                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 100 yr                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |    

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |         

            

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |        

          

      

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

# Attachment N: Inspection, Maintenance, Repair, and Retrofit Plan

#### CZP - ATTACHMENT N

#### Inspection, Maintenance, Repair, and Retrofit Plan

Project:	S Bell Blvd Commercial
Address:	1005 S Bell Blvd.
City, State, Zip:	Cedar Park, Texas, 78613

#### **General Site Maintenance**

The following guidelines should be used as an inspection and maintenance plan that should be performed at least twice annually:

- (1) Identify, replant, and restore eroded areas. Add a level spreader, energy dissipation, or other repairs as required to ensure that erosion is not repeated.
- (2) Identify areas that do not have acceptable vegetated covers (80% or higher for most BMPs). Reseed, add soil, and irrigate as required to ensure that coverage requirements are met.
- (3) Mow sites twice annually and as required to keep grass height under 18 inches. Additional mowing may be performed for site aesthetics. Export clippings from site to prevent release of nutrients from decaying plant matter. Remove any woody growth, especially from embankments, berms, and swales. For swales, grass should not be regularly mowed below four inches.
- (4) Use non-chemical methods for maintaining health of vegetation. Pesticides, herbicides, or fertilizers should only be used as a last option, and then as minimally as possible. Fertilizer should rarely be required because runoff will typically contain sufficient nutrient loads.
- (5) Irrigation may be required in order to maintain acceptable levels of vegetated coverage, especially for engineered vegetated strips.
- (6) Never deposit grass clippings, brush, or other debris in BMPs or buffers.
- (7) Prevent over-compaction of BMP components that rely partially or wholly on infiltration (vegetation strips, bioretention bed, infiltration trenches and basins). Mowing and other maintenance should be performed with hand equipment or a light-weight lawn tractor.
- (8) Remove any built-up sediment and debris, especially along uphill edges, berms, swales, and level spreaders; and around BMP inlets and outlets
- (9) Identify any other problems. A detailed inspection may be required.

#### Sedimentation Basins

The level of accumulation shall be checked quarterly. If the depth of silt exceeds 6 inches, the silt shall be removed and properly disposed of.

#### **Filtration Basins**

The level of accumulation shall be checked quarterly. If the depth of silt exceeds 1/2 inch, or the drainage time exceeds 48 hours the silt shall be removed and properly disposed of.

The pollutants/oils accumulation shall be checked quarterly. If the pollutants have reduced the sand filter design capacity significantly, the pollutants shall be removed.

#### Routine Maintenance.

- *Mowing.* The side-slopes, embankment, and emergency spillway of the basin should be mowed at least twice a year to prevent woody growth and control weeds.
- Inspections. Sedimentation/filtration basins should be inspected at least twice a year (once during or immediately following wet weather) to evaluate facility operation. When possible, inspections should be conducted during wet weather to determine if the basin is functioning properly. There are many functions and characteristics of these BMPs that should be inspected. The embankment should be checked for subsidence, erosion, leakage, cracking, and tree growth. The condition of the emergency spillway should be checked. The inlet, barrel, and outlet should be inspected for clogging. The adequacy of upstream and downstream channel erosion protection measures should be checked. Stability of the side slopes should be checked. Modifications to the basin structure and contributing watershed should be evaluated. Cracks, voids and undermining should be patched/filled to prevent additional structural damage. Trees and root systems should be removed to prevent growth in cracks and joints that can cause structural damage. The inspections should be carried out with asbuilt pond plans in hand.
- Debris and Litter Removal. As part of periodic mowing operations and inspections, debris and litter should be removed from the surface of the basin. Particular attention should be paid to floatable debris around the riser, and the outlet should be checked for possible clogging.
- *Erosion Control.* The basin side slopes, emergency spillway, and embankment all may periodically suffer from slumping and erosion. Corrective measures such as regrading and revegetation may be necessary. Similarly, the riprap protecting the channel near the outlet may need to be repaired or replaced.

 Nuisance Control. Most public agencies surveyed indicate that control of insects, weeds, odors, and algae may be needed in some ponds. Nuisance control is probably the most frequent maintenance item demanded by local residents. If the ponds are properly sized and vegetated, these problems should be rare in wet ponds except under extremely dry weather conditions. Twice a year, the facility should be evaluated in terms of nuisance control (insects, weeds, odors, algae, etc.). Biological control of algae and mosquitoes using fish such as fathead minnows is preferable to chemical applications.

