¹Does not include projects funded and subsequently canceled.

²The number of projects and number of activities are based on the primary area of the project. The grant amount, total NO_x reduced, and cost per ton of NO_x reduced are apportioned to all areas of use associated with a project.

³Totals have been rounded to the nearest whole number.

⁴The average cost per ton of NO_x reduced equals the total grant amount divided by the total NO_x reduced. The average cost per ton of NO_x reduced was calculated using raw numbers and then rounded to the nearest whole number.
