

Texas Commission on Environmental Quality

Edwards Aquifer Application Cover Page

Our Review of Your Application

The Edwards Aquifer Program staff conducts an administrative and technical review of all applications. The turnaround time for administrative review can be up to 30 days as outlined in 30 TAC 213.4(e). Generally administrative completeness is determined during the intake meeting or within a few days of receipt. The turnaround time for technical review of an administratively complete Edwards Aquifer application is 90 days as outlined in 30 TAC 213.4(e). Please know that the review and approval time is directly impacted by the quality and completeness of the initial application that is received. In order to conduct a timely review, it is imperative that the information provided in an Edwards Aquifer application include final plans, be accurate, complete, and in compliance with [30 TAC 213](#).

Administrative Review

1. [Edwards Aquifer applications](#) must be deemed administratively complete before a technical review can begin. To be considered administratively complete, the application must contain completed forms and attachments, provide the requested information, and meet all the site plan requirements. The submitted application and plan sheets should be final plans. Please submit one full-size set of plan sheets with the original application, and half-size sets with the additional copies.

To ensure that all applicable documents are included in the application, the program has developed tools to guide you and web pages to provide all forms, checklists, and guidance. Please visit the below website for assistance: <http://www.tceq.texas.gov/field/eapp>.

2. This Edwards Aquifer Application Cover Page form (certified by the applicant or agent) must be included in the application and brought to the administrative review meeting.
3. Administrative reviews are scheduled with program staff who will conduct the review. Applicants or their authorized agent should call the appropriate regional office, according to the county in which the project is located, to schedule a review. The average meeting time is one hour.
4. In the meeting, the application is examined for administrative completeness. Deficiencies will be noted by staff and emailed or faxed to the applicant and authorized agent at the end of the meeting, or shortly after. Administrative deficiencies will cause the application to be deemed incomplete and returned.

An appointment should be made to resubmit the application. The application is re-examined to ensure all deficiencies are resolved. The application will only be deemed administratively complete when all administrative deficiencies are addressed.

5. If an application is received by mail, courier service, or otherwise submitted without a review meeting, the administrative review will be conducted within 30 days. The applicant and agent will be contacted with the results of the administrative review. If the application is found to be administratively incomplete, it can be retrieved from the regional office or returned by regular mail. If returned by mail, the regional office may require arrangements for return shipping.
6. If the geologic assessment was completed before October 1, 2004 and the site contains “possibly sensitive” features, the assessment must be updated in accordance with the *Instructions to Geologists* (TCEQ-0585 Instructions).

Technical Review

1. When an application is deemed administratively complete, the technical review period begins. The regional office will distribute copies of the application to the identified affected city, county, and groundwater conservation district whose jurisdiction includes the subject site. These entities and the public have 30 days to provide comments on the application to the regional office. All comments received are reviewed by TCEQ.
2. A site assessment is usually conducted as part of the technical review, to evaluate the geologic assessment and observe existing site conditions. The site must be accessible to our staff. The site boundaries should be

clearly marked, features identified in the geologic assessment should be flagged, roadways marked and the alignment of the Sewage Collection System and manholes should be staked at the time the application is submitted. If the site is not marked the application may be returned.

3. We evaluate the application for technical completeness and contact the applicant and agent via Notice of Deficiency (NOD) to request additional information and identify technical deficiencies. There are two deficiency response periods available to the applicant. There are 14 days to resolve deficiencies noted in the first NOD. If a second NOD is issued, there is an additional 14 days to resolve deficiencies. If the response to the second notice is not received, is incomplete or inadequate, or provides new information that is incomplete or inadequate, the application must be withdrawn or will be denied. Please note that because the technical review is underway, whether the application is withdrawn or denied **the application fee will be forfeited**.
4. The program has 90 calendar days to complete the technical review of the application. If the application is technically adequate, such that it complies with the Edwards Aquifer rules, and is protective of the Edwards Aquifer during and after construction, an approval letter will be issued. Construction or other regulated activity may not begin until an approval is issued.

