## Air Rule Interpretation Summary Form

Code Number	60AA.001
-------------	----------

Typographical error in 60.274(c), references 60.247(b)(1) and (b)(2) which do not exist.	July 21, 2000
--	---------------

Rule/Regulation Citation(s):	Federal Rule: <u> X </u> State Regulation: <u>    </u>
40 C.F.R. Part 60 Subpart AA § 60.274(c)	Description: Standards of Performance for Steel Plants: Electric Arc Furnaces Constructed After October 21, 1974, and On or Before August 17, 1983
<b>Interpretation Request:</b>	
Title 40 Code of Federal Regulations (C.F.R.) § 60.274(c) states: “When the owner or operator of an EAF [electric arc furnaces] is required to demonstrate compliance with the standards of Sec. 60.272(a)(3) . . . the volumetric flow rate at the control device inlet and all damper positions shall be . . . for the purpose of capturing emissions from the EAF subject to paragraph (b)(1) or (b)(2) of this section.” However, paragraphs (b)(1) and (b)(2) of 40 C.F.R. § 60.274 do not exist. What should be the correct reference?	
<b>Determination:</b>	
The reference to paragraphs (b)(1) and (b)(2) in 40 C.F.R. § 60.274(c) is incorrect. The correct reference should be to 40 C.F.R. § 60.274(b). Therefore, 40 C.F.R. § 60.274(c) should read as follows:	
<p>When the owner or operator of an EAF is required to demonstrate compliance with the standards under Sec. 60.272(a)(3) and at any other time the Administrator may require that (under section 114 of the Act, as amended) either: the control system fan motor amperes and all damper positions; the volumetric flow rate through each separately ducted hood; or the volumetric flow rate at the control device inlet and all damper positions shall be determined during all periods in which a hood is operated for the purpose of capturing emissions from the EAF subject to paragraph (b) of this section. . . .</p>
