Emergency Preparedness Plan Template For Affected Utilities

Water Supply Division, Drinking Water Special Functions Section, MC-155
 P.O. Box 13087
 Austin, TX 78711-3087
 512-239-EPP1 (3771)
 PDWEPP@tceq.texas.gov
 TCEQ Water Homeland Security # 888-777-3186

Water System Name: Good Neighbor Water Supply Corporation			PWS ID No. (if applicable): 1234567	
District # (if applicable): 12345678			County: Fort Bend	
CCN # (if applicable): 12345		Phone Number: 555-555-5555		Email or Fax #: 555-555-5555
Mailing Address: Of preparer	Street/P.O. Box/Route: P.O. Box 1			
	City: Rosenberg	State: TX		ZIP: 55555
Prepared by: Irma Gooding			Title: Operator	
Owner: Nathan Gooding			Preparer's organization: Good Neighbor WSC	
Circle all Option(s) that apply, Refer to Section III: 1 2 3a 3b 4 5 6 7 8				
Plan Implementation Timeframe: Begin Date 06/01/2012			Expected Completion Date 12/01/2012	
Short Explanation of Proposed Plan (i.e. <i>Using portable generator to power 2 out of 3 wells</i>): We will have two permanent generators to operate the pumps at well # 1, the compressor and the booster pumps after the ground storage tank. Well # 2 will have a right angle drive. We will also be providing pressure to all the customers of the City of Smalls.				
Will this plan provide for 35 pounds per square inch (psi) of pressure to all your direct customers during a power outage lasting more than 24 hours caused by a natural disaster? Yes				
I certify, under penalty of law, that all the information provided herein is true and accurate to the best of my knowledge.				
Signature:			Title	

UPDATES TO EMERGENCY PREPAREDNESS PLAN (EPP)

The EPP is updated as changes occur such as dictated by personnel, phone numbers, technology, system additions or modifications. Record updates below:

Last Updated By	Title	Purpose (page #s)	On (Date)

Section I – Introduction

1. APPLICABILITY

This emergency preparedness plan template was developed for the operators and administrators of **affected utilities** in order to comply with the requirements for “affected utilities” in 30 Texas Administrative Code Chapter 290 Subchapter D and Chapter 291 Subchapter H and to demonstrate the utility’s ability to provide emergency operations during **extended power outages**.

An **affected utility** is a retail public utility, exempt utility, or provider or conveyer of potable or raw water service that furnishes water service to more than two customers and provides overnight accommodations in an affected county whether or not its facilities are located therein. An affected county is a county with a population of 3.3 million or more, or a county with a population of 550,000, or more adjacent to a county with a population of 3.3 million or more. An **extended power outage** means a power outage lasting more than 24 hours.

If you believe that you are NOT an affected utility please call 512-239-EPP1 (512-239-3771) or email PDWEPP@tceq.texas.gov.

A. Describe Your Water System. Check all that apply.

Residential Commercial Industrial Wholesale Institution

B. Is This EPP For An Existing or Proposed Water System?

2. CONTACT INFORMATION

During any type of emergency, the following persons will be in charge of the water system (contact in the order indicated):

Name	Title Organization	E-Mail	Phone Numbers (include area code)			
			Office	Cellular	Home	Other
Nathan Gooding	Owner	NGooding@GoodNeighbor.com	555-555-5555	555-555-5555	555-555-5555	
Irma Gooding	Operator	IGooding@GoodNeighbor.com	555-555-5555	555-555-5555	555-555-5555	
Joe Wimbley	Board President	JoWim@aol.com	555-555-5555	555-555-5555	555-555-5555	
Jon Knight	Attorney	jknight@knightvision.com	555-555-5555	555-555-5555	555-555-5555	

3. Location of Maps

The maps are not required to be submitted to TCEQ for review of the EPP, but should be available in case of an emergency.

Where is your distribution system(s) map located? Good Neighbor WSC Main Office @ 123 Bell Street, Rosenberg, TX 55555

Section II - DESCRIPTION OF THE WATER SYSTEM

INCLUDE ONLY THE EQUIPMENT LOCATED AT YOUR SYSTEM, NOT THE EQUIPMENT LOCATED AT ANOTHER WATER SYSTEM.