Mid-Review Modifications

It is important to have final site plans prior to beginning the permitting process with TCEQ to avoid delays.

Occasionally, circumstances arise where you may have significant design and/or site plan changes after your Edwards Aquifer application has been deemed administratively complete by TCEQ. This is considered a “Mid-Review Modification”. Mid-Review Modifications may require redistribution of an application that includes the proposed modifications for public comment.

If you are proposing a Mid-Review Modification, two options are available:

- If the technical review has begun your application can be denied/withdrawn, your fees will be forfeited, and the plan will have to be resubmitted.
- TCEQ can continue the technical review of the application as it was submitted, and a modification application can be submitted at a later time.

If the application is denied/withdrawn, the resubmitted application will be subject to the administrative and technical review processes and will be treated as a new application. The application will be redistributed to the affected jurisdictions.

Please contact the regional office if you have questions. If your project is located in Williamson, Travis, or Hays County, contact TCEQ’s Austin Regional Office at 512-339-2929. If your project is in Comal, Bexar, Medina, Uvalde, or Kinney County, contact TCEQ’s San Antonio Regional Office at 210-490-3096

Please fill out all required fields below and submit with your application.

Application Distribution

Instructions: Use the table below to determine the number of applications required. One original and one copy of the application, plus additional copies (as needed) for each affected incorporated city, county, and groundwater conservation district are required. Linear projects or large projects, which cross into multiple jurisdictions, can require additional copies. Refer to the “Texas Groundwater Conservation Districts within the EAPP Boundaries” map found at:

http://www.tceq.texas.gov/assets/public/compliance/field_ops/eapp/EAPP%20GWCD%20map.pdf

For more detailed boundaries, please contact the conservation district directly.

Contributing Zone Exception Request Form

Texas Commission on Environmental Quality

for Regulated Activities on the Contributing Zone to the Edwards Aquifer and Relating to 30 TAC §213.24(1), Effective June 1, 1999

To ensure that the application is administratively complete, confirm that all fields in the form are complete, verify that all requested information is provided, consistently reference the same site and contact person in all forms in the application, and ensure forms are signed by the appropriate party.

Note: Including all the information requested in the form and attachments contributes to more streamlined technical reviews.

Signature

To the best of my knowledge, the responses to this form accurately reflect all information requested concerning the proposed regulated activities and methods to protect the Edwards Aquifer. This **Contributing Zone Exception Request Form** is hereby submitted for TCEQ review and executive director approval. The request was prepared by:

Print Name of Customer/Agent: Jen Henderson

Date: 04/12/2023

Signature of Customer/Agent:

Regulated Entity Name: 605 Marquis Lane

Project Information

1. County: Williamson
2. Stream Basin: Brushy Creek
3. Groundwater Conservation District (if applicable): N/A
4. Customer (Applicant):

Contact Person: Nathan Blick

Entity: _____

Mailing Address: 605 Marquis Lane

City, State: Cedar Park, Texas

Telephone: 512.547.7040

Email Address: nathanblick@gmail.com

Zip: 78613

Fax: _____

5. Agent/Representative (If any):

Contact Person: Jen Henderson

Entity: Henderson Professional Engineers

Mailing Address: 600 Round Rock West Drive, Suite 604

City, State: Round Rock, Texas

Zip: 78681

Fax: _____

Email Address: Jen@HendersonPE.com

6. Project Location

This project is inside the city limits of Cedar Park.

This project is outside the city limits but inside the ETJ (extra-territorial jurisdiction) of _____.

This project is not located within any city limits or ETJ.

7. The location of the project site is described below. Sufficient detail and clarity has been provided so that the TCEQ's Regional staff can easily locate the project and site boundaries for a field investigation.