#### Non-routine maintenance.

• Structural Repairs and Replacement. Eventually, the various inlet/outlet and riser works in the sedimentation/filtration basin will deteriorate and must be replaced. Some public works experts have estimated that corrugated metal pipe (CMP) has a useful life of about 25 yr, while concrete barrels and risers may last from 50 to 75 yr. The actual life depends on the type of soil, pH of runoff, and other factors. Polyvinyl chloride (PVC) pipe is a corrosion resistant alternative to metal and concrete pipes. Local experience typically determines which materials are best suited to the site conditions. Leakage or seepage of water through the embankment can be avoided if the embankment has been constructed of impermeable material, has been compacted, and if anti-seep collars are used around the barrel. Correction of any of these design flaws is difficult.

#### **Basin Dewatering**

• A common sign of failure of some BMPs is standing water long after the rain event ends. This is especially true in sand filters, dry extended detention basins, and retention basins. In addition, wet ponds may also need to be drained for maintenance purposes. The water in each of these systems can be pumped into the storm drain conveyance system downstream of the BMP as long as it has been at least 48 hours since the last rain event. This delay usually provides sufficient time for most of the pollutants to settle out of the standing water; however, the discharge of sediment laden water is not allowed at any time. A wet basin that has been completely drained should not be left dry for an extended period of time. The wet basin should be refilled as soon as possible to prevent the clay liner from drying out.

The applicant is responsible for maintaining the permanent BMPs after construction until such time as the maintenance obligation is either assumed in writing by another's entity having ownership or control of the property (such as without limitation, an owner's association, new property owner or lessee, a district, or municipality) or the ownership of the property is transferred to the entity assumes such obligation in writing or ownership is transferred.

An amended copy of this document will be provided to the TCEQ within thirty days of any changes in the following information

#### **1.0** Contact Information

<u>Project Name and Location</u>: Name: S Bell Blvd Commercial Address: 1005 S Bell Blvd Cedar Park, TX 78613

Primary Operator Name and Address (Developer): Benny Nguyen Bell South Commercial, LLC 675 Bering Drive, Suite 500 Houston, TX 77057 Phone: 512-965-4200

<u>Texas Commission on Environmental Quality in the event of a significant spill:</u> https://www.tceq.texas.gov/response/spills Phone: 1-800-832-8224

#### 2.0 Site Description

#### a. Description of the Construction Activity:

The proposed S Bell Blvd Commercial project consists of 10.34 acres, to be developed into 10 commercial lots. The project will include the construction of two driveways, accompanying curbing, sidewalks, landscaping, drainage infrastructure, and sanitary lines. A water quality/detention pond will be built on an adjacent tract owned by Leander ISD.

#### b. Potential Pollutants and Sources:

The following substances are expected to be present onsite during construction: concrete, petroleum-based products, fuels, lubricants, detergents, wood, soil stabilizing additives, pesticides, acids, and concrete additives. The following are sources of the previous substances listed: construction equipment, construction materials, disturbed soil, and vehicles onsite.

#### c. Sequence of Major Activities:

Prior to beginning clearing and excavation, all SWPPP measures will be installed or constructed in accordance with this plan. The areas required for construction of improvements will then be cleared and stripped of vegetation. Underground utilities will be placed and backfilled. Immediately following the construction of underground utilities, the paving contractor will begin construction of driveways, parking, and trucking loading areas. The contractor will also construct the buildings' foundations after completion of underground utilities. After the foundation is poured, building construction will proceed which includes floor slabs, concrete wall panels, structural steel, roofing and interior equipment and finish.

#### d. Estimated Total Site and Disturbed Acreages:

The total area of the site (10.34 acres) and an additional 1.27 acres on the adjacent Tract 2 will be disturbed during construction of utilities, pond, and paving construction.

#### e. Vicinity Map:

A vicinity map is attached. See Exhibit B.

#### f. Detailed Site Map:

See Exhibit C (Grading Plan). Detailed site maps reference the following: drainage patterns and approximate slopes anticipated after major grading activities; areas where soil disturbance will occur; locations of all major structural controls either planned or in place; locations where temporary or permanent stabilization practices are expected to be used; locations of construction support activities, including material, waste, borrow, fill, or equipment storage areas; surface waters at, adjacent to, or in close proximity to the site; locations where storm water discharges from the site directly to a surface water body or a municipal separate storm system; and vehicle wash areas.

#### g. Support Activities:

Expected support activities include equipment staging and materials storage areas. Equipment staging and materials storage areas will be located on-site.

#### h. Name of Receiving Water and Extend of Wetlands:

The project site is located in the Brushy Creek-Turkey Creek watershed & contributing zone of the Edwards Aquifer.

#### i. Notice of Intent and Site Notice:

NOI and Construction Site Notices are included in Appendix B.

#### j. Endangered or Threatened Species or Critical Habitats:

Federally and State listed endangered and threatened species for Williamson County as listed by the Texas Parks and Wildlife Department are included in Appendix C.

#### k. Historical Places:

The storm water discharge and related activities will not affect properties listed or eligible for listing on the National Registry of Historic Places.