1. SOURCE INFORMATION

A. Does Your Water System Have A Ground Water Well(s)?

YES NO (Go to 1.B)

TCEQ Source ID	Owner's Designation	Well Location	Used During an Emergency?	Pump Capacity
G1234567A	Well # 1	FM 22 & Bell Street - WP # 1	YES <input checked="" type="checkbox"/> NO <input type="checkbox"/>	400 gpm
G1234567B	Well # 2	FM 44 & Hope Street - WP # 1	YES <input checked="" type="checkbox"/> NO <input type="checkbox"/>	400 gpm
			YES <input type="checkbox"/> NO <input type="checkbox"/>	gpm

B. Does Your Water System Treat Surface Water or Ground Water Under the Influence of Surface Water Sources(s)?

YES NO (Go to 1.C)

TCEQ Source ID	Owner's Designation	Intake Location	Used During an Emergency?	Number of Pumps	Total Pump Capacity at Intake
			YES <input type="checkbox"/> NO <input type="checkbox"/>		gpm
			YES <input type="checkbox"/> NO <input type="checkbox"/>		gpm
			YES <input type="checkbox"/> NO <input type="checkbox"/>		gpm

C. Does Your Water System Purchase (or Receive) Water?

YES NO (Go to 2.A)

i. Is this affected utility a direct pressure system? (Does the provider's water flow directly into your distribution system, not into a tank? Direct pressure systems generally have no tanks or pumps.)

YES NO

ii. Does this affected utility re-pressurize the water received from the provider? (Does the water from the provider flow into a tank which is then pumped out into the distribution system by your own pumps?)

YES NO

Provider Name	PWS ID	Pressure Plane (if more than 1 plane)	Will You Rely On This Provider For Water During An Emergency?	Will You Rely On This Provider For Pressure At YOUR Customer's Connections During An Emergency?	Capacity	Normally Open or Closed Interconnect?
HP WSC	1234569		YES <input type="checkbox"/> NO <input checked="" type="checkbox"/>	YES <input type="checkbox"/> NO <input checked="" type="checkbox"/>	300 gpm	Open
			YES <input type="checkbox"/> NO <input type="checkbox"/>	YES <input type="checkbox"/> NO <input type="checkbox"/>	gpm	
			YES <input type="checkbox"/> NO <input type="checkbox"/>	YES <input type="checkbox"/> NO <input type="checkbox"/>	gpm	

2. TREATMENT INFORMATION

A. Does Your Water System Disinfect the Water? YES NO (Go to 2.B)

Disinfectant	Location (Plant Name)	Disinfectant Used During an Emergency?	Type of Disinfectant (Liquid/Gas)	Volume Stored (gals or lbs)	Days of Storage (Emergency Demand)	Electricity Required to Feed Disinfectant?
Chlorine	WP 1	YES <input checked="" type="checkbox"/> NO <input type="checkbox"/>	Gas	4 - 450 lbs	30	YES <input checked="" type="checkbox"/> NO <input type="checkbox"/>
Ammonia	WP 1	YES <input checked="" type="checkbox"/> NO <input type="checkbox"/>	Liquid	4 - 300 lbs	30	YES <input checked="" type="checkbox"/> NO <input type="checkbox"/>
		YES <input type="checkbox"/> NO <input type="checkbox"/>				YES <input type="checkbox"/> NO <input type="checkbox"/>

B. Does Your Water System Provide Treatment Other Than Disinfection? YES NO (Go to 2.C)

Chemical	Location (Plant Name)	Chemical Used During an Emergency?	Type of Chemical (Liquid/Gas)	Volume Stored (gals or lbs)	Days of Storage (Emergency Demand)	Electricity Required to Feed Chemical
Phosphates	WP 1	YES <input type="checkbox"/> NO <input checked="" type="checkbox"/>	Liquid	100 lbs	30	YES <input checked="" type="checkbox"/> NO <input type="checkbox"/>
		YES <input type="checkbox"/> NO <input type="checkbox"/>				YES <input type="checkbox"/> NO <input type="checkbox"/>
		YES <input type="checkbox"/> NO <input type="checkbox"/>				YES <input type="checkbox"/> NO <input type="checkbox"/>

C. Does Your Water System Have Any Transfer Pump(s) In Your Treatment Plant(s)? (Do not include well or intake pumps) YES NO (Go to 3.A)

Pump	Location (Plant Name)	Pump Used During an Emergency?	Unit Preceding Pump	Unit Directly After Pump	Pump Capacity
		YES <input type="checkbox"/> NO <input type="checkbox"/>			gpm
		YES <input type="checkbox"/> NO <input type="checkbox"/>			gpm
		YES <input type="checkbox"/> NO <input type="checkbox"/>			gpm

3. DISTRIBUTION SYSTEM INFORMATION

A. Does Your Water System Have Distribution Pumps? YES NO (Go to 3.B)

Pump	Location (include pressure plane)	Pump Used During an Emergency?	Facility Preceding Pump	Facility Directly After Pump	Pump Capacity
Pump # 1	WP 1	YES <input checked="" type="checkbox"/> NO <input type="checkbox"/>	Ground Storage Tank # 1	Distribution System	450 gpm
Pump # 2	WP 1	YES <input checked="" type="checkbox"/> NO <input type="checkbox"/>	Ground Storage Tank # 1	Distribution System	450 gpm
Pump # 3	WP 1	YES <input type="checkbox"/> NO <input checked="" type="checkbox"/>	Ground Storage Tank # 1	Distribution System	300 gpm

