

Texas Commission on Environmental Quality (TCEQ)
Public Water System Notification of Treatment Start Date Form

PWS ID#: TX PWS Name: _____

*Public water systems (PWSs) making changes to long-term treatment will be scheduled to begin one year of lead and copper tap monitoring and water quality parameter monitoring based on the date specified in the TCEQ plan review approval letter, and in accordance with 30 TAC §290.117(d)(2)(E). This date will either be January 1 or July 1. **A PWS that anticipates that they will begin using the treatment either after the date in the plan review approval letter OR 6 months or more before the date in the plan review approval letter must submit this form to the TCEQ notifying the Lead and Copper Program of the date the PWS anticipates it will begin using the treatment.** Notification must be received at least 30 days before the date listed in the plan review approval letter. Failure to notify the Lead and Copper Program of any long-term treatment start date changes may result in monitoring and reporting violations*
