

Plain Language Summary for New Source Review (NSR) Renewal and Amendment Application for Air New Source Review Permit Number 31241

The following summary is provided for this pending air permit application being reviewed by the Texas Commission on Environmental Quality as required by 30 Texas Administrative Code Chapter 39. The information provided in this summary may change during the technical review of the application and are not federal enforceable representations of the permit application.

The Albany Plant of EBAA Iron, Inc. (CN600129100) has submitted an application for renewal by certification of air permit number 31241. The Albany Plant (RN102518495) produces ductile iron castings at 6201 South Hwy 6, Albany, Shackelford County.

This renewal will authorize the continued operation of the foundry. The authorized quantities, character of emissions, control method, and control efficiency will not change. Albany Plant has listed in the application the pollutants and amounts that will be emitted for each facility. Below is the current amount allowed to be emitted each year from all foundry equipment operations.

Pollutant	Permitted Emissions (tons per year)
Total Particulate Matter (PM)	87.31
Particulate Matter less than 10 micrometers (PM10)	68.18
Particulate Matter less than 2.5 micrometers (PM2.5)	66.53
Volatile Organic Compounds (VOC)	83.28
Nitrogen Oxides (NOx)	3.19
Carbon Monoxide (CO)	36.27
Sulfur Dioxide (SO2)	1.15
Hazardous Air Pollutants (HAPs, included in PM and VOC)	16.77

The facilities being renewed are controlled by four (4) baghouses. There will be no new facilities generating air emissions or control equipment.