#### 3.0 Best Management Practices

#### a. **General Requirements:**

Sediment will be retained on-site to the maximum extent practicable.

Control measures will be properly selected, installed, and maintained in accordance with manufacturer's specifications and good engineering practice. If damaged or rendered ineffective during site development, erosion and sediment controls will be repaired or replaced immediately.

Controls will minimize the offsite transport of litter, construction debris, and construction materials.

Major erosion and sediment controls are shown on the Storm Water Pollution Prevention Site Plan, Exhibit D.

#### b. Erosion Control and Stabilization Practices:

- (1) Erosion Control and Stabilization Practices
  - (A) Filter fabric fencing or rock berms will be placed around the perimeter of the site and proposed interceptor structures upon their construction and shall remain until the owner accepts the project or as is deemed necessary to prevent discharge to the receiving water. The location of these SWPPP measures are shown on the Storm Water Pollution Prevention Site Plan (Exhibit D) or as directed by the Engineer.

- (B) Sedimentation Basins and Diversion Dams may be used to direct and control site runoff where drainage areas exceed 10 acres. These measures, shown on Exhibit D, are placed in so that all site runoff during the construction phase of the project are directed towards these facilities to prevent sediment runoff.
- (C) Filter fabric fencing or approved other will be maintained on either side of existing inlets where runoff from this construction site might enter the storm sewer system. The location of these fences is shown on the Storm Water Pollution Prevention Site Plan (Exhibit D) or as directed by the Engineer.
- (D) Upon their construction, the lower stage of inlets will be covered with a timber grate and filter fabric.
- (E) After paving is constructed, provide an approved inlet protection measure as provided in the plans.
- (F) Hydro-mulch or seeding will be applied to disturbed areas after completion of construction of the facilities.
- (G) Seeding may be applied, in lieu of hydro-mulch, to portions of the site after final grading.
- (2) Record of Erosion Control and Stabilization Practices

The Operator will maintain record of: dates of major grading activities, dates when construction temporarily or permanently ceases on a portion of the site, and the dates when stabilization measures are initiated.

- (3) If the interim period between construction of utilities and paved areas will be more than 21 days, the paved area location will be mulched or otherwise stabilized within 14 days.
- (4) After paving completion, newly graded areas and all exposed soils will be completely stabilized.
- (5) Final stabilization will be achieved prior to termination of permit coverage.

#### c. <u>Sediment Control Practices:</u>

- (1) Silt fences, vegetative buffer strips, or equivalent sediment controls are provided where deemed appropriate as shown on the Storm Water Pollution Prevention Site Plan, Exhibit D.
- (2) Where the disturbed area is larger than 10 acres a sedimentation basin is required.
- (3) Filter fabric fence or rock berms will be set up prior to the commencement of excavation and temporary stockpiling operations. All surplus excavated material will be hauled off-site and disposed of in a suitable manner.
- (4) All disturbed soils will be hydro-mulch or seeded. When all construction activity is complete and the site is stabilized, temporary structural controls will be removed, and soils disturbed by their removal will be re-seeded.

#### 4.0 Other Required Controls and BMPs

#### a. Offsite Vehicle Tracking:

A stabilized construction entrance may be provided to help reduce vehicle tracking of sediments. The paved streets adjacent to the site entrance will be cleaned daily, if necessary, to remove any excess mud, dirt, or rock tracked from the site.

#### b. Dust Control and Street Cleaning:

Dust will be minimized by using water trucks to keep the ground moist, if necessary. Watering will be limited to prevent excessive runoff of water from dust control. Silt fencing will prevent water from this activity from washing dust into the storm drain. For sediment accumulations on new internal paved surfaces, as well as off-site accumulations, using sweepers or other devices to remove sediment by creating airborne dust and sediment is not acceptable. The accumulations must be cleaned up by hand, or with a vacuum truck. Sediment removed by hand can be returned to the site provided it is placed behind an adequate control device such as a filter fence. Under no circumstances will sediment be washed, shoveled, or otherwise introduced into a drainage system during clean up.

The paved streets adjacent to the site entrance will be cleaned as necessary to remove any excess mud, dirt, or rock tracked from the site.

#### c. Construction and Waste Materials:

#### Construction Materials Waste

All waste materials will be collected, stored and disposed of in a securely lidded metal dumpster. The dumpster will meet all local and state solid waste management regulations. No construction waste material will be buried onsite. All personnel will be instructed regarding the correct procedure for waste disposal.

#### Hazardous Waste

No hazardous waste is expected to be generated or encountered in this project. In the event that hazardous waste is encountered, the Owner will be notified immediately. All hazardous waste materials will be disposed of in the manner specified by local or state regulations or by the manufacturer.

#### Sanitary Waste

All sanitary waste will be regularly collected from portable units.

