

## 40 CFR Part 62, Subpart OOO - Requirements Reference Tables

### Subpart OOO Standards

- [§62.16711\(c\)](#) Exemption for a Municipal Solid Waste landfill that has a design capacity less than 2.5 million megagrams by mass or 2.5 million m<sup>3</sup> by volume that is located in a state, locality, or portion of Indian country that submitted a negative declaration letter.
- [§62.16714\(c\)\(1\)](#) Standards for a Municipal Solid Waste landfill that has a design capacity equal to or greater than 2.5 million megagrams by mass and 2.5 million cubic meters by volume with a calculated NMOC emission rate that is greater than or equal to 34 megagrams per year that is routing the collected gas to a non-enclosed flare.
- [§62.16714\(c\)\(2\)1](#) Standards for a Municipal Solid Waste landfill that has a design capacity equal to or greater than 2.5 million megagrams by mass and 2.5 million cubic meters by volume with a calculated NMOC emission rate that is greater than or equal to 34 megagrams per year that is routing the collected gas to a control system designed and operated to reduce NMOC by 98 weight-percent.
- [§62.16714\(c\)\(2\)2](#) Standards for a Municipal Solid Waste landfill that has a design capacity equal to or greater than 2.5 million megagrams by mass and 2.5 million cubic meters by volume with a calculated NMOC emission rate that is greater than or equal to 34 megagrams per year that is routing the collected gas to an enclosed combustion device to reduce the outlet NMOC concentration to less than 20 ppmv.
- [§62.16714\(c\)\(3\)](#) Standards for a Municipal Solid Waste landfill that has a design capacity equal to or greater than 2.5 million megagrams by mass and 2.5 million cubic meters by volume with a calculated NMOC emission rate that is greater than or equal to 34 megagrams per year that is routing the collected gas to a treatment system.
- [§62.16714\(e\)](#) Standards for a Municipal Solid Waste landfill that has a design capacity equal to or greater than 2.5 million megagrams by mass and 2.5 million cubic meters by volume that does not have a collection and control system installed.
- [§62.16724\(a\)\(2\)](#) Standards for a Municipal Solid Waste landfill that has a design capacity less than 2.5 million megagrams by mass or 2.5 million m<sup>3</sup> by volume.