605 MARQUIS LANE, CEDAR PARK, TEXAS 78613

8. **Attachment A - Road Map.** A road map showing directions to and location of the project site is attached. The map clearly shows the boundary of the project site.

9. **Attachment B - USGS Quadrangle Map.** A copy of the USGS Quadrangle Map (Scale: 1" = 2000') is attached. The map(s) should clearly show:

Project site boundaries.

USGS Quadrangle Name(s).

10. **Attachment C - Project Narrative.** A detailed narrative description of the proposed project is provided at the end of this form. The project description is consistent throughout the application and contains, at a minimum, the following details:

Area of the site

Offsite areas

Impervious cover

Permanent BMP(s)

Proposed site use

Site history

Previous development

Area(s) to be demolished

11. Existing project site conditions are noted below:

Existing commercial site

Existing industrial site

Existing residential site

Existing paved and/or unpaved roads

- Undeveloped (Cleared)
- Undeveloped (Undisturbed/Not cleared)
- Other: _____

- 12. **Attachment D - Nature Of Exception.** A narrative description of the nature of each exception requested is attached. All provisions of 30 TAC §213 Subchapter B for which an exception is being requested have been identified in the description.
- 13. **Attachment E - Equivalent Water Quality Protection.** Documentation demonstrating equivalent water quality protection for surface streams which enter the Edwards Aquifer is attached.

Administrative Information

- 14. Submit one (1) original and one (1) copy of the application, plus additional copies as needed for each affected incorporated city, groundwater conservation district, and county in which the project will be located. The TCEQ will distribute the additional copies to these jurisdictions.
- 15. The applicant understands that prior approval under this section must be obtained from the executive director for the exception to be authorized.

Attachment C
Project Narrative

Project Narrative

The project site is 2.94 acres located to the south of Lone Star Drive and west of Marquis Lane. The address is 605 Marquis Ln. The project site is located within the city limits of the City of Cedar Park, Williamson County, Texas. No portion of the project site is located in the 1% annual chance (100-year) floodplain per the FEMA map panel 48491C0464F effective December 20, 2019. The project site is located within the Edwards Aquifer Contributing Zone. Hydrologic soil group information came from digital information served by the United States Department of Agriculture Natural Resources Conservation Service through the Web Soil Survey 2.0 portal. The project site is entirely type 'D' soil.

The project site has an existing one-story brick building and associated driveway, a metal garage, a swimming pool, concrete sidewalks, and several accessory buildings. Several trees are located on the property around the main building and throughout the project site. The existing impervious cover of the project site is 17% and the proposed is 21%. The current and proposed use of the project site is a semi urban residential home. The site contains a channel in the center of the project site that directs upgradient and on-site runoff to the right-of-way of Marquis Lane, where it is conveyed under the road by storm sewer culverts and released into a conveyance channel.

The proposed development of this project is to add a new house and in the open area of the western half of the site. No demolition of existing structures or pavement is planned. Little to no disturbance of the existing soils outside of the proposed house is planned.

Attachment D
Nature of Exception

Nature Of Exception

The proposed development for the property consists of adding a single-family residential home with minor modifications to the existing driveway's width, which would only cause minor disturbance in the soil and does not require stabilization.

30 TAC §213 Subchapter A, Rule §213.5 (3):

“Geologic assessment. For all regulated activities, the applicant must submit a geologic assessment report prepared by a geologist describing the site-specific geology. The report must identify all potential pathways for contaminant movement to the Edwards Aquifer. Single-family residential subdivisions constructed on less than ten acres are exempt from this requirement. The geologic assessment report must be signed, sealed, and dated by the geologist preparing the report.”

The property is 2.94 acres total and is a single-family residential lot, the property after the proposed development would have 0.61 acres of impervious cover, which is less than the 10 acres that would require a geologic assessment.

30 TAC §213 Subchapter B, Rule §213.21 (b):

“This subchapter applies only to regulated activities disturbing at least five acres, or regulated activities disturbing less than five acres which are part of a larger common plan of development or sale with the potential to disturb cumulatively five or more acres.”