#### Spill Prevention

<u>Texas Commission on Environmental Quality in the event of a significant spill:</u> https://www.tceq.texas.gov/response/spills Phone: 1-800-832-8224

In Texas, upon determining that a reportable discharge or spill has occurred, the responsible person must notify the state. The threshold quantity that triggers the requirement to report a spill is called the reportable quantity (RQ). The reportable quantity depends on the type of substance released and where released (e.g. into water vs. on land); different kinds of spills are subject to different provisions of state and federal rules.

Kind of spill	Where discharged	Reportable quantity	Rule, statute, or responsible agency
Hazardous substance	onto land	"Final RQ" in Table 302.4 in <b>40 CFR 302.4</b> & (PDF)	30 TAC 327®
	into water	"Final RQ" or 100 lbs, whichever is <b>less</b>	
Any oil	coastal waters	as required by the Texas General Land Office	Texas General Land Office∦
Crude oil, oil that is neither a petroleum product nor used oil	onto land	210 gallons (five barrels)	30 TAC 327@
	directly into water	enough to create a sheen	
Petroleum product, used oil	onto land, from an exempt PST facility	210 gallons (five barrels)	30 TAC 327@
	onto land, or onto land from a non-exempt PST facility	25 gallons	
	directly into water	enough to create a sheen	
Associated with the exploration, development and production of oil, gas, or geothermal resources	under the jurisdiction of the Railroad Commission of Texas	as required by the Railroad Commission of Texas	Railroad Commission of Texas&
Industrial solid waste or other substances	into water	100 lbs	30 TAC 327&
From petroleum storage tanks, underground or aboveground	into water	enough to create a sheen on water	<b>30 TAC 334</b> @.75-81
From petroleum storage tanks, underground or aboveground	onto land	25 gallons or equal to the RQ under <b>40 CFR</b> <b>302</b> ₆ 9	30 TAC 327@
Other substances that may be useful or valuable and are not ordinarily considered to be waste, but will cause	into water	100 lbs	30 TAC 327@

pollution if discharged into water in the state

The following are the material management practices that will be used to reduce the risk of spills or other accidental exposure of the materials and substances described above to storm water runoff.

#### Good Housekeeping

The following good housekeeping practices will be followed onsite during the construction project.

1. An effort will be made to store only enough product required to do the job.

- 2. All materials stored onsite will be stored in a neat, orderly manner in their appropriate containers and, if possible, under a roof or other enclosure.
- 3. Products will be kept in their original containers with the original manufacturer's label.
- 4. Substances will not be mixed with one another unless recommended by the manufacturer.
- 5. Whenever possible, all of a product will be used up before disposing of the container.
- 6. Manufacturers' recommendations for proper use and disposal will be followed.
- 7. The site superintendent will inspect daily to ensure proper use and disposal of materials onsite.
- 8. All litter, trash, and floatable debris will be contained.

#### Hazardous Products

These practices will be used to reduce the risks associated with hazardous materials, if hazardous materials are used.

- 1. Products will be kept in original containers unless they are not resealable.
- 2. Original labels and material safety data will be retained.
- 3. If surplus product must be disposed of, manufacturers' or local and state recommended methods for proper disposal will be followed.

#### Product Specific Practices

The product specific practices to be followed are listed in Appendix D.

#### Spill Prevention Practices

The spill prevention practices to be followed are listed in Appendix D.

#### Concrete Truck Wash Out

Concrete trucks will not be allowed to wash out or discharge surplus concrete or drum wash water on the site, unless they are using a properly designed and designated concrete washout area.

- a. Concrete truck wash out must not directly discharge to surface water or storm sewers.
- b. Concrete truck washout should be discharged to areas at the construction site where minimal slope allows infiltration and filtering of wash out water or structural controls have been established to prevent direct discharge to surface waters.
- c. Concrete truck washout during rainfall events should be minimized. The Operator will ensure BMPs in-place are sufficient to prevent the discharge of concrete wash out in rainfall events.
- d. Discharge of concrete truck wash out water should not cause or contribute to groundwater contamination.

#### d. Non-Construction Pollutant Sources:

There are no potential pollutant sources associated with industrial activities other than the construction activities described in sections 1.0.b and 8.0.

#### e. <u>Velocity Dissipation Devices:</u>

Velocity dissipation devices will be installed as needed as defined by local site conditions.

#### f. Controls for Pumping or Channeling Standing Water Onsite

When dewatering (pumping) the site, the sediment-laden discharge will be detained for a sufficient time to allow the majority of the sediment to settle out. Direct discharge into a storm sewer or off-site channel will not be allowed.

#### 5.0 Approved State or Local Plans

This work is to be completed under TPDES General Permit TXR150000, effective March 5, 2018.

The Storm Water Pollution Prevention Plan will be updated as necessary by the Operator to remain consistent with any changes applicable to protecting surface water resources.