B. Does Your Water System Have Any Finished Water Storage/Pressurization Tanks? YES NO (Go to 4.A)

Storage Tank Type (Elevated, Hydropneumatic, Ground or Stand)	Location (include pressure plane)	Tank Used During an Emergency?	Facility Preceding Tank	Facility Directly After Tank	Tank Capacity
Ground Storage Tank # 1	WP 1	YES <input checked="" type="checkbox"/> NO <input type="checkbox"/>	Wells and HP WSC	Distribution system	120,000 gal
Pressure Tank # 1	WP 1	YES <input checked="" type="checkbox"/> NO <input type="checkbox"/>	Ground Storage Tank # 1	Distribution system	20,000 gal

YES NO

gal

4. PRESSURE PLANES

A. Does Your Water System Have More Than One Pressure Plane?

YES NO (Go to 5)

Pressure Plane	TCEQ Source ID(s) or Provider PWS ID(s)	Plant Names(s) <i>(If Applicable)</i>	Pump Names(s) <i>(If Applicable)</i>

5. SYSTEM DEMAND

	Normal Operation	Emergency Operation
Average Daily Demand:	0.50 MGD	0.35 MGD
Maximum Daily Demand:	1.10 MGD	0.75 MGD
System Capacity:	1.58 MGD	1.15 MGD

6. SYSTEM SIZE

A. Does Your Water System Sell/Provide Water To Other Water Systems?

YES NO (Go to 6.B)

Receiver/Buyer Name	PWS ID <i>(if applicable)</i>	Normally Open Or Normally Closed Interconnect?	Will You Provide 35 psi Throughout the Receiver's Distribution System During an Emergency?	Number of Connections in the Receiver's Water System	Population of the Receiver's Water System
City of Smalls	1236505	Open	YES <input checked="" type="checkbox"/> NO <input type="checkbox"/>	150	450
			YES <input type="checkbox"/> NO <input type="checkbox"/>		
			YES <input type="checkbox"/> NO <input type="checkbox"/>		

B. Number of Connections And Population In Each Pressure Plane in Your Water System? (Please include any connection from other water systems you may serve in the table in 6.A)

Pressure Plane <i>(if applicable)</i>	Number of Connections	Population
1	500 (350 Good Neighbor WSC, 150 City of Smalls)	1500 (1050 Good Neighbor WSC, 450 City of Smalls)

7. POWER PROVIDER

Electric Utility or Retail Electrical Provider	Reliant Energy
--	----------------

8. OTHER PERTINENT SYSTEM INFORMATION

Other information about the system that could be useful during an emergency:

N/A

Option 1 & 1 Example

Section III – Alternate Power Options

The following is a list that will assist in determining which option (or options) should be selected for your water system. Provide the required information on the following applicable pages. You must select at least one option.

OPTION 1: PERMANENTLY INSTALLED AUXILIARY GENERATOR(S)
COMPLETE OPTION 1 – Sections A through D

OPTION 2: YOUR SYSTEM WILL RELY ON YOUR PROVIDER DURING AN EXTENDED POWER OUTAGE

The purchase water system will rely on a provider for water to a tank OR rely on a provider for 35 psi throughout the receiving system's distribution system. Choose only if you will rely on purchased water *during an extended power outage*.
COMPLETE OPTION 2 – Sections A and B

OPTION 3a: CONTRIBUTING MEMBER OF TXWARN
Contribution member means that you have identified and will make available one or more resources to TXWARN.
COMPLETE OPTION 3a – Sections A through C

OPTION 3b: NEGOTIATION OF LEASING AND CONTRACTING AGREEMENTS
You system has obtained a leasing or contract agreement for emergency power equipment and fuel. The agreements must provide for coordination with the division of emergency management in the Governor's Office.
COMPLETE OPTION 3b – Sections A through C

OPTION 4: USE OF PORTABLE GENERATOR(S) CAPABLE OF SERVING MULTIPLE FACILITIES EQUIPPED WITH QUICK-CONNECT SYSTEMS
A portable generator capable of being moved to serve multiple facilities where both the portable generator and facilities are equipped with compatible quick-connect systems.
COMPLETE OPTION 4 – Sections A through E

OPTION 5: USE OF ON-SITE ELECTRICAL GENERATION OR DISTRIBUTED GENERATION FACILITIES
On-site electrical generation or distributed generation facilities. On-site electrical generation means that each facility generates, or can generate, its own power rather than being powered by a commercial electric power grid. Distributed Generation Facilities are small-scale power producing facilities located near the electrical load, which may feed into a common grid. An example is electricity generated by solar power.
COMPLETE OPTION 5 – Sections A through E

