New Source Review (NSR) Boiler Plate Special Conditions

This information is maintained by the Chemical NSR Section and is subject to change. Last update was made **August 2007**. These special conditions represent current NSR boiler plate guidelines and are provided for informational purposes only. The special conditions for any permit or amendment are subject to change through TCEQ case by case evaluation procedures [30 TAC 116.111(a)]. Please contact the appropriate Chemical NSR Section management if there are questions related to the boiler plate guidelines.

Glycol Dehydrator (A) all

- (A) All VOC vapors from the glycol dehydrator vents shall be directed to the glycol reboiler firebox or vent to *(identify control device, which must achieve at least 98% destruction efficiency)*.
- (a) [if Flares, see Flares](#)
- (a) [if Boilers, see Boilers](#)
