\* A facility that simultaneously combusts the fuels specified in §60.44b(c) has an option to use the emission limitations of §60.44b(a) or (b). To simplify the flowchart only the emission limitation of §60.44b(b) is used because when fuels are simultaneously combusted the emission limits of paragraph (a) are used to calculate the limit in paragraph (b). Also the emission limitations will be the same for either §60.44b(a) or §60.44b(b).
