

**Plain Language Summary for New Source Review (NSR) Renewal Certification
Application for Air New Source Review Permit Number 1486A**

The following summary is provided for this pending air permit application being reviewed by the Texas Commission on Environmental Quality as required by 30 Texas Administrative Code Chapter 39. The information provided in this summary may change during the technical review of the application and are not federal enforceable representations of the permit application.

Phillips 66 Company (CN604065912) has submitted an application for renewal of permit number 1486A. The Unit 3 Reactor Feed Preheater No. 1 (RN101619179) produces heat from the combustion of fuel gas at 8189 Old FM 524 Road, Sweeny, Brazoria County.

This renewal will authorize the continued operation of the heater to produce heat from the combustion of fuel gas that is used to warm the Unit 3 reactor feed to help the feed reach proper reaction temperatures. Phillips 66 Company has certified there will be no changes to the permit. The following permitted emission rates will remain the same.

Pollutant	Total Amount Allowed (tons per year)
NOX	135.30
CO	43.59
SO2	14.80
PM	3.94
VOC	2.85

The facilities being renewed will continue to be operated as represented when in use.