OPTION 6: HARDENING THE ELECTRIC TRANSMISSION AND DISTRIBUTION SYSTEM SERVING THE WATER SYSTEM
One alternative is to relocate electric transmission lines for the system from overhead to underground and protect them from flooding. Another alternative is to replace overhead transmission lines, poles and rated appurtenances with ones that can withstand historical hurricane-force wind velocities, and trim or remove any trees or branches next to and above the overhead transmission lines.
COMPLETE OPTION 6 – Sections A and B

OPTION 7: USE AND MAINTENANCE OF DIRECT ENGINE OR RIGHT ANGLE DRIVES
Direct engine or right angle drive. This option is only available to existing facilities
COMPLETE OPTION 7 – Sections A through D

OPTION 8: ANY OTHER ALTERNATIVE DETERMINED BY THE COMMISSION TO BE ACCEPTABLE
COMPLETE OPTION 8 – Sections A and B

OPTION 1: PERMANENTLY INSTALLED AUXILIARY GENERATOR(S)

A. Generator Specifications.

Please list all the generators, all of the items to be powered, and the power needs for each item.

Generator Brand & Model	Max Power (KW)	Phase	Fuel Type	Automatic Switch Gear?	Facility Staffed 24 hours a day 7 days a week?	List all Facilities and Treatment Units That Will Be Powered During an Emergency	Power Requirements for Each Facility and Treatment Unit Powered
Whisperwatt	250	1 <input type="checkbox"/>	Diesel	YES <input checked="" type="checkbox"/>	YES <input type="checkbox"/>	Well pump 1	100 kW
		2 <input type="checkbox"/>		NO <input type="checkbox"/>	NO <input checked="" type="checkbox"/>	Well pump 2	kW
		3 <input checked="" type="checkbox"/>				Well pump 3	kW
						Booster pump 1	kW
						Booster pump 2	kW
						Booster pump 3	kW
						Disinfection Equipment	50 kW
						Treatment Equipment	kW
						Compressor(s)	50 kW
						kW	
Whisperwatt	300	1 <input type="checkbox"/>	Diesel	YES <input checked="" type="checkbox"/>	YES <input type="checkbox"/>	Booster Pump # 1	100 kW
		2 <input type="checkbox"/>		NO <input type="checkbox"/>	NO <input checked="" type="checkbox"/>	Booster Pump # 2	100 kW
		3 <input checked="" type="checkbox"/>					kW
						kW	
		1 <input type="checkbox"/>		YES <input type="checkbox"/>	YES <input type="checkbox"/>		kW
		2 <input type="checkbox"/>		NO <input type="checkbox"/>	NO <input type="checkbox"/>		kW
		3 <input type="checkbox"/>					kW

B. Fuel Location

Physical Location of Fuel Supply (GPS or "911" address): 12345 Around the Bend Drive, Rosenberg, TX

C. Fuel Re-supply

How much fuel is stored on site? 500 gallons

How much fuel does the generator use per hour? (Attachment C may assist in determining that amount) 250 kW generator - 4 gals/hr, 300 kW generator - 5 gals/hr

D. Electric Schematic

Provide an electrical schematic of your water system's emergency power facilities and those water facilities (treatment, supply, pressure maintenance, etc.) powered by each. Please provide a one-line diagram if available.

OPTION 2: YOUR SYSTEM WILL RELY ON YOUR PROVIDER DURING AN EXTENDED POWER OUTAGE (Choose only if you will rely on purchased water *during an extended power outage.*)

Provider Name	PWS ID	PRESSURE PLANE	Will you rely on this provider for water to a tank during an emergency?	Will you rely on this provider for pressure at YOUR customer's connections during an emergency?
			YES <input type="checkbox"/> NO <input type="checkbox"/>	YES <input type="checkbox"/> NO <input type="checkbox"/>
			YES <input type="checkbox"/> NO <input type="checkbox"/>	YES <input type="checkbox"/> NO <input type="checkbox"/>
			YES <input type="checkbox"/> NO <input type="checkbox"/>	YES <input type="checkbox"/> NO <input type="checkbox"/>

A. Is your water system solely relying on a provider(s) for emergency operations? (In other words, the provider's water flows directly into your distribution system, and not into a tank, and you have no tanks or pumps)

YES

NO (Please fill out the pages for the alternative power option that will power the equipment)

i. Please provide one or more of the following:

A copy of the contract(s) with your provider(s) that **includes language guaranteeing 35 psi** throughout your distribution system or specific pressure plane. Please highlight the section in the contract guaranteeing pressure.

