

## 40 CFR 63 Subpart YY - Rule Interpretation Memos

- ! [Typographical error contained in 63.1103 Table 2. Standard should be in units of kg/hr instead of kg/yr.](#) [September 5, 2003]

Last Modified: September 5, 2003

## Air Rule Interpretation Summary Form

Code Number	63YY.001
-------------	----------

Typographical error contained in 63.1103 Table 2. Standard should be in units of kg/hr instead of kg/yr.	September 5, 2003
--	-------------------

Rule/Regulation Citation(s):	Federal Rule: <u> X </u> State Regulation: <u>    </u>
40 CFR Part 63, Subpart YY § 63.1103	Description: National Emission Standards for Hazardous Air Pollutants for Source Categories: Generic Maximum Achievable Control Technology Standards
<b>Interpretation Request:</b>	
Title 40 Code of Federal Regulations (CFR) Part 63, Subpart YY contains a Table, specifically Table 2 - To 40 CFR § 63.1103(b)(3)(I), that appears to incorrectly specify the units of the standard. Title 40 CFR § 63.1103, Table 2 states that a halogenated process vent from continuous unit operations must reduce hydrogen halides and halogens by 99 weight-percent or to less than 0.45 kilograms per year, whichever, is less stringent. Is the appropriate emission limitation 0.45 kilograms per hour?	
<b>Determination:</b>	
The units (kilograms per year) of the standard, for a halogenated process vent from continuous unit operations, which are contained in Table 2 - To § 63.1103(b)(3)(I) are an error. The appropriate emission limitation is 0.45 kilograms per hour. Therefore, the language in 40 CFR § 63.1103, Table 2 should read as follows: “. . . reduces hydrogen halides and halogens by 99 weight-percent or to less than 0.45 kilograms per hour, whichever is less stringent.”