#### 6.0 Maintenance

The following is a list of erosion control, sediment control, and stabilization practices implemented on this project that require maintenance:

Stabilization of construction access area. Hydro-mulch seeding/ broadcast seeding. Filter fabric fences/ rock berms. Inlet protection. Sediment Basins. To maintain the above practices, the following will be performed:

Maintenance and repairs will be conducted within 24 hours of inspection report (see Section 8.0 below).

Erosion and sediment control measures that have been improperly installed or have been disabled, run-over, removed, or otherwise rendered ineffective must be replaced or corrected immediately.

Sediment will be removed from behind the sediment fences when it becomes about 1/3 the height of the fence.

Sediment will be removed from around inlet barriers and dikes when the storage capacity has been approximately 50% filled.

If sediment leaves the site, accumulations must be removed such that offsite impacts are minimized.

#### 7.0 Inspections

- (a) The contractor will designate a qualified person or persons to perform the following inspections:
  - (1) Disturbed areas, areas used for storage of materials that are exposed to precipitation, discharge locations, and structural controls will be inspected for evidence of, or the potential for, pollutants entering the drainage system.
  - (2) Erosion and sediment control measures identified in the plan will be observed to ensure that they are operating correctly.
  - (3) Where discharge locations or points are accessible, they will be inspected to ascertain if erosion control measures are effective in preventing significant impacts to receiving waters.
  - (4) Locations where vehicles enter or exit the site will be inspected for evidence of offsite sediment tracking.

(5) Erosion and sediment control measures that have been improperly installed or have been disabled, run-over, removed, or otherwise rendered ineffective must be replaced or corrected immediately.

The inspection will be conducted by the responsible person at least once every seven (7) calendar days and within 24 hours after a storm of 0.5 inch or greater.

After a portion of the site is finally stabilized, inspection will be conducted at least once every month.

- (b) Based on the results of the inspections, the SWPPP will be modified as necessary to better control pollutants in runoff. Necessary revisions to the SWPPP are to be completed within 7 calendar days following the inspection. Revisions should include an implementation schedule for additional or modified BMPs.
- (c) For each inspection, a report summarizing the scope of the inspection, name(s) and qualifications of personnel making the inspection, the date(s) of the inspection, major observations will be made and retained as part of the storm water pollution plan for at least three years from the date that the site is finally stabilized. Major observations include: implementation of the storm water pollution prevention plan, actions taken in accordance with item "(b)" above, locations of discharges of sediment or other pollutants from the site, location of BMPs that failed to operate as designed or proved inadequate for a particular location, and locations where additional BMPs are needed. The personnel making the inspections will sign these reports in accordance with 30 TAC § 305.128, see the included form.

Copies of the forms to be used for the Inspection and Maintenance report are included in the following pages as a part of this "SWPPP."

#### 8.0 Non-Storm Water Discharges

Appropriate pollution prevention measures must be implemented for eligible non-storm water components of the discharge from the site including: discharges from firefighting activities, water from routine external washing of vehicles without soaps and detergents, water used for dust control, uncontaminated air conditioning condensate, uncontaminated groundwater, irrigation.

#### 9.0 Responsibility of Operators

Primary and Secondary Operators with Control Over Construction Plans and Specifications. Also see Appendix E.

- (a) ensure the project specifications allow or provide that adequate BMPs are developed to meet the requirements of Part III of TPDES General Permit TXR150000, effective March 5, 2018.
- (b) ensure that the SWPPP indicates the areas of the project where Operators have control over project specifications, including the ability to make modifications in specifications.
- (c) ensure all other operators affected by modifications in project specifications are

notified in a timely manner so that those operators may modify their BMPs as necessary to remain compliant with the conditions of TPDES General Permit TXR150000, effective March 5, 2018.

(d) ensure that the SWPPP for portions of the project where they are operators indicates the name and site specific TPDES authorization numbers for permittees with the dayto-day operational control over those activities necessary to ensure compliance with the SWP3 and other permit conditions. If the Operator with day-to-day operational control has not been authorized or has abandoned the site, the Operator with control over project specifications is considered to be the responsible party until the authority is transferred to another party and the SWP3 is updated.

A. Web Soil Survey

United States Department of Agriculture

Natural Resources Conservation

Service

A product of the National Cooperative Soil Survey, a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local participants

# Custom Soil Resource Report for Williamson County, Texas

## Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (https://offices.sc.egov.usda.gov/locator/app?agency=nrcs) or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/? cid=nrcs142p2_053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

## **How Soil Surveys Are Made**

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil

scientists classified and named the soils in the survey area, they compared the individual soils with similar soils in the same taxonomic class in other areas so that they could confirm data and assemble additional data based on experience and research.