A letter from the provider(s) **including language guaranteeing 35 psi** throughout your distribution system or specific pressure plane.

Page(s) from the provider's EPP reflecting the connection count for your system (or pressure plane) in the provider's connection count.

An engineering study (hydraulic analysis) sealed by a Texas Licensed Professional Engineer demonstrating that the provider is capable of providing your entire distribution system with water services at a minimum of 35 psi.

ii. Does your water system operate any equipment such as booster disinfection that will need power during an emergency?

YES (Please fill out the pages for the alternative power option that will power the equipment)

NO

B. Does your water system re-pressurize the water received from the provider? (Does the water from the provider flow into a tank which is then pumped out into the distribution system by your own pumps)

YES (Please fill out the pages for the alternative power option that will power the equipment)

NO

Option 3a: CONTRIBUTING MEMBER OF TXWARN (Member that has identified and will make available one or more resources to the TXWARN system.)

A. Please provide ALL of the following items

- A copy of the TXWARN membership profile page.
- A copy of the mutual aid agreement with TXWARN
- A copy of the resource page listing resources provided to TXWARN.

B. Generator Specifications

Please list the items hoped to be obtained from TXWARN. List all of the items to be powered, and the power needs for each item.

Generator	Power (KW)	Quick Connect Installed?	Phase	List all Facilities and Treatment Units That Will Be Powered During an Emergency	Power Requirements of Each Facility and Treatment Unit Powered
		YES <input type="checkbox"/>	1 <input type="checkbox"/>	Well pump 1 <input type="checkbox"/>	kW
		NO <input type="checkbox"/>	2 <input type="checkbox"/>	Well pump 2 <input type="checkbox"/>	kW
			3 <input type="checkbox"/>	Well pump 3 <input type="checkbox"/>	kW
			Booster pump 1 <input type="checkbox"/>	kW	
		Date to be installed	Booster pump 2 <input type="checkbox"/>	kW	
			Booster pump 3 <input type="checkbox"/>	kW	
			Disinfection Equipment <input type="checkbox"/>	kW	
			Treatment Equipment <input type="checkbox"/>	kW	
		Compressor(s) <input type="checkbox"/>	kW		
<input type="checkbox"/>	kW				
		YES <input type="checkbox"/>	1 <input type="checkbox"/>		kW
		NO <input type="checkbox"/>	2 <input type="checkbox"/>		kW
			3 <input type="checkbox"/>		kW
					kW
		Date to be installed			kW
					kW
					kW
					kW
					kW
			kW		

C. Electric Schematic

Provide an electrical schematic of your water system's emergency power facilities and those water facilities (treatment, supply, pressure maintenance, etc.) powered by each. Please provide a one-line diagram if available.

Option 3b: NEGOTIATION OF LEASING AND CONTRACTING AGREEMENTS (Please note that the agreements must provide for coordination with the division of emergency management in the Governor’s Office)

A. Provide a signed copy of the agreement

B. Generator Specifications

Please list the generator to be leased, all of the items to be powered, and the power needs for each item.

Generator Brand & Model	Max Power (KW)	Phase	Quick Connect Installed?	Fuel Type	List all Facilities and Treatment Units That Will Be Powered During an Emergency	Power Requirements for Each Facility and Treatment Unit Powered
		1 <input type="checkbox"/>	YES <input type="checkbox"/>		Well pump 1 <input type="checkbox"/>	kW
		2 <input type="checkbox"/>	NO <input type="checkbox"/>		Well pump 2 <input type="checkbox"/>	kW
		3 <input type="checkbox"/>	Date to be installed		Well pump 3 <input type="checkbox"/>	kW
					Booster pump 1 <input type="checkbox"/>	kW
					Booster pump 2 <input type="checkbox"/>	kW
					Booster pump 3 <input type="checkbox"/>	kW
					Disinfection Equipment <input type="checkbox"/>	kW
					Treatment Equipment <input type="checkbox"/>	kW
					Compressor(s) <input type="checkbox"/>	kW
						<input type="checkbox"/>
		1 <input type="checkbox"/>	YES <input type="checkbox"/>			kW
		2 <input type="checkbox"/>	NO <input type="checkbox"/>			kW
		3 <input type="checkbox"/>	Date to be installed			kW
						kW
		1 <input type="checkbox"/>	YES <input type="checkbox"/>			kW
		2 <input type="checkbox"/>	NO <input type="checkbox"/>			kW
		3 <input type="checkbox"/>	Date to be installed			kW
						kW

C. Fuel Location

Physical Location of Fuel Supply (GPS or “911” address):

D. Fuel Re-supply

How much fuel is stored on site?

How much fuel does the generator use per hour? (Attachment C may assist in determining that amount.)

