

Corrosion Control Treatment Installation Completion Certification

PWS ID#: _____

PWS Name: _____

Plan Review Team Log Review Number P- _____

Plan Review Team Letter Approval Date _____

Describe Corrosion Control Treatment (CCT) installed: _____

Construction Completion Date: _____

Date CCT was placed into service*: _____

*Placed into service means that the CCT is treating the water being delivered to consumers.

I hereby certify that the corrosion control treatment plant has been built and placed into service and the corrosion control treatment is currently being used. The CCT was completed in accordance with all approved plans, specifications, and other supporting information. I understand that following installation of CCT, the PWS is required to conduct follow-up tap water lead and copper sampling for two consecutive six months. The first six month period will begin in the next viable monitoring period from when the CCT was placed into service. The PWS will also be required to sample water quality parameters at entry points and locations in the distribution system to ensure the treatment is working to reduce the corrosivity of the water and to recommend optimal water quality parameters (OWQPs).