The objective of soil mapping is not to delineate pure map unit components; the objective is to separate the landscape into landforms or landform segments that have similar use and management requirements. Each map unit is defined by a unique combination of soil components and/or miscellaneous areas in predictable proportions. Some components may be highly contrasting to the other components of the map unit. The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The delineation of such landforms and landform segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map. The frequency of observation is dependent upon several factors, including scale of mapping, intensity of mapping, design of map units, complexity of the landscape, and experience of the soil scientist. Observations are made to test and refine the soil-landscape model and predictions and to verify the classification of the soils at specific locations. Once the soil-landscape model is refined, a significantly smaller number of measurements of individual soil properties are made and recorded. These measurements may include field measurements, such as those for color, depth to bedrock, and texture, and laboratory measurements, such as those for content of sand, silt, clay, salt, and other components. Properties of each soil typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of characteristics for the components. The aggregated values are presented. Direct measurements do not exist for every property presented for every map unit component. Values for some properties are estimated from combinations of other properties.

While a soil survey is in progress, samples of some of the soils in the area generally are collected for laboratory analyses and for engineering tests. Soil scientists interpret the data from these analyses and tests as well as the field-observed characteristics and the soil properties to determine the expected behavior of the soils under different uses. Interpretations for all of the soils are field tested through observation of the soils in different uses and under different levels of management. Some interpretations are modified to fit local conditions, and some new interpretations are developed to meet local needs. Data are assembled from other sources, such as research information, production records, and field experience of specialists. For example, data on crop yields under defined levels of management are assembled from farm records and from field or plot experiments on the same kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on such variables as climate and biological activity. Soil conditions are predictable over long periods of time, but they are not predictable from year to year. For example, soil scientists can predict with a fairly high degree of accuracy that a given soil will have a high water table within certain depths in most years, but they cannot predict that a high water table will always be at a specific level in the soil on a specific date.

After soil scientists located and identified the significant natural bodies of soil in the survey area, they drew the boundaries of these bodies on aerial photographs and
identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.

# Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

## Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or

landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

## Williamson County, Texas

#### DnB—Denton silty clay, 1 to 3 percent slopes

#### **Map Unit Setting**

National map unit symbol: 2t26l Elevation: 570 to 1,870 feet Mean annual precipitation: 31 to 36 inches Mean annual air temperature: 65 to 68 degrees F Frost-free period: 220 to 260 days Farmland classification: All areas are prime farmland

#### **Map Unit Composition**

Denton and similar soils: 88 percent Minor components: 12 percent Estimates are based on observations, descriptions, and transects of the mapunit.

#### **Description of Denton**

#### Setting

Landform: Hillslopes Landform position (two-dimensional): Toeslope Landform position (three-dimensional): Base slope Down-slope shape: Convex Across-slope shape: Linear Parent material: Silty and clayey slope alluvium over residuum weathered from limestone

#### **Typical profile**

A - 0 to 14 inches: silty clay Bw - 14 to 25 inches: silty clay Bk - 25 to 33 inches: silty clay Ck - 33 to 36 inches: gravelly silty clay R - 36 to 80 inches: bedrock

#### **Properties and qualities**

Slope: 1 to 3 percent
Depth to restrictive feature: 22 to 60 inches to lithic bedrock
Drainage class: Well drained
Runoff class: High
Capacity of the most limiting layer to transmit water (Ksat): Moderately low to moderately high (0.06 to 0.20 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Calcium carbonate, maximum content: 80 percent
Maximum salinity: Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)
Available water supply, 0 to 60 inches: Low (about 4.3 inches)

#### Interpretive groups

Land capability classification (irrigated): None specified Land capability classification (nonirrigated): 3s Hydrologic Soil Group: D Ecological site: R081CY357TX - Clay Loam 29-35 PZ Hydric soil rating: No

#### **Minor Components**

#### Krum

Percent of map unit: 6 percent Landform: Drainageways Landform position (two-dimensional): Toeslope Landform position (three-dimensional): Tread Down-slope shape: Linear Across-slope shape: Concave Ecological site: R081CY357TX - Clay Loam 29-35 PZ Hydric soil rating: No

#### Doss

Percent of map unit: 4 percent Landform: Hillslopes Landform position (two-dimensional): Backslope Landform position (three-dimensional): Side slope Down-slope shape: Convex Across-slope shape: Linear Ecological site: R081BY343TX - Shallow 23-31 PZ Hydric soil rating: No

#### Anhalt

Percent of map unit: 2 percent Landform: Hillslopes Landform position (two-dimensional): Toeslope Landform position (three-dimensional): Base slope Down-slope shape: Linear Across-slope shape: Linear Ecological site: R081CY358TX - Deep Redland 29-35 PZ Hydric soil rating: No