The property is 2.94 acres total and after the proposed development would have 0.61 acres of impervious cover, which is less than the 5 acres that would apply Subchapter B of 30 TAC §213 to the project site.

James,

Since this project plans to only add a house and driveway, would an exception request be appropriate in this case?

Thanks,
Adam Reilly

Subject: RE: Determination for 605 Marquis, Cedar Park

Mr. Reilly,

The site is in the Contributing Zone so it will require a Contributing Zone Plan (CZP). The subdivision is occurring after the rule implementation (1999), so the lots are considered a common plan of development, bringing the CZP requirement into play. Please let me know if you have questions.

Bo

Subject: Determination for 605 Marquis, Cedar Park

Good morning,

We are replatting a 2.94 acre residential lot into two lots. We would like to get a determination if we need to do a WPAP for this site.

The site, as shown below, is in the Contributing Zone and the owners plan is to construct a new home with a driveway on the new lot.

Attachment E
Equivalent Water Quality Protection

Equivalent Water Quality Protection

The best management practice the project site uses to achieve equivalent water quality protection is vegetative filter strips. These are natural or engineered vegetated sections of land that accept sheet flow runoff on a relatively flat area, they are a permanent best management practice. Per Table 3-4 of TCEQ RG-348, vegetated filter strips can achieve a total suspended solids removal of 85%.

Proposed maintenance to ensure the continued function of vegetative filter strips include: a plan for pest and weed management, regular mowing and other lawn care practices, inspected at least twice annually, debris and litter removal at least four times a year, removal of excess sediment that may accumulate along the upstream boundary of the vegetative filter strips, and grass reseeding and mulching to ensure the presence of healthy dense grass.

Calculations associated with vegetative filter strips within the project are provided below.

VEGETATIVE FILTER STRIP CALCULATIONS			
LM = 27.2 * (AN * P)			
Where:			
LM = Required TSS removal (pounds)			
AN = Net increase in impervious area (acres)			
P = Average annual precipitation (inches)			
AN (sq. ft.)	5000		
AN (acres)	0.114784		
P	32		
LM	99.90777		
LR = (BMP Efficiency) * P * (AN * 34.6 + AP * 0.54)			
Where:			
LR = Load removed by BMP			
BMP Efficiency = TSS removal efficiency (expressed in decimal fraction)			
AN = impervious tributary area to the BMP (acres)			
AP = pervious tributary area to the BMP (acres)			
BMP Efficiency	0.85	Per Table 3-4 of TCEQ RG-348, the TSS Reduction of Vegetated Filter Strips is 85%.	
AP (sq. ft.)	1		
AP (acres)	0.0000		
LR	108.0256		
F = LM / SUM(LR)			
Where:			
F = Fraction of the annual rainfall treated by the BMP			
F	0.924853

to represent and act on the behalf of the above named Corporation, Partnership, or Entity for the purpose of preparing and submitting this plan application to the Texas Commission on Environmental Quality (TCEQ) for the review and approval consideration of regulated activities.

I also understand that:

1. The applicant is responsible for compliance with 30 Texas Administrative Code Chapter 213 and any condition of the TCEQ's approval letter. The TCEQ is authorized to assess administrative penalties of up to \$10,000 per day per violation.
2. For those submitting an application who are not the property owner, but who have the right to control and possess the property, additional authorization is required from the owner.
3. Application fees are due and payable at the time the application is submitted. The application fee must be sent to the TCEQ cashier or to the appropriate regional office. The application will not be considered until the correct fee is received by the commission.
4. A notarized copy of the Agent Authorization Form must be provided for the person preparing the application, and this form must accompany the completed application.
5. No person shall commence any regulated activity on the Edwards Aquifer Recharge Zone, Contributing Zone or Transition Zone until the appropriate application for the activity has been filed with and approved by the Executive Director.
