[1]Does not include projects funded and subsequently canceled.

[2]The number of projects and number of activities are based on the primary area of the project. The grant amount, total NO_X reduced, and cost per ton of NO_X reduced are apportioned to all areas of use associated with a project.

[3]Totals have been rounded to the nearest whole number.

[4]The average cost per ton of NO_X reduced equals the total grant amount divided by the total NO_X reduced. The average cost per ton of NO_X reduced was calculated using raw numbers and then rounded to the nearest whole number.
