Interpretation Request:

Please clarify the applicability of Title 40 Code of Federal Regulations (C.F.R.) Part 60, Subpart UU pertaining to emissions discharged from a saturator during the production of fiberglass shingles at an asphalt roofing plant. Is a fiberglass substrate considered “felt” as used in the definition of saturator in 40 C.F.R. § 60.471? Also, is a facility that is producing fiberglass shingles subject to 40 C.F.R. § 60.472(a)(1)(i) for the discharge of emissions from a saturator?

Determination:

A facility utilizing a saturator that is producing fiberglass shingles is subject to the requirements of 40 C.F.R. Part 60, Subpart UU. In addition, fiberglass substrate is considered “felt” as used in the definition of saturator in 40 C.F.R. § 60.471. A facility that is producing fiberglass shingles is subject to the particulate matter standards of 40 C.F.R. § 60.472(a)(1)(i) which relates to the discharge of emissions from a saturator.
