

**Plain Language Summary for New Source Review (NSR) Initial
Application for Air New Source Review Permit**

The following summary is provided for this pending air permit application being reviewed by the Texas Commission on Environmental Quality as required by 30 Texas Administrative Code Chapter 39. The information provided in this summary may change during the technical review of the application and are not federal enforceable representations of the permit application.

Hoelscher Crushed Stone, LLC (CN605780923) has submitted an application for an initial permit. The Portable Rock Crushing Plant (multiple RN's) produces crushed limestone rocks at multiple locations across Glasscock, Reagan, Upton, and Martin counties.

This permit will authorize an existing portable crusher, as well as its associated emissions at the different sites. Since this equipment is portable and operates independently of the existing equipment, a separate portable permit is requested for the additional operations. Hoelscher Crushed Stone, LLC has listed in the application the pollutants and amounts that will be emitted for each facility. Below is the total amount for each pollutant that is proposed to be emitted each year for all the facilities.

Pollutant	Proposed Emissions (tons per year)
PM	10.32
PM ₁₀	4.81
PM _{2.5}	0.78
NO _x	3.99
CO	14.08
SO ₂	0.01
VOC	0.77
HAP	0.03

The new facilities will be controlled by water sprays, which will achieve a 70% reduction at all material inlets and outlets.