E. Electric Schematic

Provide an electrical schematic of your water system’s emergency power facilities and those water facilities (treatment, supply, pressure maintenance, etc.) powered by each. Please provide a one-line diagram if available.

OPTION 4: USE OF PORTABLE GENERATOR(S) CAPABLE OF SERVING MULTIPLE FACILITIES EQUIPPED WITH QUICK-CONNECT SYSTEMS

A. Please list the storage location of the portable generator. If sharing the generator, the name of the water system you are sharing with and their location.

Generator Brand & Model	Generator Storage Location	Distance From Your Water System	Other Water Systems Sharing This Generator (PWS Name and ID if applicable)	Distance Between Your Water System And Those Sharing The Generator

B. Generator Specifications

Please list all the portable generators, all of the items to be powered, and the power needs for each item.

Generator Brand & Model	Max Power (KW)	Phase	Fuel Type	Quick Connect Installed?	List all Facilities and Treatment Units That Will Be Powered During an Emergency	Power Requirements for Each Facility and Treatment Unit Powered
		1 <input type="checkbox"/>		YES <input type="checkbox"/>	Well pump 1 <input type="checkbox"/>	kW
		2 <input type="checkbox"/>		NO <input type="checkbox"/>	Well pump 2 <input type="checkbox"/>	kW
		3 <input type="checkbox"/>		Date to be installed	Well pump 3 <input type="checkbox"/>	kW
				Booster pump 1 <input type="checkbox"/>	kW	
				Booster pump 2 <input type="checkbox"/>	kW	
				Booster pump 3 <input type="checkbox"/>	kW	
				Disinfection Equipment <input type="checkbox"/>	kW	
				Treatment Equipment <input type="checkbox"/>	kW	
				Compressor(s) <input type="checkbox"/>	kW	
		1 <input type="checkbox"/>		YES <input type="checkbox"/>		kW
		2 <input type="checkbox"/>		NO <input type="checkbox"/>		kW
		3 <input type="checkbox"/>		Date to be installed		kW
						kW

C. Fuel Location (if applicable)

Physical Location of Fuel Supply (GPS or "911" address):

D. Fuel Re-supply

How much fuel is stored on site?

How much fuel does the generator use per hour? (Attachment C may assist in determining that amount.)

E. Electric Schematic

Provide an electrical schematic of your water system's emergency power facilities and those water facilities (treatment, supply, pressure maintenance, etc.) powered by each. Please provide a one-line diagram if available.

OPTION 5: USE OF ON-SITE ELECTRICAL GENERATION OR DISTRIBUTED GENERATION FACILITIES

On-site Electrical Generation means that each facility generates its own power rather than being powered by a commercial electric power grid. Distributed Generation Facilities are small-scale power producing facilities located near the electrical load which may feed into a common grid.

A. On-Site Electrical Generation or Distributed Generation Specifications

Describe On-Site Electrical Generation or Distributed Generation Facility:

B. On-site Electrical Generation or Distributed Generation Specifications

Please list all of the facilities, all of the items to be powered and the power needs for each item.

Type of On-site Electrical Generation Facilities.	Max Power (KW)	Fuel Type (if applicable)	List all Facilities and Treatment Units That Will Be Powered During an Emergency	Power Requirements of Each Facility and Treatment Unit Powered
			Well pump 1 <input type="checkbox"/>	kW
			Well pump 2 <input type="checkbox"/>	kW
			Well pump 3 <input type="checkbox"/>	kW
			Booster pump 1 <input type="checkbox"/>	kW
			Booster pump 2 <input type="checkbox"/>	kW
			Booster pump 3 <input type="checkbox"/>	kW
			Disinfection Equipment <input type="checkbox"/>	kW
			Treatment Equipment <input type="checkbox"/>	kW
			Compressor(s) <input type="checkbox"/>	kW
			<input type="checkbox"/>	kW
			<input type="checkbox"/>	kW
			<input type="checkbox"/>	kW
			<input type="checkbox"/>	kW
			<input type="checkbox"/>	kW

C. Fuel Location

Physical Location of Fuel Supply (GPS or "911" address):

D. Fuel Re-supply

How much fuel is stored on site?

How much fuel does the generator use per hour? (Attachment C may assist in determining that amount)

E. Electric Schematic

Provide an electrical schematic of your water system's emergency power facilities and those water facilities (treatment, supply, pressure maintenance, etc.) powered by each. Please provide a one-line diagram if available.

OPTION 6: HARDENING THE ELECTRIC TRANSMISSION AND DISTRIBUTION SYSTEM SERVING THE WATER SYSTEM

One alternative is to relocate electric transmission lines for the system from overhead to underground and protect them from flooding. Another alternative is to replace overhead transmission lines, poles and rated appurtenances with ones that can withstand historical hurricane-force wind velocities, and trim or remove any trees or branches next to and above the overhead transmission lines.

