

40 CFR Part 60, Subpart RRR - Requirements Reference Tables

Subpart RRR Standards

- [§60.700\(c\)\(2\)](#) exemption on some requirements for facilities with total resource effectiveness (TRE) greater than 8.0
- [§60.700\(c\)\(3\)](#) exemption on all requirements except for some recordkeeping and recording for facilities with total production capacity less than 1Gg (1100 TPY)
- [§60.700\(c\)\(4\)](#) exemption on all requirements except for some test method, procedures, recordkeeping and recording for facilities with a vent stream flow rate less than 0.011 scm/min
- [§60.700\(c\)\(5\)](#) exemption on all requirements except for §60.705(r) with vent stream routed to distillation unit subject to NSPS NNN
- [§60.700\(c\)\(8\)](#) exemption on all requirements except for some recordkeeping and recording for facilities with TOC less than 300 ppmv (Method 18) or 150 ppmv (Method 25A)
- [§60.702\(a\)](#) reduce TOC by 98% by weight or to TOC concentration of 20 ppmv or less
- [§60.702\(b\)](#) combust emissions using a flare meeting the requirements of 60.18
- [§60.702\(c\)](#) maintain TRE index value greater than 1.0 w/o a VOC emission control device

These relationship entry screens and flowcharts are for use by sources subject to the Texas Federal Operating Permits Program only and are subject to revision.
