As part of the greenhouse gas transition process, TCEQ is assigning tracking numbers to EPA-issued GHG PSD permits. The tracking numbers conform to TCEQ's database requirements and preferred numbering convention for GHG PSD permits. This tracking number will become the permit number at the first TCEQ-issued permit action.

No action is required by permit holders of EPA-issued GHG PSD permits. The attached table shows the assigned tracking number, and will be publicly available on TCEQ's website www.tceq.texas.gov/goto/ghg.

However, if you would prefer to update the permit number at this time, you can request an alteration. (For clarity and efficiency, we are limiting the changes in these alterations to an update of the permit number.) If you request an alteration to update the permit number, and your EPA-issued GHG PSD permit is attached as an applicable requirement to your Title V permit, an administrative revision to your Title V permit would be needed to update the permit number.

TCEQ Tracking Numbers and Corresponding EPA-issued GHG PSD Numbers