#### EaD—Eckrant cobbly clay, 1 to 8 percent slopes

#### Map Unit Setting

National map unit symbol: 2t0sg Elevation: 650 to 1,900 feet Mean annual precipitation: 30 to 35 inches Mean annual air temperature: 65 to 69 degrees F Frost-free period: 210 to 250 days Farmland classification: Not prime farmland

#### **Map Unit Composition**

*Eckrant and similar soils:* 85 percent *Minor components:* 15 percent *Estimates are based on observations, descriptions, and transects of the mapunit.* 

#### **Description of Eckrant**

#### Setting

Landform: Ridges Landform position (two-dimensional): Summit, shoulder, backslope Landform position (three-dimensional): Interfluve, side slope Down-slope shape: Convex Across-slope shape: Convex Parent material: Residuum weathered from limestone

#### **Typical profile**

A1 - 0 to 4 inches: cobbly clay

A2 - 4 to 11 inches: very cobbly clay

R - 11 to 80 inches: bedrock

#### **Properties and qualities**

Slope: 1 to 8 percent
Surface area covered with cobbles, stones or boulders: 2.3 percent
Depth to restrictive feature: 4 to 20 inches to lithic bedrock
Drainage class: Well drained
Runoff class: Medium
Capacity of the most limiting layer to transmit water (Ksat): Moderately low to moderately high (0.06 to 0.57 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Calcium carbonate, maximum content: 10 percent
Maximum salinity: Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)
Sodium adsorption ratio, maximum: 1.0
Available water supply, 0 to 60 inches: Very low (about 1.0 inches)

#### Interpretive groups

Land capability classification (irrigated): None specified Land capability classification (nonirrigated): 6s Hydrologic Soil Group: D Ecological site: R081CY360TX - Low Stony Hill 29-35 PZ Hydric soil rating: No

#### **Minor Components**

#### Brackett

Percent of map unit: 7 percent Landform: Ridges Landform position (two-dimensional): Backslope Landform position (three-dimensional): Side slope Down-slope shape: Convex Across-slope shape: Convex Ecological site: R081CY355TX - Adobe 29-35 PZ Hydric soil rating: No

#### Bexar

Percent of map unit: 5 percent Landform: Ridges Landform position (two-dimensional): Footslope Landform position (three-dimensional): Base slope Down-slope shape: Linear Across-slope shape: Linear Ecological site: R081CY361TX - Redland 29-35 PZ Hydric soil rating: No

#### Krum

Percent of map unit: 3 percent Landform: Ridges Landform position (two-dimensional): Toeslope Landform position (three-dimensional): Base slope Down-slope shape: Linear Across-slope shape: Linear Ecological site: R081CY357TX - Clay Loam 29-35 PZ Hydric soil rating: No

#### EeB—Eckrant stony clay, 0 to 3 percent slopes, stony

#### Map Unit Setting

National map unit symbol: djpv Elevation: 650 to 1,320 feet Mean annual precipitation: 30 to 35 inches Mean annual air temperature: 65 to 69 degrees F Frost-free period: 210 to 250 days Farmland classification: Not prime farmland

#### Map Unit Composition

*Eckrant, stony, and similar soils:* 85 percent *Minor components:* 15 percent *Estimates are based on observations, descriptions, and transects of the mapunit.* 

#### **Description of Eckrant, Stony**

#### Setting

Landform: Ridges Landform position (two-dimensional): Summit, shoulder Landform position (three-dimensional): Interfluve Down-slope shape: Convex Across-slope shape: Convex Parent material: Residuum weathered from limestone

#### **Typical profile**

A1 - 0 to 4 inches: stony clay A2 - 4 to 11 inches: extremely stony clay R - 11 to 80 inches: bedrock

#### **Properties and qualities**

Slope: 0 to 3 percent Surface area covered with cobbles, stones or boulders: 0.0 percent Depth to restrictive feature: 4 to 20 inches to lithic bedrock Drainage class: Well drained Runoff class: Medium

#### **Custom Soil Resource Report**

Capacity of the most limiting layer to transmit water (Ksat): Moderately low to moderately high (0.06 to 0.57 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Calcium carbonate, maximum content: 10 percent
Maximum salinity: Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)
Sodium adsorption ratio, maximum: 1.0
Available water supply, 0 to 60 inches: Very low (about 0.8 inches)

#### Interpretive groups

Land capability classification (irrigated): None specified Land capability classification (nonirrigated): 6s Hydrologic Soil Group: D Ecological site: R081CY360TX - Low Stony Hill 29-35 PZ Hydric soil rating: No

#### Minor Components

#### Georgetown

# Signed Agent Authorization (TCEQ-0599)

Agent Authorization Form For Required Signature Edwards Aquifer Protection Program Relating to 30 TAC Chapter 213			
Sha	ine Rotter		
Enviro	nmental Project Planner		
of	Title - Owner/President/Other		
	Corporation/Partnership/Entity Name		
have authorized	Joshua V. Elledge Print Name of Agent/Engineer		
of	Quiddity Engineering Print Name of Firm		

to represent and act on the behalf of the above named Corporation, Partnership, or Entity for the purpose of preparing and submitting this plan application to the Texas Commission on Environmental Quality (TCEQ) for the review and approval consideration of regulated activities.

