RE: Contributing Zone Plan S. Bell Blvd Commercial Cedar Park, Tx 78613

To whom it may concern:

We are pleased to submit this Contributing Zone Plan Application on behalf of Bell South Commercial, LLC for your consideration. Please find enclosed the following items for your review:

- 1. Edwards Aquifer Application Cover Page (TCEQ-20705)
- 2. Contributing Zone Plan Application with Attachments A-P (TCEQ-10257)
- 3. Construction Plans (Attachment M of CZP Application)
- 4. Temporary Stormwater Section (TCEQ-0602)
- 5. Agent Authorization Form (TCEQ-0599)
- 6. Application Fee Form (TCEQ-0574)
- 7. TCEQ Core Data Form (TCEQ-10400)

If you have any questions or require additional information, please contact me at (512) 441-9493.

Sincerely,

Joshua V. Elledge

Texas Commission on Environmental Quality Edwards Aquifer Application Cover Page

Our Review of Your Application

The Edwards Aquifer Program staff conducts an administrative and technical review of all applications. The turnaround time for administrative review can be up to 30 days as outlined in 30 TAC 213.4(e). Generally administrative completeness is determined during the intake meeting or within a few days of receipt. The turnaround time for technical review of an administratively complete Edwards Aquifer application is 90 days as outlined in 30 TAC 213.4(e). Please know that the review and approval time is directly impacted by the quality and completeness of the initial application that is received. In order to conduct a timely review, it is imperative that the information provided in an Edwards Aquifer application include final plans, be accurate, complete, and in compliance with <u>30 TAC 213</u>.

Administrative Review

1. <u>Edwards Aquifer applications</u> must be deemed administratively complete before a technical review can begin. To be considered administratively complete, the application must contain completed forms and attachments, provide the requested information, and meet all the site plan requirements. The submitted application and plan sheets should be final plans. Please submit one full-size set of plan sheets with the original application, and half-size sets with the additional copies.

To ensure that all applicable documents are included in the application, the program has developed tools to guide you and web pages to provide all forms, checklists, and guidance. Please visit the below website for assistance: <u>http://www.tceq.texas.gov/field/eapp</u>.

- 2. This Edwards Aquifer Application Cover Page form (certified by the applicant or agent) must be included in the application and brought to the administrative review meeting.
- 3. Administrative reviews are scheduled with program staff who will conduct the review. Applicants or their authorized agent should call the appropriate regional office, according to the county in which the project is located, to schedule a review. The average meeting time is one hour.
- 4. In the meeting, the application is examined for administrative completeness. Deficiencies will be noted by staff and emailed or faxed to the applicant and authorized agent at the end of the meeting, or shortly after. Administrative deficiencies will cause the application to be deemed incomplete and returned.

An appointment should be made to resubmit the application. The application is re-examined to ensure all deficiencies are resolved. The application will only be deemed administratively complete when all administrative deficiencies are addressed.

- 5. If an application is received by mail, courier service, or otherwise submitted without a review meeting, the administrative review will be conducted within 30 days. The applicant and agent will be contacted with the results of the administrative review. If the application is found to be administratively incomplete, it can be retrieved from the regional office or returned by regular mail. If returned by mail, the regional office may require arrangements for return shipping.
- 6. If the geologic assessment was completed before October 1, 2004 and the site contains "possibly sensitive" features, the assessment must be updated in accordance with the *Instructions to Geologists* (TCEQ-0585 Instructions).

Technical Review

- 1. When an application is deemed administratively complete, the technical review period begins. The regional office will distribute copies of the application to the identified affected city, county, and groundwater conservation district whose jurisdiction includes the subject site. These entities and the public have 30 days to provide comments on the application to the regional office. All comments received are reviewed by TCEQ.
- 2. A site assessment is usually conducted as part of the technical review, to evaluate the geologic assessment and observe existing site conditions. The site must be accessible to our staff. The site boundaries should be

clearly marked, features identified in the geologic assessment should be flagged, roadways marked and the alignment of the Sewage Collection System and manholes should be staked at the time the application is submitted. If the site is not marked the application may be returned.

- 3. We evaluate the application for technical completeness and contact the applicant and agent via Notice of Deficiency (NOD) to request additional information and identify technical deficiencies. There are two deficiency response periods available to the applicant. There are 14 days to resolve deficiencies noted in the first NOD. If a second NOD is issued, there is an additional 14 days to resolve deficiencies. If the response to the second notice is not received, is incomplete or inadequate, or provides new information that is incomplete or inadequate, the application must be withdrawn or will be denied. Please note that because the technical review is underway, whether the application is withdrawn or denied **the application fee will be forfeited**.
- 4. The program has 90 calendar days to complete the technical review of the application. If the application is technically adequate, such that it complies with the Edwards Aquifer rules, and is protective of the Edwards Aquifer during and after construction, an approval letter will be issued. Construction or other regulated activity may not begin until an approval is issued.

Mid-Review Modifications

It is important to have final site plans prior to beginning the permitting process with TCEQ to avoid delays.

Occasionally, circumstances arise where you may have significant design and/or site plan changes after your Edwards Aquifer application has been deemed administratively complete by TCEQ. This is considered a "Mid-Review Modification". Mid-Review Modifications may require redistribution of an application that includes the proposed modifications for public comment.

If you are proposing a Mid-Review Modification, two options are available:

- If the technical review has begun your application can be denied/withdrawn, your fees will be forfeited, and the plan will have to be resubmitted.
- TCEQ can continue the technical review of the application as it was submitted, and a modification application can be submitted at a later time.

If the application is denied/withdrawn, the resubmitted application will be subject to the administrative and technical review processes and will be treated as a new application. The application will be redistributed to the affected jurisdictions.

Please contact the regional office if you have questions. If your project is located in Williamson, Travis, or Hays County, contact TCEQ's Austin Regional Office at 512-339-2929. If your project is in Comal, Bexar, Medina, Uvalde, or Kinney County, contact TCEQ's San Antonio Regional Office at 210-490-3096

Please fill out all required fields below and submit with your application.

1. Regulated Entity Name: S Bell Blvd Commercial				2. Regulated Entity No.:

Application Distribution

Г

Instructions: Use the table below to determine the number of applications required. One original and one copy of the application, plus additional copies (as needed) for each affected incorporated city, county, and groundwater conservation district are required. Linear projects or large projects, which cross into multiple jurisdictions, can require additional copies. Refer to the "Texas Groundwater Conservation Districts within the EAPP Boundaries" map found at:

http://www.tceq.texas.gov/assets/public/compliance/field_ops/eapp/EAPP%20GWCD%20map.pdf

For more detailed boundaries, please contact the conservation district directly.

CONTRIBUTING ZONE PLAN APPLICATION (TCEQ-10257)

Contributing Zone Plan Application

Texas Commission on Environmental Quality

for Regulated Activities on the Contributing Zone to the Edwards Aquifer and Relating to 30 TAC §213.24(1), Effective June 1, 1999

To ensure that the application is administratively complete, confirm that all fields in the form are complete, verify that all requested information is provided, consistently reference the same site and contact person in all forms in the application, and ensure forms are signed by the appropriate party.

Note: Including all the information requested in the form and attachments contributes to more streamlined technical reviews.

Signature

To the best of my knowledge, the responses to this form accurately reflect all information requested concerning the proposed regulated activities and methods to protect the Edwards Aquifer. This **Contributing Zone Plan Application** is hereby submitted for TCEQ review and Executive Director approval. The application was prepared by:

Print Name of Customer/Agent: Joshua V. Elledge

Date: 08/27/2024

Signature of Customer/Agent:

Regulated Entity Name: S Bell Blvd. Commercial

Project Information

- 1. County: Williamson
- 2. Stream Basin: Turkey Creek/Brushy Creek
- 3. Groundwater Conservation District (if applicable): N/A
- 4. Customer (Applicant):

Contact Person: <u>Mr. Benny Nguyen</u> Entity: <u>BELL SOUTH COMMERCIAL LLC</u> Mailing Address: <u>675 Bering Drive, Suite 500</u> City, State: <u>Houston, Texas</u> Telephone: <u>(512)-965-4200</u> Email Address: <u>benny@halonare.com</u>

Zip: <u>77057</u> Fax: <u>N/A</u>

TCEQ-10257 (Rev. 02-11-15)

5. Agent/Representative (If any):

Contact Person: Joshua V. Elledge Entity: Quiddity Engineering Mailing Address: <u>3100 Alvin Devane Blvd, Suite 500</u> City, State: <u>Austin, Texas</u> Zip: <u>78741</u> Telephone: (512)-685-5160 Fax: (512)-455-2286 Email Address: jelledge@quiddity.com

6. Project Location:

The project site is located inside the city limits of <u>Cedar Park, Texas</u>.

- The project site is located outside the city limits but inside the ETJ (extra-territorial jurisdiction) of _____.
- The project site is not located within any city's limits or ETJ.
- 7. The location of the project site is described below. Sufficient detail and clarity has been provided so that the TCEQ's Regional staff can easily locate the project and site boundaries for a field investigation.

1005 S. Bell Blvd., Cedar Park, Texas 78613

- 8. Attachment A Road Map. A road map showing directions to and the location of the project site is attached. The map clearly shows the boundary of the project site.
- 9. Attachment B USGS Quadrangle Map. A copy of the official 7 ½ minute USGS Quadrangle Map (Scale: 1" = 2000') is attached. The map(s) clearly show:

Project site boundaries.

 \boxtimes USGS Quadrangle Name(s).

10. Attachment C - Project Narrative. A detailed narrative description of the proposed project is attached. The project description is consistent throughout the application and contains, at a minimum, the following details:

- Impervious cover
- \mathbb{X} Permanent BMP(s)
- Proposed site use
- Site history
- Previous development
- Area(s) to be demolished
- 11. Existing project site conditions are noted below:
 - Existing commercial site
 - Existing industrial site

Existing residential site

Existing paved and/or unpaved roads

Undeveloped (Cleared)

Undeveloped (Undisturbed/Not cleared)

Other: _____

12. The type of project is:

Residential: # of Lots: _____
 Residential: # of Living Unit Equivalents: _____
 Commercial
 Industrial
 Other: _____

13. Total project area (size of site): 7.36 Acres

Total disturbed area: 7.36 Acres

- 14. Estimated projected population: N/A
- 15. The amount and type of impervious cover expected after construction is complete is shown below:

Table 1 -	Impervious	Cover
-----------	------------	-------

Impervious Cover of Proposed Project	Sq. Ft.	Sq. Ft./Acre	Acres
Structures/Rooftops		÷ 43,560 =	
Parking		÷ 43,560 =	
Other paved surfaces	23809	÷ 43,560 =	0.55
Total Impervious Cover	23809	÷ 43,560 =	0.55

Total Impervious Cover 0.55 + Total Acreage 7.36 X 100 = 7.47% Impervious Cover

16. Attachment D - Factors Affecting Surface Water Quality. A detailed description of all factors that could affect surface water quality is attached. If applicable, this includes the location and description of any discharge associated with industrial activity other than construction.

17. Only inert materials as defined by 30 TAC 330.2 will be used as fill material.

For Road Projects Only

Complete questions 18 - 23 if this application is exclusively for a road project.

🛛 N/A

18.	Туре	of	project:
-----	------	----	----------

TXDOT road project. County road or roads built to county specifications. City thoroughfare or roads to be dedicated to a municipality. Street or road providing access to private driveways. 19. Type of pavement or road surface to be used: Concrete Asphaltic concrete pavement Other: 20. Right of Way (R.O.W.): Length of R.O.W.: _____ feet. Width of R.O.W.: feet. $L \times W = Ft^2 \div 43,560 Ft^2/Acre = acres.$ 21. Pavement Area: Length of pavement area: _____ feet. Width of pavement area: feet. $L \times W = Ft^2 \div 43,560 Ft^2/Acre = acres.$ Pavement area acres ÷ R.O.W. area acres x 100 = % impervious cover.

22. A rest stop will be included in this project.

A rest stop will not be included in this project.

23. Maintenance and repair of existing roadways that do not require approval from the TCEQ Executive Director. Modifications to existing roadways such as widening roads/adding shoulders totaling more than one-half (1/2) the width of one (1) existing lane require prior approval from the TCEQ.

Stormwater to be generated by the Proposed Project

24. Attachment E - Volume and Character of Stormwater. A detailed description of the volume (quantity) and character (quality) of the stormwater runoff which is expected to occur from the proposed project is attached. The estimates of stormwater runoff quality and quantity are based on area and type of impervious cover. Include the runoff coefficient of the site for both pre-construction and post-construction conditions.

Wastewater to be generated by the Proposed Project

25. Wastewater is to be discharged in the contributing zone. Requirements under 30 TAC §213.6(c) relating to Wastewater Treatment and Disposal Systems have been satisfied.

N/A

26. Wastewater will be disposed of by:

On-Site Sewage Facility (OSSF/Septic Tank):

Attachment F - Suitability Letter from Authorized Agent. An on-site sewage facility
will be used to treat and dispose of the wastewater from this site. The appropriate
licensing authority's (authorized agent) written approval is attached. It states that
the land is suitable for the use of private sewage facilities and will meet or exceed
the requirements for on-site sewage facilities as specified under 30 TAC Chapter 285
\square Each lat in this project/development is at least one (1) acro (43 560 square feet) in
size. The system will be designed by a licensed professional engineer or registered
size. The system will be designed by a licensed professional engineer of registered
205.
Sewage Collection System (Sewer Lines):
The sewage collection system will convey the wastewater to the Brushy Creek West
Regional Wastewater Treatment Plant (name) Treatment Plant. The treatment facility is:
V Evicting
N/A
ermanent Aboveground Storage Tanks(ASTs) ≥ 500

Per Gallons

Complete questions 27 - 33 if this project includes the installation of AST(s) with volume(s) greater than or equal to 500 gallons.

N/A

27. Tanks and substance stored:

Table 2 - Tanks and Substance Storage

AST Number	Size (Gallons)	Substance to be Stored	Tank Material
1			
2			
3			
4			
5			
	·	T	otal x 1.5 = Gallons

28. The AST will be placed within a containment structure that is sized to capture one and one-half (1 1/2) times the storage capacity of the system. For facilities with more than

TCEQ-10257 (Rev. 02-11-15)

one tank system, the containment structure is sized to capture one and one-half (1 1/2) times the cumulative storage capacity of all systems.

Attachment G - Alternative Secondary Containment Methods. Alternative methods for providing secondary containment are proposed. Specifications showing equivalent protection for the Edwards Aquifer are attached.

29. Inside dimensions and capacity of containment structure(s):

Table 3 - Secondary Containment

Length (L)(Ft.)	Width(W)(Ft.)	Height (H)(Ft.)	L x W x H = (Ft3)	Gallons

Total: _____ Gallons

30. Piping:

All piping, hoses, and dispensers will be located inside the containment structure.

Some of the piping to dispensers or equipment will extend outside the containment structure.

The piping will be aboveground

] The piping will be underground

- 31. The containment area must be constructed of and in a material impervious to the substance(s) being stored. The proposed containment structure will be constructed of:
- 32. Attachment H AST Containment Structure Drawings. A scaled drawing of the containment structure is attached that shows the following:
 - Interior dimensions (length, width, depth and wall and floor thickness).
 - Internal drainage to a point convenient for the collection of any spillage.

Tanks clearly labeled

Piping clearly labeled

Dispenser clearly labeled

33. Any spills must be directed to a point convenient for collection and recovery. Spills from storage tank facilities must be removed from the controlled drainage area for disposal within 24 hours of the spill.

In the event of a spill, any spillage will be removed from the containment structure within 24 hours of the spill and disposed of properly.

In the event of a spill, any spillage will be drained from the containment structure through a drain and valve within 24 hours of the spill and disposed of properly. The drain and valve system are shown in detail on the scaled drawing.

Site Plan Requirements

Items 34 - 46 must be included on the Site Plan.

34. \square The Site Plan must have a minimum scale of 1" = 400'.

Site Plan Scale: 1" = <u>80</u>'.

35. 100-year floodplain boundaries:

Some part(s) of the project site is located within the 100-year floodplain. The floodplain is shown and labeled.

No part of the project site is located within the 100-year floodplain.

The 100-year floodplain boundaries are based on the following specific (including date of material) sources(s): <u>48491C0605F & 48491C0610F eff. 12/20/2019</u>.

36. The layout of the development is shown with existing and finished contours at appropriate, but not greater than ten-foot contour intervals. Lots, recreation centers, buildings, roads, etc. are shown on the site plan.

The layout of the development is shown with existing contours at appropriate, but not greater than ten-foot contour intervals. Finished topographic contours will not differ from the existing topographic configuration and are not shown. Lots, recreation centers, buildings, roads, etc. are shown on the site plan.

- 37. \square A drainage plan showing all paths of drainage from the site to surface streams.
- 38. 🖂 The drainage patterns and approximate slopes anticipated after major grading activities.
- 39. \boxtimes Areas of soil disturbance and areas which will not be disturbed.
- 40. 🔀 Locations of major structural and nonstructural controls. These are the temporary and permanent best management practices.
- 41. 🛛 Locations where soil stabilization practices are expected to occur.
- 42. Surface waters (including wetlands).

N/A

43. Locations where stormwater discharges to surface water.

There will be no discharges to surface water.

44. Temporary aboveground storage tank facilities.

Temporary aboveground storage tank facilities will not be located on this site.

45. Permanent aboveground storage tank facilities.

Permanent aboveground storage tank facilities will not be located on this site.

46. \square Legal boundaries of the site are shown.

Permanent Best Management Practices (BMPs)

Practices and measures that will be used during and after construction is completed.

47. Permanent BMPs and measures must be implemented to control the discharge of pollution from regulated activities after the completion of construction.

🖂 N/A

- 48. These practices and measures have been designed, and will be constructed, operated, and maintained to insure that 80% of the incremental increase in the annual mass loading of total suspended solids (TSS) from the site caused by the regulated activity is removed. These quantities have been calculated in accordance with technical guidance prepared or accepted by the executive director.
 - The TCEQ Technical Guidance Manual (TGM) was used to design permanent BMPs and measures for this site.
 - A technical guidance other than the TCEQ TGM was used to design permanent BMPs and measures for this site. The complete citation for the technical guidance that was used is: _____.

N/A

49. Owners must insure that permanent BMPs and measures are constructed and function as designed. A Texas Licensed Professional Engineer must certify in writing that the permanent BMPs or measures were constructed as designed. The certification letter must be submitted to the appropriate regional office within 30 days of site completion.

🗌 N/A

50. Where a site is used for low density single-family residential development and has 20 % or less impervious cover, other permanent BMPs are not required. This exemption from permanent BMPs must be recorded in the county deed records, with a notice that if the percent impervious cover increases above 20% or land use changes, the exemption for the whole site as described in the property boundaries required by 30 TAC §213.4(g) (relating to Application Processing and Approval), may no longer apply and the property owner must notify the appropriate regional office of these changes.

The site will be used for low density single-family residential development and has 20% or less impervious cover.

The site will be used for low density single-family residential development but has more than 20% impervious cover.

The site will not be used for low density single-family residential development.

less
ist be
us cover
lescribed in
rocessing
propriate

Attachment I - 20% or Less Impervious Cover Waiver. The site will be used for
multi-family residential developments, schools, or small business sites and has 20%
or less impervious cover. A request to waive the requirements for other permanent
BMPs and measures is attached.

The site will be used for multi-family residential developments, schools, or small business sites but has more than 20% impervious cover.

The site will not be used for multi-family residential developments, schools, or small business sites.

52. X Attachment J - BMPs for Upgradient Stormwater.

A description of the BMPs and measures that will be used to prevent pollution of surface water, groundwater, or stormwater that originates upgradient from the site and flows across the site is attached.

No surface water, groundwater or stormwater originates upgradient from the site and flows across the site, and an explanation is attached.

Permanent BMPs or measures are not required to prevent pollution of surface water, groundwater, or stormwater that originates upgradient from the site and flows across the site, and an explanation is attached.

53. X Attachment K - BMPs for On-site Stormwater.

A description of the BMPs and measures that will be used to prevent pollution of surface water or groundwater that originates on-site or flows off the site, including pollution caused by contaminated stormwater runoff from the site is attached.
 Permanent BMPs or measures are not required to prevent pollution of surface water or groundwater that originates on-site or flows off the site, including pollution caused by contaminated stormwater runoff.

54. Attachment L - BMPs for Surface Streams. A description of the BMPs and measures that prevent pollutants from entering surface streams is attached.

N/A

55. Attachment M - Construction Plans. Construction plans and design calculations for the proposed permanent BMPs and measures have been prepared by or under the direct supervision of a Texas Licensed Professional Engineer, and are signed, sealed, and dated. Construction plans for the proposed permanent BMPs and measures are

TCEQ-10257 (Rev. 02-11-15)

attached and include: Design calculations, TCEQ Construction Notes, all proposed structural plans and specifications, and appropriate details.

N/A

56. X Attachment N - Inspection, Maintenance, Repair and Retrofit Plan. A site and BMP specific plan for the inspection, maintenance, repair, and, if necessary, retrofit of the permanent BMPs and measures is attached. The plan fulfills all of the following:
 Prepared and certified by the engineer designing the permanent BMPs and measures Signed by the owner or responsible party Outlines specific procedures for documenting inspections, maintenance, repairs, and, if necessary, retrofit.
Contains a discussion of record keeping procedures
□ N/A
57. Attachment O - Pilot-Scale Field Testing Plan. Pilot studies for BMPs that are not recognized by the Executive Director require prior approval from the TCEQ. A plan for pilot-scale field testing is attached.
⊠ N/A
58. Attachment P - Measures for Minimizing Surface Stream Contamination. A description of the measures that will be used to avoid or minimize surface stream contamination and changes in the way in which water enters a stream as a result of the construction and development is attached. The measures address increased stream flashing, the creation of stronger flows and in-stream velocities, and other in-stream effects caused by the regulated activity, which increase erosion that result in water quality degradation.
⊠ N/A
Responsibility for Maintenance of Permanent BMPs and

Measures after Construction is Complete.

- 59. The applicant is responsible for maintaining the permanent BMPs after construction until such time as the maintenance obligation is either assumed in writing by another entity having ownership or control of the property (such as without limitation, an owner's association, a new property owner or lessee, a district, or municipality) or the ownership of the property is transferred to the entity. Such entity shall then be responsible for maintenance until another entity assumes such obligations in writing or ownership is transferred.
- 60. A copy of the transfer of responsibility must be filed with the executive director at the appropriate regional office within 30 days of the transfer if the site is for use as a multiple single-family residential development, a multi-family residential development,

or a non-residential development such as commercial, industrial, institutional, schools, and other sites where regulated activities occur.

Administrative Information

- 61. Submit one (1) original and one (1) copy of the application, plus additional copies as needed for each affected incorporated city, groundwater conservation district, and county in which the project will be located. The TCEQ will distribute the additional copies to these jurisdictions.
- 62. Any modification of this Contributing Zone Plan may require TCEQ review and Executive Director approval prior to construction, and may require submission of a revised application, with appropriate fees.
- 63. The site description, controls, maintenance, and inspection requirements for the storm water pollution prevention plan (SWPPP) developed under the EPA NPDES general permits for stormwater discharges have been submitted to fulfill paragraphs 30 TAC §213.24(1-5) of the technical report. All requirements of 30 TAC §213.24(1-5) have been met by the SWPPP document.
 - The Temporary Stormwater Section (TCEQ-0602) is included with the application.

Attachment C: Project Narrative

S Bell Blvd Commercial is located between Cypress Creek Road and Little Elm Trail and directly adjacent to the west of South Bell Boulevard in Cedar Park, Texas. The *S Bell Blvd Commercial* project is to be constructed on Lot 1, Block A of the TSSD3 subdivision, an approximately 10.34-acre undeveloped tract (considered total site area). No portion of the project site is located within the limits of the 100-year floodplain as shown on FIRM Panel No. 48491C0605F & 48491C0610F dated December 20, 2019. The site is located within the city limits of Cedar Park and the limits of the Brushy Creek-Turkey Creek watershed & Contributing Zone of the Edwards Aquifer.

Approximately 4.12 acres (DA-2) of the 10.34-acre property will flow into an existing pond, for which a CZP modification has been prepared under separate cover; these 4.12 acres (DA-2), for all intents and purposes, are not incorporated for the BMP's associated with this Contributing Zone Plan as they have already been accounted for in a separate CZP.

Approximately 6.09 acres (DA-1A and DA-1B) of the 10.34-acre property will flow into a proposed partial sedimentation-filtration pond, which is to be located on an adjacent property owned by Leander ISD. The proposed partial sedimentation-filtration pond will be located within a drainage easement which is 1.27 acres in area.

In addition to the 6.09 acres (DA-1A and DA-1B) from the S Bell Blvd Commercial tract being treated by the proposed pond, 8.49 acres (OS-1A) from the tract owned by Leander ISD will also be treated by the proposed pond per development agreement executed 03/18/2024. The pond has been sized assuming 75% impervious cover for both the 6.09-acre (DA-1A and DA-1B) and 8.49-acre (OS-1A) drainage area.

However, the tract owned by Leander ISD will not be developed at this time (except for the pond), and only the area within the pond's drainage easement is included in this CZP. Additionally, the S Bell Blvd Commercial tract is proposing minimal impervious cover as it is not being fully developed at this time. Therefore, where applicable in this CZP, the minimal impervious cover values are shown, rather than the assumed 75% impervious cover for the drainage areas flowing to the proposed partial sedimentation-filtration pond.

Attachment D: Factors Affecting Surface Water Quality

Factors that may affect surface water quality are as follows:

Site Development Criteria

- The site will be used for commercial development
- When necessary, rock rip-rap or concrete outfall aprons will be designed to reduce runoff velocities resulting in settlement of suspended solids and minimizing scouringconditions.

Construction Stage

- Clearing will disturb areas and create the potential for pollutants to runoff from rainfall.
- Temporary BMP's will be maintained throughout construction and will include measures such as a stabilized construction entrance/exit, silt fencing, inlet protection, rock berms, a temporary sediment basin and other measures which will reduce TSS in runoff leaving the site.

Vehicular Traffic

- Mud or fine particles may be dropped from vehicular traffic.
- Fluids may be dropped from vehicular traffic.

Landscape and Property Maintenance

- Pesticides or herbicides used for landscape maintenance may not be applied at a proper rate and may leak into groundwater or runoff into surface drains.
- Fine particles may be washed from driveway surfaces into roadways and drains.
- Natural vegetative filter strips and wet pond will be utilized to treat TSS coming from the site, which will minimize the impact of TSS from impervious areas.
- A maintenance plan will be implemented for all temporary BMP's in accordance with the SWPPP and for all permanent BMP's in accordance with **Attachment N**.

Attachment E: Volume and Character of Stormwater

The stormwater runoff calculations included in this section were based on the SCS Method using HEC-HMS modeling in conjunction with drainage criteria specified by the City of Cedar Park (defers to City of Austin Drainage Criteria Manual). In the attached drainage area maps (**Attachment J**) for the proposed *S. Bell Commercial* site (10.34 acres), the analysis point of study is for the southeast end of the project site titled "Analysis Point 1". The objective of the hydrologic analysis is to show that the proposed sedimentation-filtration/detention pond has the capacity to store runoff from the ultimate development using the Atlas 14 100-year storm event.

Drainage areas "DA-1A", "DA-1B", and "OS-1A" are considered undeveloped in its existing conditions and are proposed to reflect the construction of a driveway for future commercial development in postdeveloped conditions. A hydrologic analysis was conducted to convert precipitation data to runoff values for the given site. Precipitation values were taken from the City of Cedar Park Atlas-14 rainfall depths and converted to runoff using Depth Duration Frequencies and TR-55 methodologies in HEC- HMS v 4.8. The National Resources Conservation Service (NRCS) web soil survey shows the site to be a hydrologic soil type "D", which has a low infiltration rate when saturated and exhibits the highest runoff potential of all hydrological soil groups. For HEC-HMS modeling, the existing & proposed impervious cover numbers were held to match existing conditions. To reflect the post-developed conditions, the proposed curve numbers were modified in regard to the existing.

For pond sizing purposes, a proposed impervious cover value of 75% was assumed for all of the 14.58 acres constituting DA-1A, DA-1B, and OS-1A. However, this is an assumption and minimal impervious cover is being proposed at this time.

The attached Existing and Proposed Drainage Area Maps for the proposed site are included in this section and show the drainage areas and flow patterns within the project. The area utilized for this CZP application is shown/marked in the proposed drainage area map. The drainage area map sheets also show the pre- and post-development runoff rates at "Analysis Point 1" including the offsite runoff flow paths, as well as a table summarizing the components of the HEC-HMS model for both the existing and proposed conditions. In regard to "Analysis Point 1", the post-developed rates are decreased compared to the pre-developed conditions. Please see the drainage study for more information regarding these assumptions, calculations & findings provided as **Appendix A** at the end of this report.

The pre-development runoff coefficient is 0.56

The post-development runoff coefficient is 0.56

Attachment F: Suitability Letter from Authorized Agent

Attachment F is not applicable to this project

Attachment G: Alternative Secondary Containment Methods

Attachment G is not applicable to this project

Attachment H: Alternative Secondary Containment Methods

Attachment H is not applicable to this project

Attachment I: 20% or Less Impervious Cover Waiver

Attachment I is not applicable to this project

Attachment J: BMPs for Upgradient Stormwater

There is an 8.49-acre undeveloped offsite area that flows into the northwest corner of and across the *S Bell Blvd Commercial* site. This area designated "OS-1A" is undeveloped, and the same general drainage pattern will be maintained in post-development conditions. OS-1A will flow to the proposed detention and water quality pond located on Leander ISD's property in post development conditions. As mentioned previously, the impervious cover assumed for OS-1A is 75% for pond sizing purposes, but no impervious cover is proposed on this particular drainage area at this time. Please see the attached existing and proposed drainage area map sheets for the *S Bell Blvd Commercial Project*.

# Attachment K: BMPs FOR ON-SITE STORMWATER

The drainage analysis for this project was based on the applicable drainage requirements of the City of Cedar Park (defers to City of Austin Drainage Criteria Manual). Detention analysis was performed to ensure that the combined 14.58-acre drainage area will not cause the proposed pond to overtop during the 100-year storm event using Atlas 14 rainfall data.

Water quality analysis was performed to ensure that the proposed BMP will adequately remove the required amount of TSS in accordance with TCEQ RG-348 requirements.

Included below is the TSS calculation for the site area along with the offsite area that will utilize the proposed pond. Please note that 75% impervious cover is assumed for pond sizing purposes, but the impervious cover being proposed along with this CZP application is much less than that value.

Texas Commission on Environmental Quality

### TSS Removal Calculations 04-20-2009

Project Name: S Bell Blvd Commercial Date Prepared: 4/30/2024

Additional information is provided for cells with a red triangle in the upper right corner. Place the cursor over the cell.

Text shown in blue indicate location of instructions in the Technical Guidance Manual - RG-348.

Characters shown in red are data entry fields.

Characters shown in black (Bold) are calculated fields. Changes to these fields will remove the equations used in the spreadsheet.

1. The Required Load Reduction for the total project:

Calculations from RG-348 Pages 3-27 to 3-30 Page 3-29 Equation 3.3:  $L_M = 27.2(AN \times P)$ 

where: L_{M TOTAL PROJECT} = Required TSS removal resulting from the proposed development = 80% of increased load

 $A_{\mbox{\scriptsize N}}$  =Net increase in impervious area for the project

P =Average annual precipitation, inches

Site Data: Determine Required Load Removal Based on the Entire Project

County =	Williamson	Site IC
Total project area included in plan * =	7.36	acres
Predevelopment impervious area within the limits of the plan * =	0.00	acres
Total post-development impervious area within the limits of the plan* =	0.55	acres
Total post-development impervious cover fraction * =	0.07	
P =	32	inches
		_
L _{M TOTAL PROJECT} =	479	lbs.
* The values entered in these fields should be for the total project area.		
Number of drainage basins / outfalls areas leaving the plan area =	1	
	•	
2. Drainage Basin Parameters (This information should be provided for each b	asin):	
Drainage Basin/Outfall Area No. =	1	
Total drainage basin/outfall area =	14 58	acres
Predevelopment impervious area within drainage basin/outfall area =	0.00	acres
Post-development impervious area within drainage basin/outfall area =	10.00	acres
Post-development impervious fraction within drainage basin/outfall area =	0.75	20163
r ost-development impervious naction within drainage basin/outian area -	0.75	

L_{M THIS BASIN} = **9522** Ibs.

#### 3. Indicate the proposed BMP Code for this basin.

Proposed BMP = Sand Filter Removal efficiency = 89 percent

#### 4. Calculate Maximum TSS Load Removed (L_R) for this Drainage Basin by the selected BMP Type.

RG-348 Page 3-33 Equation 3.7:  $L_R = (BMP \text{ efficiency}) \times P \times (AI \times 34.6 + AP \times 0.54)$ 

where: A_C = Total On-Site drainage area in the BMP catchment area

A_I = Impervious area proposed in the BMP catchment area

A_P = Pervious area remaining in the BMP catchment area

 $L_R$  = TSS Load removed from this catchment area by the proposed BMP

A _C =	14.58	acres
A _I =	10.94	acres
A _P =	3.64	acres
L _R =	10836	lbs

#### 5. Calculate Fraction of Annual Runoff to Treat the drainage basin / outfall area

Desired $L_{M THIS BASIN}$ =	9522	lbs.
------------------------------	------	------

F = **0.88** 

#### 6. Calculate Capture Volume required by the BMP Type for this drainage basin / outfall area. Calculations from RG-348 Pages 3-34 to 3-36

Rainfall Depth =	1.50	inches
Post Development Runoff Coefficient =	0.56	
On-site Water Quality Volume =	44489	cubic feet

#### Calculations from RG-348 Pages 3-36 to 3-37

0.00 acres 0.00 acres 0 0.00 0 cubic fee	Off-site area draining to BMP = 0.0 Off-site Impervious cover draining to BMP = 0.0 Impervious fraction of off-site area = 0 Off-site Runoff Coefficient = 0.0 Off-site Water Quality Volume = 0	
0 cubic fee	Off-site Water Quality Volume = 0	

	Storage for Sediment =	8898	
Total Capture Volume (required water qu	uality volume(s) x 1.20) =	53387	cubic feet

The following sections are used to calculate the required water quality volume(s) for the selected BMP.

#### 9. Filter area for Sand Filters

#### Designed as Required in RG-348 Pages 3-58 to 3-63

#### 9A. Full Sedimentation and Filtration System

Water Quality Volume for sedimentation basin = 53387 cubic feet

Minimum filter basin area = 2472 square feet

Maximum sedimentation basin area = 22245 square feet For minimum water depth of 2 feet Minimum sedimentation basin area = 5561 square feet For maximum water depth of 8 feet

#### 9B. Partial Sedimentation and Filtration System

Water Quality Volume for combined basins =	53387	cubic feet
--------------------------------------------	-------	------------

Minimum filter basin area = 4449 square feet

Maximum sedimentation basin area = 17796 square feet For minimum water depth of 2 feet Minimum sedimentation basin area = 1112 square feet For maximum water depth of 8 feet

PROJECT DESCRIPTION:

# A 10.34 ACRE DEVELOPMENT INCLUDING UTILITIES, PAVEMENT & WATER QUALITY/DETENTION POND. NO BUILDINGS ARE PROPOSED WITH THIS DEVELOPMENT.

OF 42

1-800-245-4545

- General Notes General Contractor shall call for all utility 16. No blasting is allowed on this project. locates prior to any construction. Contractor white paint (white lining) in accordance with 16 TAC 18.3. Water & wastewater owned by the City of Cedar Park can be located by calling Texas 811 at 1-800-344-8377. Allow three business days for utility locates by the City of Cedar Park.
- 2. All construction shall be in accordance with 18. The contractor shall keep the site clean and the latest City of Austin Standard Specifications. City of Austin standards shall be used unless otherwise noted.
- 3. Design procedures shall be in general compliance with the City of Austin Drainage Criteria Manual. All variances to the manual 19. Signs are not permitted in Public Utility are listed below: NONE
- 4. Benchmarks should be tied to the City of correctly "geo referenced" to state plane coordinates. A list of the City's benchmarks can be found at: http://www.cedarparktexas. gov/index.aspx?page=793.
- 5. Prior Prior to issuance of a certificate of right of way between the property line and edge of pavement / back of curb shall be revegetated according to COA specification 602S and 606S. Prior to City acceptance of subdivision improvements all graded and disturbed areas shall be re-vegetated in accordance with the City of Austin Specification Item #604 native seeding unless non-native is specifically approved.
- The Contractor shall provide the City of Cedar Park copies of all test results prior to acceptance of subdivision improvements.
- City, owner, engineer, contractor, representatives of all utility companies, and a representative from the testing lab shall attend pre-construction conference prior to start of construction. The contractor shall schedule the meeting with the City of Cedar Park Engineering Department a minimum of 48 hours prior to this pre-construction meeting (512-401-5000). Final construction plans shall be delivered to Engineering a minimum of seven business days prior to requesting a pre-construction meeting.
- 8. Excess soil shall be removed at the 23. All wet utilities shall be installed and all contractor's expense. Notify the City of Cedar Park if the disposal site is inside the City's iurisdictional boundaries.
- 9. Burning is prohibited.
- 10. Any changes or revisions to these plans must engineer for review and written approval prior to construction of the revision. All changes and revisions made to the design of utilities or impacts utilities shall use revision clouds to highlight all revisions or changes with each submittal. Revision triangles shall be used to mark revisions. All clouds and triangle markers from previous revisions may be updated in the appropriate areas of the Title Block
- 11. Minimum setback requirements for existing and newly planted trees from the edge of pavement to conform to the requirements as shown in Table 6-1 of the City of Austin's Transportation Criteria Manual.
- 12. The Contractor will reimburse the City for all cost incurred as a result of any damage to any City utility or any infrastructure within the Right-of-Way by the Contractor, regardless of these plans
- 13. An engineer's concurrence letter and electronic 22"x34" record drawings shall be submitted to the Engineering Department occupancy or subdivision acceptance. The Engineer and Contractor shall verify that all final revisions and changes have been made to record drawings prior to City submittal. Record construction drawings, including roadway and all utilities, shall be provided to the City in AutoCad ". dwg" files and ".PDF" format on a CD or DVD. Line weights, line types and text size shall be such that if half-size prints (11"x17") were produced, the plans would still be legible. All required digital files shall contain a minimum of two (2) control Coordinate System – Texas Central Zone (4203), in US feet and shall include rotation information and scale factor required to reduce surface coordinates to grid coordinates in US feet.
- 14. The City of Cedar Park has not reviewed these plans for compliance with the Americans With Disabilities Act. It is the responsibility of the owner to provide compliance with all legislation related to shown in these plans.
- 15. ALL RESPONSIBILITY FOR THE ADEQUACY OF THESE PLANS REMAINS WITH THE ENGINEER WHO PREPARED THEM. IN REVIEWING THESE PLANS, THE 32. All driveway approaches shall have a uniform CITY OF CEDAR PARK MUST RELY ON THE ADEQUACY OF THE WORK OF THE DESIGN ENGINEER.

- shall delineate areas of excavation using 17. A traffic control plan, in accordance with the Texas Manual on Uniform Traffic Control Devices, shall be submitted to the City for review and approval prior to any partial or complete roadway closures. Traffic control plans shall be site specific and seal by a registered professional engineer
  - maintained at all times, to the satisfaction of the City. The subdivision will not be accepted (or Certificate of Occupancy issued) until the site has been cleaned to the satisfaction of the City.
  - Easements, Set Backs or Drainage Fasements
- Cedar Park benchmarks and be 20. It shall be the responsibility of the Contractor to inspect temporary erosion controls on a 1. daily basis. Adjust the controls and/or remove any sediment buildup as necessary. A stop work order and/or fine may be imposed if the erosion controls are not maintained.
- occupancy for a site development permit, the 21. A final certificate of occupancy will not be issued on commercial sites until all disturbed areas have been re-vegetated. Substantial grass cover, as determined by Engineering Department, must be achieved prior to the issuance of a final certificate of occupancy. All erosion controls must remain in place and maintained until all disturbed areas have been re-vegetated to the acceptance of the City of Cedar Park Engineering Department. Prior to issuance of a certificate of occupancy for a site development permit, the right of way between the property line and edge o pavement / back of curb shall be revegetated according to COA specification 602S and 606S.
  - Contractor will be responsible for keeping 22. roads and drives adjacent to and near the site free from soil, sediment and debris. Contractor will not remove soil, sediment or debris from any area or vehicle by means of water, only shoveling and sweeping will be allowed. Contractor will be responsible for dust control from the site. Failure to comply with this requirement may result in a stop work order or a fine.
  - densities must have passed inspection(s) prior to the installation of dry utilities.
  - 24. A minimum of seven days of cure time is required for HMAC prior to the introduction of vehicular traffic to any streets.
- first be submitted to the City by the design 25. Prior to plan approval, the Engineer shall submit to the Engineering Department documentation of subdivision/site registration with the Texas Department of Licensing and Regulations (TDLR) and provide documentation of review and compliance of the subdivision/site construction plans with Texas Architectural Barriers Act (TABA).
- removed. Revision information shall be 26. Prior to subdivision/site acceptance, the engineer/developer-ownershall submit to the Engineering Department documentation that the subdivision/site was inspected by TDLR or a registered accessibility specialist (RAS) and the subdivision/site is in compliance with the requirements of the TABA.
  - 27. All construction and construction related activities shall be performed Monday thru Friday from 7:00 A.M. to 6:00 P.M. However construction activities within one hundred feet (100') of a dwelling or dwelling unit shall be performed between the hours of 8:00 a.m. and 6:00 p.m. Otherwise all construction and construction related activities shall conform to City of Cedar Park Code of Ordinances. specifically ARTICLE 8.08.
- prior to the issuance of certificate of 28. Approval for construction activities performed on Owner's Holidays, and/or Saturdays outside of Monday through Friday 8 am to 5 pm, or in excess of 8 hours per day shall be obtained in writing 48 hours in advance, and inspection fees at 1.5 times the hourly inspection rate shall be billed directly to the contractor. There shall be no construction or construction related activities performed on Sunday. The City reserves the right to require the contractor to uncover all work performed without City inspection.
- points referenced to the State Plane Grid 29. All poles to be approved by City and PEC, no conduit shall be installed down lot lines / between homes. All conduit shall be located in the public ROW or in an easement adjacent to and parallel to the public ROW.
  - 30. Dry utilities shall be installed after subgrade is cut and before first course base. No trenching of compacted base. If necessary dry utilities installed after first course base shall be bored across the full width of the ROW.
- accessibility within the limits of construction 31. No ponding of water shall be allowed to collect on or near the intersection of private driveway(s) and a public street. Reconstruction of the driveway approach shall be at the Contractor's expense.
  - two percent slope within the ROW unless approved in writing by the Engineering Department.

- 33. Contractors on site shall have an approved set of plans at all times. Failure to have an approved set may result in a stop work order.
- Contractor to clear five feet beyond all right of way to prevent future vegetative growth into the sidewalk areas.
- 35. There shall be no water or wastewater appurtenances, including but not limited to, valves, fittings, meters, clean-outs, manholes, or vaults in any driveway, sidewalk, traffic or pedestrian area.
- Sidewalks shall not use curb inlets as a partial walking surface. Sidewalks shall not use traffic control boxes, meter or check valve vaults, communication vaults, or other buried or partially buried infrastructure as a vehicular or pedestrian surface.

### Street Notes

6.

- No trenching of compacted base will be allowed. A penalty and/or fine may be imposed to the general contractor if trenching of compacted base occurs without City approval, regardless of who performed the trenching.
- All sidewalks shall comply with the Americans With Disabilities Act. The City of Cedar Park has NOT reviewed these plans for compliance with the Americans With Disabilities Act, or any other accessibility legislation, and does not warranty or approve these plans for any accessibility standards.
- Street barricades shall be installed on all dead end streets and as necessary during construction to maintain job safety.
- Any damage caused to existing pavement, curbs, sidewalks, ramps, etc., shall be repaired by the contractor to the satisfaction of the City prior to acceptance of the subdivision
- At intersections, which have valley drainage, the crown to the intersecting street will be culminated at a distance of 40 ft. from the intersecting curb line unless otherwise noted.
- The subgrade material was tested by Raba Kistner (512-339-1745) on October 27, 2023 the pavement sections were designed accordingly. The pavement sections are to be constructed as follows:
- Flexible Pavement Light Duty (20,000 ESALs): -HMAC Surface Course. Type "D": 2 Inch -Flexible Base (TxDOT Item 247, Type A,
- Grade 1-2): 8 Inch Flexible Pavement Medium Duty (80,000 ESALs) -HMAC Surface Course, Type "D": 2.5 Inch -Flexible Base (TxDOT Item 247, Type A, Grade 1-2): 10 Inch
- Rigid Pavement Light Duty (20,000 ESALs) -Portland Cement Concrete (28 day min. compressive strength of 4,000psi): 5 inch - Select Fill/Flexible Base (TxDOT Item 247,
- Type A, Grade 1-2)" 4 inch Rigid Pavement Medium Duty (80,000 ESALs) Portland Cement Concrete (28 day min. compressive strength of 4,000psi): 6 inch - Select Fill/Flexible Base (TxDOT Item 247, Type A, Grade 1-2)" 4 inch

(RK Project No. AAA23-121-00)

- 7. Density testing of compacted subgrade material, first course and second course compacted base, shall be made at 500 foot intervals.
- All density testing is the responsibility of the owner or contractor and shall be witnessed by the City of Cedar Park's project representative. The contractor is to notify the City 48 hours prior to scheduled density testing.
- Traffic control signs and pavement markings shall be in accordance with the Texas Manual on Uniform Traffic Control Devices and installed as directed by the City of Cedar Park prior to City acceptance of the Subdivision.
- 10 Slope of natural ground adjacent to the right-of-way shall not exceed 3:1. If a 3:1 slope is not possible, a retaining wall orsome other form of slope protection approved by the City shall be placed in a location acceptable to the City.
- 11. The City, engineer, contractor, and a representative from the asphalt testing lab shall attend a pre-paving conference prior to the start of HMAC paving. The contractor shall give the City a minimum of 48 hours notice prior to this meeting (512-401-5000).
- The Contractor or owner is responsible for 12. conducting tests on asphalt pavement in accordance with the requirements set forth in the City of Austin Standard Specification No. 340. Any re-testing of the asphalt pavement shall be conducted under the supervision of the engineer and the City of Cedar Park. Re-testing of the asphalt pavement shall be limited to one retest per project.
- 13. All pavement markings and signage shall comply with MUTCD standards. Street name lettersizing shall be in accordance with MUTCDTable2D-2.Pavement markings shall be thermoplastic unless otherwise noted.
- 14. All street name signs shall be high intensity retro grade.

- 15. No Fencing or Wall is allowed to be 13. City shall be given 48 hours notice prior to all constructed so that it obstructs the sight lines of drivers from an intersecting public roadway or from an intersecting private driveway. Sight lines are to be maintained as described in City Code Section 14.05.007. Installing a fence or wall which does not comply with the City's Sight Distance Requirements or Fencing Regulations is a violatio
- 16. Temporary rock crushing operations are not for review and approval.
- Acceptance of the Project Improvements.
- Stoppage.
- 19. Improvements that include reconstruction of
- driveway.

# Nastewater Notes

- Manhole frames and covers and water valve paving construction.
- project.
- at least 8 mil. Polyethylene wrap.
- engineer.
- pipe
- Gasketed PVC sewer main fittings shall be used to connect SDR-35 PVC to SDR-26 PVC pressure pipe or C-900.
- Pipe materials to be used for construction of utility lines: Wastewater- SDR-26 PVC Force Main- NONE (Note: If using PVC, SDR-26 is required, SDR-35 WW is not allowed. Forcemains shall
- of 30 days.
- unless noted on the bid form.
- Specifications
- 500 feet of installed pipe.

K:\28106\28106-0001-02 1201 S. Bell Blvd. - Commerical Subdivision\2 Design Phase\CAD\Subdivision\28106-0001-02 COVER.dwg cbarczi: August 26, 2024

allowed. All sources for flexible base material are required to be approved by the City. Prior to base placement all current triaxial test reports for the proposed stockpiles are to be submitted to the City's project representative

17. Utility service boxes or other utility facilities shall not be installed within areas determined to be required sight lines of two intersecting public streets or within sight lines of a private driveway. Sight lines are to be maintained compliant with Table 1-1 of the Austin Transportation Criteria Manual. Utilities determined by the Director of Engineering to be placed within required sight lines may be required to be relocated at the expense of the Certificate of Occupancy or prior to the City's

18. All lane closures shall occur only between the hours of 9 AM and 4 PM. Any night time lane closures require approval by the Director of Engineering and shall occur between the hours of 8 PM and 6 AM. Lane closures observed by City during the peak hours of 6 AM to 9 AM, or 4 PM to 8 PM will be subject to fine per Chapter 1 of City Ordinance, and/or subsequent issuance of Work

an existing Type II driveway shall be done in a manner which retains operations of not less than half of the driveway at all times. Full closure of such driveway can be considered with written authorization retained by the Contractor from the property owner(s) or access easement right holder(s) of the driveway allowing full closure of the driveway.

20. Trees must not overhang within 10' vertically of a sidewalk, or 18' vertically of a roadway or

Refer to the City of Cedar Park Public Works Utility Policy and Specifications manual.

boxes shall be raised to finished pavement grade at the owner's expense by the contractor with the City approval. All utility adjustments shall be completed prior to final

The location of any existing utility lines shown on these plans may not be accurate. Any damage to existing utility lines, both known and unknown, shall be repaired at the expense of the contractor. The contractor shall locate all utilities prior to bidding the

4. All iron pipe and fittings shall be wrapped with

5. All water mains, wastewater mains and service lines shall meet City of Austin minimum cover specifications. All streets are to be cut to subgrade prior to installation of water mains or cuts will be issued by the

> Where 48-inches of cover below subgrade cannot be achieved for wastewater service lines alternate materials may be used. A minimum of 36-inches of cover below subgrade shall be achieved. Any wastewater service line with cover between 36-inch and 48- inches shall be SDR-26 PVC pressure

be epoxy lined ductile iron)

All sanitary sewers, excluding service lines, shall be mandrel tested per TCEQ (Texas Commission on Environmental Quality) criteria. A mandrel test will not be performed until backfill has been in place for a minimum

10. All wastewater lines 10" and larger shall be video inspected in accordance with City of Cedar Park Public Works Department Utility Policy and Standard Specifications Manual Appendix E: Requirements for Video Inspection of Wastewater Lines at the Contractor's expense. No separate pay

11. All sanitary sewers, including service lines, shall be air tested per City of Austin Standard

12. Density testing of compacted backfill shall be made at a rate of one test per two foot lifts per

- testing of water and wastewater lines. City inspection is required for all testing of water and wastewater lines.
- 14. Where a water or wastewater line crosses above (or below) a storm sewer structure and the bottom (or top) of the pipe is within 18 inches of the top (or bottom) of the utility structure, the pipe shall be encased with concrete for a distance of at least 1 ft. on either side of the ditch line of the utility structure or the storm sewer. Concrete encasement will not be required for ductile iron (thickness Class 50), AWWA C-900 (SDR- 18) 150 psi rated PVC in sizes to 12 inches or AWWA C-905 (SDR-25) 165 psi rated PVC in sizes larger than 12 inches. Concrete encasement shall conform to C.O.A. standard detail 505-1.
- 15. The allowable (maximum) adjustment for a manhole shall be 12" (inches) or less.
- 16 Where a sewer line crosses a water line, the sewer line shall be one 20 ft. joint of 150 psi rated PVC centered on crossing.
- contractor prior to the City issuing a 17. All manhole and inlet covers shall read "City of Cedar Park".
  - 18. Contractor to notify, and obtain approval from, the City of Cedar Park 48 hours prior to connecting to existing City utilities.
  - 19. All pipe bedding material shall conform to City of Austin Standard Specifications.
  - 20. Unless otherwise specified by the Engineer all concrete is to be Class "A" (5 sack, 3000 psi ~28-days), and all reinforcing steel to be ASTM A615 60.
  - 21. All wastewater manholes to be coated with organic materials and procedures listed in City of Austin Qualified Products List No. WW-511 (WW-511A and WW-511B are not allowed unless manhole is being structurally rehabilitated with approval by Public Works). All manholes will be pre-coated or coated AFTER testing.
  - 22. Polybrid Coatings on wastewater manholes will not be allowed. Any other product appearing on the COA SPL WW-511 is acceptable.
  - 23. All penetrations of existing wastewater manholes are required to be re-coated in accordance with the specifications listed in Note 20.
  - 24. All manholes will be vacuum tested only.
  - 25. Tracer tape AND marking tape shall be installed on all water and wastewater mains in accordance with City of Austin Standards. regardless of the type of pipe.
  - 26. All pressure pipe shall have mechanical restraint and concrete thrust blocking at all

valves, bends, tees, plugs, and other fittings.

Water Notes

- Refer to the City of Cedar Park Public Works Utility Policy and Specifications manual.
- 2. The top of valve stems shall be at least 18", and no more than 36", below finished grade. Valve stem risers shall be welded on each end to the Citv's satisfaction.
- Fire hydrant leads to be ductile iron. Class 350, and installed per City of Austin standard specifications and detail.
- Prior to installation of fire hydrants, the engineer will provide the Contractor one (1) cut from a hub pin, establishing the elevation of the bury line.
- The engineer shall provide cuts for all water lines at all storm sewer crossings to the City of Cedar Park
- Pipe materials to be used for construction of utility lines Water - 180 LF PVC
- Copper pipe and fittings are not permitted within the Right-of-Way. Minimum DR-14 12" dia and smaller. Minimum class 250 DI larger than 12" dia.
- Approved 5 1/4" fire hydrants:
  - American Flow Control, B84B Mueller Company, Super Centurion 250 Clow Medallion Hydrant
    - Requirements for private fire hydrants (Behind Double Check Backflow Prevention Assembly): Must be in accordance with City of Austin specifications.
  - All fire hydrants must meet City of Cedar Park thread specifications (National Thread)
- Blue reflector markers shall be located on the centerline of the pavement across from all fire hydrants. Pavement markers at intersections shall be four-sided.
- 8. Should a Tapping Saddle be approved by Public Works, the saddle shall be Smith-Blair 662 Stainless Steel Tapping Sleeves with all stainless hardware, or approved equal. Requests for alternate providers shall be made to the City of Cedar Park Public Works. No tap exceeding 2" in diameter will be approved.

- 9. pressure and leak tested per City of Austin Standard Specifications and witnessed by the City of Cedar Park representative. All testing is to be the responsibility of the contractor. and the contractor may be required to re-test lines if the testing is not witnessed by the City. Contractor must notify the City of Cedar Park 48 hours prior to any testing. Initial water line disinfection must meet a chlorine residual of 50ppm, and a chlorine residual of 25 ppm after a 24 hour detention period. Sections that are 20 – 30 feet can use granular or tablet disinfection, but anything beyond that must be liquid disinfection to evenly clean the pipe.
- 10. All water lines shall be sterilized and bacteriologically tested in accordance with City of Austin Standards. The contractor is responsible for sterilization and the City of Cedar Park is responsible for submitting bacteriological samples to the State. Public Works will require a contractor specialized in disinfection for large diameter lines or critical infrastructure, subsidiary to pipe installation.
- 11. Density testing of compacted backfill shall be made at a rate of one test per two foot lifts per 500 feet of installed pipe.
- 12. Contractor to obtain a water meter from the City of Cedar Park for any water that may be required during construction. (512-401-5000)
- 13. ALL WATER METER BOXES SHALL BE FORD GULF METER BOX WITH LOCKING
- SINGLE G-148-233
- DUAL DG-148-243 •
- 1" METER YL111 444 • 1 ½" – 2" METER 1730-R (LID) & 1730-12 (BOX)/ACCEPTABLE BOXES FOR THIS SIZE OF METER
- 14. Manhole frames and covers and water valve boxes shall be raised to finished pavement grade, when in public streets, at the owner's expense by the contractor with City inspection. All utility adjustments shall be completed prior to final paving construction.
- 15. The location of any existing utility lines shown on these plans is the best available and may not be accurate. Any damage to existing utility lines, both known and unknown, shall be repaired at the expense of the contractor
- 16. All iron pipe and fittings shall be wrapped with at least 8 mil. Polyethylene wrap.
- 17. All water mains, wastewater mains and service lines shall meet City of Austin Specifications for minimum cover requirements. All streets are to be cut to subgrade prior to installation of water mains or cuts will be issued by the engineer.
- 18. City to be given 48 hours notice prior to all 9. testing of water and wastewater lines. City inspection is required for all testing of water and wastewater lines
- 19. Where a water or wastewater line crosses the bottom (or top) of the pipe is within 18 inches of the top (or bottom) of the utility structure, the pipe shall be encased with concrete for a distance of at least 1 ft. on either side of the ditch line of the utility structure or the storm sewer. Concrete encasement will not be required for ductile iron (thickness Class 50), AWWA C-900 (SDR- 18) 150 psirated PVC in sizesto 12 inches or AWWA C-905 (SDR-25) 165 psi rated PVC in sizes larger than 12 inches. Concrete encasement shall conform to C.O.A. standard detail 505-1.
- 20. Contractor to notify the City of Cedar Park 48 hours prior to connecting to existing utilities.
- 21. All pipe bedding material shall conform to City of Austin Standard Specifications.
- 22. Tracer tape shall be installed on all water and wastewater mains regardless of the type of 2. pipe or depth of pipe installed.
- 23. Unless otherwise specified by the Engineer all concrete is to be Class "A" (5 sack, 3000 psi ~ 28-days), and all reinforcing steel to be ASTM 3. A615 60.
- 24. The City considers protection of its water system paramount to construction activities. City personnel will operate, or authorize the contractor to operate, all water valves that will pass through the City's potable water. The contractor may not operate any water valve, existing or proposed, that will allow water from the City's water system to flow to a proposed or existing water system without the express consent of the City. Notify the City two business days in advance of any request to operate a water valve. The general contractor may be fined \$500 or more, including additional theft of water fines, if a water valve is operated in an unauthorized manner, regardless of who operated the valve.
- 25. All water valves over 24" in size shall have a by-pass line and valve installed. By-pass valves and lines are subsidiary to the cost of the valve unless specifically identified on the bid form.
- 26. All water valves, including those over 12" in size, shall be gate valves.

- All water lines, including service lines, shall be 27. A double check backflow device in a vault 6. shall be installed at the property line on all private fire lines. A detector water meter will be installed on this backflow device, and it 7. must be a Sensus SRII 3/4" meter with AMI radio read capability. The City will provide this meter. Please reference the City of Cedar Park Double Check Backflow Prevention Assembly Detail.
  - 28. All potable water system components installed after January 4, 2014, shall be "lead free" according to the United States Safe Drinking 10. Permanent water quality ponds or controls will be Water Act. The only components exempt from this requirement are fire hydrants. Components that are not clearly identified by the manufacturer as meeting this requirement by marking, or on the product packaging, or by pre-approved submittal, will be rejected for use. A NSF certification will be adequate if the 12. Upon completion of the site construction and certification has not expired as of January 4. 2014 and remains unexpired at the time of construction.
  - 29. All pressure pipe shall have mechanical restraint and concrete thrust blocking at all valves, bends, tees, plugs, and other fittings.

# Storm Sewer Notes:

- Manhole frames and covers and water valve 13. Upon completion of landscape installation of a boxes shall be raised to finished pavement grade at the owner's expense by the contractor with City inspection. All utility adjustments shall be completed prior to final paving construction. Contractor shall backfill around manholes and junction boxes with Class A concrete.
- 2. All manhole lids shall be 32" or larger, unless expressly approved in writing by the Engineering Department.
- 3. The location of any existing utility lines shown on these plans is the best available and may not be accurate. Any damage to existing utility lines, both known and unknown, shall be repaired at the expense of the contractor.
- Pipe materials to be used for construction of utility lines: Unless otherwise specified by the Engineer, all storm sewer RCP shall be Class III. Corrugated Metal Pipe is not permitted.
- All manhole and inlet covers shall read "City of Cedar Park".
- Contractor to notify the City of Cedar Park 48 hours prior to connecting to existing utilities.
- All pipe bedding material shall conform to City of Austin Standard Specifications.
- Unless otherwise specified by the Engineer all concrete is to be Class "A" (5 sack, 3000 psi ~ 28-days), and all reinforcing steel to be ASTM A615 60.
- Contractor to install and maintain geo-textile fabric barrier (inlet protection) around storm sewer leads and inlets to prevent silt and other material from entering the storm sewer collection system.
- above (or below) a storm sewer structure and 10. Install concrete safety end treatments to all culverts and ends of drainage pipe.
  - 11. All curb inlets shall have an Almetek 4" Disc "No Dumping Drains to Waterway" marker.

Sequence of Construction Notes:

- The following sequence of construction shall be used for all development. The applicant is encouraged to provide any additional details 5. appropriate for the particular development.
- Temporary erosion and sedimentation controls are to be installed as indicated on the approved site plan or subdivision construction 6. plan and in accordance with the Erosion Sedimentation Control Plan (ESC) and Stormwater Pollution Prevention Plan (SWPPP) that is required to be posted on the 7. site. Install tree protection and initiate tree mitigation measures
- The General Contractor must contact the City 8. Inspector at 512-401-5000, 72 hours prior to the scheduled date of the required on-site preconstruction meeting.
- The General Contractor will follow the Erosion Sedimentation Control Plan (ESC) and Storm Water Pollution Prevention Plan (SWPPP) posted on the site. Temporary erosion and sedimentation controls will be revised, if needed, to comply with City Inspectors' directives, and revised construction schedule relative to the water quality plan requirements and the erosion plan.
- Rough grade the pond(s) at 100% proposed capacity. Either the permanent outlet structure or a temporary outlet must be constructed prior to development of embankment or excavation that leads to ponding conditions. The outlet system must consist of a sump pit outlet and an emergency spillway meeting the requirements of the City of Austin Drainage Criteria Manual, as required. The outlet system shall be protected from erosion and shall be maintained throughout the course of construction until installation of the permanent water quality pond(s).
- Temporary erosion and sedimentation controls will be inspected and maintained in accordance with the Erosion Sedimentation Control Plan (ESC) and Storm Water Pollution Prevention Plan (SWPPP) posted on the site.

feature

- activities. hvdrants

- - City Inspector.

8. Fire Department access will be installed where required by approved site plan.

9. Vertical construction may occur after the Pre-vertical Inspection has been cleared by the Fire Marshal.

cleaned out and filter media will be installed prior to/concurrently with revegetation of site.

11. Complete construction and start revegetation of the B. site and installation of landscaping.

revegetation of a project site, the design engineer shall submit an engineer's letter of concurrence bearing the engineer's seal, signature, and date to D. the City indicating that construction, including revegetation, is complete and in substantial compliance with the approved plans. After receiving this letter, a final inspection will be scheduled by the City Inspector.

project site, the Landscape Architect shall submit a letter of concurrence to the City indicating that the required landscaping is complete and in substantial conformity with the approved plans. After receiving this letter, a final inspection will be scheduled by the

14. After a final inspection has been conducted by the City Inspector and with approval from the City Inspector, remove the temporary erosion and sedimentation controls and complete any necessary final revegetation resulting from removal of the controls. Conduct any maintenance and rehabilitation of the water quality ponds or controls.

Texas Commission on Environmental Quality Contributing Zone Plan General Construction Notes

A written notice of construction must be submitted to the TCEQ regional office at least 48

hours prior to the start of any ground disturbance or construction activities. This notice must include: the name of the approved project;

the activity start date; and the contact information of the prime contractor

2. All contractors conducting regulated activities associated with this project should be provided with complete copies of the approved Contributing Zone Plan (CZP) and the TCEQ letter

> indicating the specific conditions of its approval During the course of these regulated activities, the contractor(s) should keep copies of the approved plan and approval letter onsite.

3. No hazardous substance storage tank shall be installed within 150 feet of a water supply source, distribution system, well, or sensitive

4. Prior to beginning any construction activity, all temporary erosion and sedimentation (E&S) control measures must be properly installed and maintained in accordance with the

manufacturers specifications. If inspections indicate a control has been used inappropriately, or incorrectly, the applicant must replace or modify

the control for site situations. These controls must remain in place until the disturbed areas have been permanently stabilized.

Any sediment that escapes the construction site must be collected and properly disposed of before the next rain event to ensure it is not washed into surface streams, sensitive features, etc.

Sediment must be removed from the sediment traps or sedimentation basins when it occupies 50% of the basin's design capacity.

Litter, construction debris, and construction chemicals exposed to stormwater shall be prevented from being discharged offsite.

All excavated material that will be stored on-site must have proper E&S controls.

9. If portions of the site will have a cease in construction activity lasting longer than 14 days, soil stabilization in those areas shall be initiated as soon as possible prior to the 14th day of

inactivity. If activity will resume prior to the 21st day, stabilization measures are not required. If drought conditions or inclement weather prevent action by the 14th day, stabilization measures shall be initiated as soon as possible.

made available to the TCEQ upon request: - the dates when major grading activities occur; Underground utilities will be installed, including fire - the dates when construction activities temporarily o permanently cease on a portion of the site; and the dates when stabilization measures are initiated. 11. The holder of any approved CZP must notify the appropriate regional office in writing and obtain approval from the executive director prior to initiating any of the following: any physical or operational modification of any

10. The following records should be maintained and

best management practices (BMPs) or structure(s), including but not limited to temporary or permanent ponds, dams, berms, silt fences, and diversionary structures: any change in the nature or character of the regulated activity from that which was

- originally approved any change that would significantly impact the ability to prevent pollution of the Edwards
- Aquifer: or any development of land previously identified as undeveloped in the approved contributing zone plan

BELL SC
CITY OF CEDAR PARK STANDARD PLAT NOTES: November 2, 2021
by the City of Cedar Park prior to any construction within the subdivision.
<ol> <li>An subdivision construction shall comove to the city of cedar Fark code of ordinances, construction standards, and generally accepted engineering practices.</li> <li>On-site storm water detention facilities will be provided to reduce post development pagk rates of</li> </ol>
discharge of the 2, 10, 25 and 100-yr. storm events.
4. The owner of this subdivision, and his or her successors and assigns, assumes responsibility for plans for construction of subdivision improvements which comply with applicable codes and requirements of the City of Cedar Park. The owner understands and acknowledges that plat vacation or replatting may be required, at the owner's sole expense, if plans to construct this subdivision do not comply with such codes and requirements.
5. No lot in this subdivision shall be occupied until connected to the City of Cedar Park water distribution and wastewater collection facilities.
6. This subdivision plat was approved and recorded before the construction and acceptance of streets and/or other subdivision improvements. The owner of this subdivision and his or her successors and assigns, are responsible for the construction of all streets, water systems, wastewater systems, and other facilities necessary to serve the lots within the subdivision.
7. Site development construction plans shall be reviewed and approved by the City of Cedar Park prior to any construction.
8. Wastewater and Water systems shall conform to TCEQ (Texas Commission on Environmental Quality) and State Board of Insurance requirements. The owner understands and acknowledges the plat vacation or re-platting may be required, at the owner's sole expense, if plans to develop this subdivision do not comply with such codes and requirements.
9. No buildings, fences, landscaping or other structures are permitted within drainage easements shown except as approved by the City of Cedar Park Public Works Department.
10. Property owner shall provide for access to drainage easements as may be necessary and shall not prohibit access by City of Cedar Park.
11. All easements on private property shall be maintained by the property owner or his or her assigns.
12. Fiscal surety for subdivision construction, in a form acceptable to the City of Cedar Park, shall be provided prior to plat approval by the Planning and Zoning Commission.
13. In addition to the easement shown hereon, a ten (10) foot wide public utility easement (P.U.E.) is hereby dedicated adjacent to street ROW on all lots. A five (5) foot wide P.U.E. is hereby dedicated along each side lot line. A seven and one half (7 ½) foot wide P.U.E. is hereby dedicated adjacent to all rear lot lines.
14. Community impact fees for individual lots to be paid prior to issuance of any building permits.
<ol> <li>Developer shall be responsible for all relocation and modifications to existing utilities.</li> <li>No portion of this tract is within a flood hazard area as shown on the Flood Insurance Rate Map Panels # 48491C0605F &amp; 48491C0610F, effective 12/20/2019.</li> </ol>
17. Temporary and permanent easements to be provided as required for off—site water, wastewater and drainage improvements.
18. All proposed access points and/or access easements intersecting with public roadway ROW shall be in compliance with City Access Standards as described in Chapter 14 of City Code.
19. This site is located within the Edwards Aquifer Contributing Zone. Development of this site will comply with all applicable TCEQ Edwards Aquifer rules.
21. Prior to subdivision/site plan approval, the Engineer shall submit to the City of Cedar Park (COCP) documentation of subdivision/site registration with the Texas Department of Licensing and Regulations (TDLR) and provide documentation of review and compliance of the subdivision construction plans with Texas Architectural Barriers Act (TABA).
22. All proposed fences and walls adjacent to intersecting public roadway right—of—way or adjacent to private access points shall be in compliance with City Code Section 14.05.007 Sight Distance Requirements. Installing a fence or wall which does not comply with the City's Sight Distance Requirements or Fencing Regulations is a violation of the City's Ordinance and may be punishable
23. No buildings, fences, retaining walls, signs, ponds, trees, parking lots, or other structures are permitted within any of the Public Water or Wastewater Easements shown on this plat except as approved by the City of Cedar Park Public Works Department.
ADDITIONAL PLAT NOTES: 1. Sidewalks shall be installed on the subdivision side of S. Bell Blvd (Hwy 183). Those sidewalks not abutting a residential, commercial or industrial lot shall be installed when the adjoining street is constructed. Where there are double frontage lots, sidewalks on the street to which access is prohibite

# TH COMMERCIAL SUBDIVISION REPLAT

10.344 ACRES OUT OF THE SAMUEL DAMON SURVEY ABSTRACT NO. 170 WILLIAMSON COUNTY, TEXAS

. This subdivision will be in full compliance with the Landscape and Tree Ordinance of the City of edar Park,Texas.

3. This subdivision shall comply with the Major Corridor Ordinance of the City of Cedar Park.

4. Prior to construction of any improvements on lots in this subdivision, building permits will be obtained from the City of Cedar Park.

5. All building lines shall conform to the City of Cedar Park Zoning Ordinance requirements.

6. This subdivision complies with the Cedar Park zoning ordinance.

7. Water and Wastewater services to be provided by the City of Cedar Park, Texas.

8. Prior to grading, any type of earth moving work, construction of, on or under the land in this subdivision, a drainage plan designed by a registered engineer shall be submitted for the purpose of development, and modification therefor to the City of Cedar Park for review and approval. It is further understood that the enforcement of the plat restrictions through appropriate legal procedure to prohibit the construction, connection of utilities or issuing permits unless or until the requirements of the plat restrictions have been achieved.

9. Driveways shall be located no closer than 60% of the parcels frontage, to the corner of intersecting right—of—way.

10. No Certificate of Occupancy (temporary or permanent) will be issued for any lot in this Subdivision until water and wastewater improvements to serve the lots have been constructed.

11. Access Provided with this subdivision will be in compliance with the recommendations of the City-Approved Traffic Impact Analysis and access points and connections will be appropriately provided with development.

12. Lot 1 of this Final Plat is required to provide and extend a construction and a cross access easement from Bell Blvd to the adjacent lot to the North. Lot 9 of this Final Plat is required to provided and extend a cross access easement from Bell Blvd to the adjacent lot to the South. The access easement(s) shall be provided at the time of platting, or by a separate instrument recorded with the County Clerk and referenced in the Final Plat which includes Lot 1 and/or Lot 9.

13. A construction and an access easement shall be provided across and between all lots of this subdivision with the Final Plat

14. Direct access to Bell Boulevard is prohibited from lots 2, 3, 4, 5, 6, 7, 9, & 10. Direct access to Bell Boulevard will only be permitted from lot 1 and from lot 8.

15. Development of Lot 10 shall provide and record an access easement by separate instrument extending from the access easement within lot 9 with access to Bell Boulevard and connecting to the access easement within the adjacent lot to the south with access to Little Elm Trail

LEGAL DESCRIPTION

BEING a 10.344 acre tract of land situated in the Samuel Damon Cedar Park, Williamson County, Texas, and being all of Lot 1, Block recorded in Document No. 2023009524 of the Official Public Records of the same property described in that Special Warranty Deed with Vendo LLC in Document No. 2023029877 of the Official Public Records of 10.378 acre tract of land being more particularly described as follo Texas Coordinate System of 1983, Central Zone:

BEGINNING: at a 1/2-inch iron rod found on the southwestern right-(variable width right-of-way) for the northernmost corner of the easternmost corner of a called 53.9395 acre tract of land describe Board of Trustees, Leander Independent School District in Document Public Records of Williamson County, Texas for the POINT OF BEGINNING this herein described tract;

THENCE: along the southwestern right—of—way line of U.S. Highway said Lot 1, Block A the following courses and distances;

1. South 3819'34" East a distance of 124.07 feet to a TxDot Type corner of U.S. Highway 183, a corner of the said Lot 1, Block A, for tract;

2. South 39°19'32" East a distance of 993.15 feet to a TxDot Type corner of U.S. Highway 183, a corner of the said Lot 1, Block A, for tract;

3. With a non-tangent curve to the right with a Delta angle of 06 and an Arc length of 328.06 feet having a Chord bearing of South 327.88 feet to a 1/2-inch iron rod with cap stamped "ATS Engineers" of the said Lot 1, Block A, the northernmost corner of Lot 2, Block A as recorded in Document No. 2013106218 of the Official Public Record the easternmost corner of this herein described tract;

THENCE: South 69°59'47" West a distance of 333.93 feet along the Block A, the northern line of the said Lot 2, Block A to a 5/8– "Quiddity Eng" set for the southernmost corner of the said Lot 1, Blo the said 53.9395 acre tract, for the southernmost corner of this here

THENCE: along the common line of the said Lot 1, Block A and following courses and distances;

1. With a non-tangent curve to the left with a Delta angle of 05' and an Arc length of 217.58 feet having a Chord bearing of North 3 217.51 feet to a 1/2-inch iron rod with broken orange cap found for A, a corner of the said 53.9395 acre tract, for a corner of this hereir 2. North 39'13'22" West a distance of 1116.43 feet to a 5/8-i "Quiddity Eng" set for the westernmost corner of the said Lot 1, Block 53.9395 acre tract, for the westernmost corner of this herein describe 3. North 50'37'37" East a distance of 325.22 feet to the POINT (area of 10.378 acres of land.

# JTH COMMERCIAL SUBDIVISION REPLAT

10.344 ACRES OUT OF THE SAMUEL DAMON SURVEY ABSTRACT NO. 170

WILLIAMSON COUNTY, TEXAS

STATE OF TEXAS

KNOW ALL MEN BY THESE PRESENTS: COUNTY OF WILLIAMSON §

I, Rex L. Hackett, Registered Professional Land Surveyor in the State of Texas, do hereby certify that this plat is true and correctly made from an actual survey made on the ground of the property legally described hereon, that all existing easements on or adjacent to the proposed subdivision are shown as noted in the most recent title survey or discovered with a title search prepared in conjunction with the most recent purchase of the property, and that there are no apparent discrepancies, conflicts, overlapping of improvements, visible utility lines or roads in place, except as shown on the accompanying plat, and that the corner monuments shown thereon were properly placed under my supervision in accordance with the subdivision regulations of the City of Cedar Park, Texas.

TO CERTIFY WHICH, WITNESS my hand and seal at Cedar Park, Williamson County, Texas,, this the _____ day of _____, 20__,

> Rex L. Hackett Registered Professional Land Survevor No. 5573 State of Texas

l, Gemsong N. Ryan, Registered Professional Engineer in the State of Texas, do hereby certify that this subdivision is in the Edwards Aquifer Contributing Zone and is not encroached by a Zone A flood area, as denoted herein, and as defined by Federal Emergency Management Administration Flood Hazard Boundary Map, Community Panel Numbers 48491C0605F & 48491C0610F, effective date 12/20/2019, and that each lot conforms to the City of Cedar Park regulations. The fully developed, concentrated stormwater runoff resulting from the one hundred (100) year frequency storm is contained within the drainage easements shown and/or public rights-of-way dedicated by this plat.

TO CERTIFY WHICH, WITNESS my hand and seal at Cedar Park, Williamson County, Texas,, this the _____ day of _____, 20__,

> Gemsong N. Ryan Registered Professional Engineer No. 99300

This subdivision to be known as **BELL SOUTH COMMERCIAL SUBDIVISION REPLAT** has been accepted and approved for filing of record with the County Clerk of Williamson County, Texas, according to the minutes of the meeting of the Cedar Park Planning and Zoning Commission on the ____ day of _____, 20^{_}___, A.D.

Ralph E. Strader, II, Chair

Date

Kimberly Bradford-Brown, Secretary

Date

I, Amy Link, Director of Development Services of the City of Cedar Park, Texas, do hereby certify attest and authorize this plat to be filed for record with the County Clerk of Williamson County, Texas.

Amy Link, AICP, Director of Development Services City of Cedar Park, Texas

SURVEY NOTES:

- 1. The survey shown hereon has been prepared as the result of an on the ground survey completed on June 8, 2023.
- 2. The bearings shown hereon are referenced to the Texas Coordinate System of 1983, Central Zone.
- 3. The recorded easements, setbacks and encumbrances shown hereon are from Schedule B of the commitment for title insurance issued by First American Title Insurance Company, GF No. 5025648-0204408e, issue date April 17, 2023. The Surveyor has relied upon the accuracy and completeness of the information described above and has made no independent investigation or search for this information.
- 4. Surveyor has not identified any geological or environmental conditions in connection with the subject property and Surveyor fully disclaims any and all responsibility related to issues or claims related thereto or resulting there from.
- By scaling the subject property onto the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) No.'s 48491C0605F & 48491C0610F, effective 12/20/2019, the subject property is in ZONE X (unshaded), defined as areas determined to be outside the 0.2% annual chance floodplain. The Surveyor makes no representation as to the accuracy of said FIRM, or that it is the most current published flood map.

STATE OF TEXAS § KNOW ALL MEN BY THESE PRESENTS: COUNTY OF WILLIAMSON §

I, Nancy Rister, Clerk of the County Court of said County, do hereby certify that the foregoing instrument in writing, with its certificate of authentication was filed for record in my office on the ____ day of _____, 20___, 20___, A.D., at ____ o'clock, __.M., and duly recorded this the ____ day of ______, 20___, A.D., at ____ o'clock, __.M., in the Official Public Records of said County in Document No. ______.

TO CERTIFY WHICH, WITNESS my hand and seal at the County Court of said County, at my office in Georgetown, Texas, the date last shown above written.

Nancy Rister, Clerk County Court of Williamson County, Texas

                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | on Media Be                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