A. Hardening Description

Describe the hardening activities:

B. Diagram

Include a diagram showing the electrical system, including the power transmission system (from the power generation facility to the customer's power meter) and distribution system (the water system's electrical wiring after the customer's power meter) feeding each water facility and the preventive measures taken for each.

Option 1 & 7 Example

OPTION 7: USE AND MAINTENANCE OF DIRECT ENGINE OR RIGHT ANGLE DRIVES (EXISTING FACILITIES ONLY)

A. Direct Engine or Right Angle Drive Specification

Please list all the drives, all of the items to be powered, and the power needs for each item.

Brand Or Model	Max Power (HP, kW)	RPM	Fuel Type	List all Facilities and Treatment Units Powered	Power Requirements of Each Facility and Treatment Unit Powered (circle appropriate unit)
Whisperwatt	200 kW	1800	Diesel	Well pump 1 <input type="checkbox"/>	kW or HP
				Well pump 2 <input checked="" type="checkbox"/>	100 kW or HP
				Well pump 3 <input type="checkbox"/>	kW or HP
				Booster pump 1 <input type="checkbox"/>	kW or HP
				Booster pump 2 <input type="checkbox"/>	kW or HP
				Booster pump 3 <input type="checkbox"/>	kW or HP
				Disinfection Equipment <input type="checkbox"/>	kW or HP
				Treatment Equipment <input type="checkbox"/>	kW or HP
				Compressor(s) <input type="checkbox"/>	kW or HP
				<input type="checkbox"/>	kW or HP
					kW or HP
					kW or HP
					kW or HP
					kW or HP
					kW or HP
					kW or HP
					kW or HP
					kW or HP
					kW or HP

B. Fuel Location (if applicable)

Physical Location of Fuel Supply (GPS or "911" address):

C. Fuel Re-supply

How much fuel is stored on site?

How much fuel does the generator use per hour? (Attachment C may assist in determining that amount.)

D. Electric Schematic

Provide an electrical schematic of your water system's emergency power facilities and those water facilities (treatment, supply, pressure maintenance, etc.) powered by each. Please provide a one-line diagram if available.

OPTION 8: ANY OTHER ALTERNATIVE DETERMINED BY THE COMMISSION TO BE ACCEPTABLE

The following methods are NOT acceptable alternatives

- Evacuation
 - The EPP must show how you will provide water during an extended power outage caused by a natural disaster, not during the disaster when it is unsafe. The rule specifically states the water is to be provided after it is safe and practicable. The people who are evacuated may return when it is safe to do so after the disaster has passed, but before power is returned to your water system. In some cases after Hurricane Ike power was not restored for several weeks. You must be able to provide water after the disaster, but before normal power is restored.
- Providing bottled water
 - The EPP must show how you will provide water at 35 psi at each of your customer's connections. Bottled water cannot provide pressure at the connections.
- Relying on your provider.
 - Option 2 must be completed for this alternative.

A. Alternative Description

Describe the alternative and how it will provide 35 psi throughout your distribution system:

B. Electric Schematic
Include a diagram showing the electrical system, including the power transmission system (from the power generation facility to the customer's power meter) and distribution system (the water system's electrical wiring after the customer's power meter) feeding each water facility and the preventive measures taken for each.

Section IV – Emergency Communications

Emergency Communications are an essential part of an emergency response event. Knowing who to notify before an emergency event occurs is the best way to ensure that you, your system, and your customers receive needed emergency assistance. Many numbers have been provided in order to assist you with completing this portion of the plan. Please feel free to make copies of the pages in Section IV to post at your facility and/or to train your employees.

2. Local Contact Notification List

Identify those entities that should be notified in the event of an extended power outage requiring emergency operations. These are people who you provide water to that you may need to contact during an emergency.

Organization	Contact Name	Title	Phone Numbers (include area code)			E-Mail
			Day	Evening	Cellular/Pager	
Government Officials	Mayor McDonald	Mayor	555-555-5555	555-555-5555	555-555-5555	GoodNeighborMayor@aol.com
	Joe Wimbley	Board President	555-555-5555	555-555-5555	555-555-5555	JoWim@aol.com
Hospitals served by the Affected Utility	Knapp Medical	House Supervisor	555-555-5555	555-555-5555	555-555-5555	HouseSupervisor@KnappMed.com
Pharmacies	CVS	Store Manager	555-555-5555	555-555-5555	555-555-5555	
Priority Water Users (Those that are critically dependent upon water including schools, nursing homes, dialysis centers, institutions, individuals, businesses, interconnected water systems, etc.)	Fresenius Dialysis Center	House Supervisor	555-555-5555	555-555-5555	555-555-5555	FDCHouseSuper@FreseniusDC.com
Others						

3. Chemical Supplier Information

Identify your Chemical Suppliers. You may need to contact them for more chemicals during an emergency

Chemical	Supplier	Contact Name	Phone Numbers (include area code)			E-Mail
			Day	Evening	Cellular/Pager	
Chlorine gas	SCI	Jack Black	555-555-5555	555-555-5555	555-555-5555	JBlack@SCI.com
Ammonia liquid	SCI	Jack Black	555-555-5555	555-555-5555	555-555-5555	JBlack@SCI.com

4. Fuel Supplier Contact Information (if applicable)

Identify your Fuel Suppliers. You may need to contact them for fuel during an emergency

Fuel Type	Supplier	Contact Name	Phone Numbers (include area code)			E-Mail
			Day	Evening	Cellular/Pager	
Diesel	K3 - BMI	Randy Rogers	555-555-5555	555-555-5555	555-555-5555	RRogers@K3BMI.com

5. Utilities Contact Information

Identify your Utilities Contacts. You may need to contact them during an emergency

Organization	Contact Name	Title	Phone Numbers (include area code)			E-Mail
			Day	Evening	Cellular/Pager	
Electric Utility Company	Reliant		555-555-5555	555-555-5555	555-555-5555	reliantenergy.com
Gas Utility Company	Centerpoint		555-555-5555	555-555-5555	555-555-5555	Centerpointenergy.com
Sewer Utility Company	MOC - Utility		555-555-5555	555-555-5555	555-555-5555	
Telephone Utility Company	AT & T		555-555-5555	555-555-5555	555-555-5555	www.repair.att.com
Wholesale Water Provider	City of Battleground		555-555-5555	555-555-5555	555-555-5555	
Wholesale Water Provider						
Other						

6. Bulk Water Suppliers

Identify any bulk or bottled water suppliers that you might utilize in an emergency

Organization	Contact Name	Title	Phone Numbers (include area code)			E-Mail
			Day	Evening	Cellular/Pager	
Bulk Water Haulers						
Bottle Water Sources	Jimmy Carrolton	Ozarka Route Supervisor	555-555-5555	555-555-5555	555-555-5555	JCarrol@ozarka.com

7. Media Notification List

Identify the media organizations that you might need to contact to decimate information to your customers. Also identify who is your media spokesperson

Organization	Contact Name	Title	Day	Evening	Cellular/Pager	E-Mail
Designated Water System Spokesperson	Jon Knight	Attorney	555-555-5555	555-555-5555	555-555-5555	jknight@knightvision.com
Newspaper - Local	Rosenberg Daily		555-555-5555	555-555-5555	555-555-5555	
Newspaper – Regional State						
Radio	KFRU - AM 710		555-555-5555	555-555-5555	555-555-5555	
	KHMU - FM 96.7		555-555-5555	555-555-5555	555-555-5555	
Television	KVEO		555-555-5555	555-555-5555	555-555-5555	
	KGBT		555-555-5555	555-555-5555	555-555-5555	
Other						

Section V - Emergency Water Use Restrictions

1. EXPLANATION AND AUTHORITY

During periods of drought, a major leak, a system failure, or excessive consumption beyond the capacity of the system, etc., the Good Neighbor WSC (e.g. PWS name, owner name, owner representative, Operator, etc.) has the capability to conserve and restrict water use based upon the local water system regulations found in Drought Contingency Plan (Drought contingency plan, rental agreement, city ordinance, etc.). During times of drought or other problems that limit the availability of water, public notice of water use restrictions will be issued by: Good Neighbor WSC_(e.g. PWS name, owner name, owner representative, Operator, etc).

2. WATER RESTRICTION STAGES

Following are levels or stages of restrictions that will be applied, the conditions that generally will trigger them, and the types of restrictions that will be applied. The conditions that trigger various restriction stages could be based upon critical source water levels and other conditions such as imminent loss of water or pressure.

Restriction Stage	Stage Trigger(s)	Restrictions
I	Wells run 14 hours out of 24 hours	Customers requested to limit water usage voluntarily.
II	Daily well pumpage exceeds 1.5 times the daily average for three consecutive days	Limit # of watering days to 2 times per week between Midnight and 10 am or 8 pm to midnight on specified days.
		Even numbers Wednesdays and Saturdays.
		Odd numbers Thursdays and Sundays.
	Well pumpage exceeds 2 times the daily average for three consecutive days	Limit # of watering days to once per week within the hours specified above.
		Even numbers on Wednesdays.
		Odd numbers on Thursdays.
III	Daily well pumpage exceeds 2.5 times the daily average for three consecutive days	No outside watering usage for any reason
