The U.S. Environmental Protection Agency (EPA) and the Texas Commission on Environmental Quality (TCEQ) will conduct a virtual Texas Water, Energy, and Emergency Management Workshop. The workshop will focus on two key interdependencies with the water sector: energy and emergency services. The target audience is drinking water, wastewater, and electric utilities as well as emergency management agency personnel. The workshop will include morning presentations and an afternoon tabletop exercise designed to foster ideas and actions to better prepare for, respond to, and recover from power outages and other multi-sector incidents.

We will be applying for continuing education credits for Texas drinking water and wastewater operators.

Please register for this free virtual workshop at:
