

40 CFR 60 Subpart UUU - Rule Interpretation Memos

- ! [Reconsideration - Is NSPS applicable to a facility that produces dry concrete mixes and construction sand products?](#) [October 6, 1999]

Last Modified: October 6, 1999

Rule Interpretation Summary Form

Rule/Regulation Citation(s):	Federal Rule: <u> X </u> State Regulation: <u> __ </u> Description:
40 C. F. R. Part 60, Subpart WWW § 60.758(c)(1)(ii)	Standards of Performance for Municipal Solid Waste Landfills
Interpretation Request:	
<p>Title 40 Code of Federal Regulations (C.F.R.) § 60.758(c)(1)(ii) references § 60.758(b)(3)(i) for a change in the location at which a vent stream is introduced into the flame zone of a boiler or process heater. This is a typographical error because § 60.758(b)(3)(i) does not exist. Is the correct citation § 60.758(b)(3), which describes the owner keeping up-to-date records of the location at which a gas stream is introduced into the boiler or process heater when seeking compliance with § 60.752(b)(2)(iii)(B)(1)?</p>	
Determination:	
<p>The reference in § 60.758(c)(1)(ii) should be to § 60.758(b)(3). Therefore, § 60.758(c)(1)(ii) should read as follows: “For boilers and process heaters, whenever there is a change in the location at which the vent stream is introduced into the flame zone as required under paragraph (b)(3) of this section.”</p>