I also understand that:

- 1. The applicant is responsible for compliance with 30 Texas Administrative Code Chapter 213 and any condition of the TCEQ's approval letter. The TCEQ is authorized to assess administrative penalties of up to \$10,000 per day per violation.
- 2. For those submitting an application who are not the property owner, but who have the right to control and possess the property, additional authorization is required from the owner.
- 3. Application fees are due and payable at the time the application is submitted. The application fee must be sent to the TCEQ cashier or to the appropriate regional office. The application will not be considered until the correct fee is received by the commission.
- 4. A notarized copy of the Agent Authorization Form must be provided for the person preparing the application, and this form must accompany the completed application.
- 5. No person shall commence any regulated activity on the Edwards Aquifer Recharge Zone, Contributing Zone or Transition Zone until the appropriate application for the activity has been filed with and approved by the Executive Director.

# Appendix

A. Development Agreement

#### <u>DEVELOPMENT AGREEMENT</u> (for Shared Detention and Drainage Facilities)

THIS DEVELOPMENT AGREEMENT (for Shared Detention and Drainage Facilities) (this "<u>Agreement</u>") is made to be effective on the date of the last to sign below, by and between **LEANDER INDEPENDENT SCHOOL DISTRICT** ("<u>LISD</u>") and **BELL SOUTH COMMERCIAL, LLC**, a Texas limited liability company ("<u>Bell South</u>"). LISD and Bell South are sometimes collectively referred to herein as the "<u>Owners</u>".

#### **RECITALS**

A. LISD is the fee simple owner of certain real property located in Williamson County, Texas, as indicated and labeled on **Exhibit "A"** attached hereto (the "**LISD Property**").

B. Bell South is the fee simple owner of certain real property located in Williamson County, Texas, as indicated and labeled on **Exhibit "B"** attached hereto (the "<u>Bell South</u> <u>Property</u>").

C. LISD intends to construct school facilities on the LISD Property. However, in order to construct such facilities, LISD will be required to design and construct a detention and drainage facility on the LISD Property. Bell South intends to develop the Bell South Property into a commercial development. However, in order to develop such property, Bell South would be required to design and construct a detention and drainage facility on the Bell South Property.

D. The Owners believe that a shared detention and drainage facility would greatly reduce the overall cost of constructing and maintaining such facilities to each Owner, thus providing a great benefit to the taxpayers of LISD.

E. LISD and Bell South desire to memorialize their agreements regarding the foregoing.

NOW, THEREFORE, for a good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, the parties hereto covenant and agree as follows:

1. **Detention and Drainage Easement**. LISD shall grant to Bell South a perpetual easement for a stormwater drainage, detention, and water quality pond on the LISD Property in the approximate location shown on the attached **Exhibit "C"**, and for construction, operation and maintenance of a joint stormwater facility. Bell South shall grant to LISD a perpetual easement for stormwater drainage across the Bell South Property for an outfall storm sewer/drainage channel for outfall from the pond toward Highway 183, in a location chosen by Bell South that is both suitable for the intended development of the Bell South Property, and for the efficient functioning of the pond. The easements shall be collectively contained within a Stormwater Easement to be executed and agreed by both Owners. The pond and all associated drainage facilities shall be referred to herein as the "**Facilities**". The Stormwater Easement to be executed must provide for the following:

- a) Agreement on the actual location and size of all property within the easement areas described in the Stormwater Easement (with all detention pond and maintenance berms intended to be located within the LISD Property);
- b) Agreement on the design of the Facilities, which must meet all governmental regulations and requirements;
- c) Agreement on the maximum impervious cover or land area for which each Owner is entitled to convey stormwater into the Facilities;
- d) If desired by either Owner, a description by each Owner of that Owner's tract that is entitled to use the Facilities and is benefitted by the Stormwater Easement;
- e) Provisions for accessing the Facilities for ongoing maintenance;
- f) Bell South shall be responsible for all design, permitting, and construction of the Facilities, and all the costs thereof. Construction of the Facilities shall be started and completed in one phase;
- g) Construction contract must provide protection to LISD for work to be performed on LISD Property, including standard provisions for insurance, as well as payment and performance bond, and indemnification provisions;
- b) Bell South shall be responsible for the maintenance of the Facilities, and 100% of the cost thereof, without participation by LISD. Maintenance obligations may be assigned by Bell South to a property owners association created for the benefit of the Bell South Property without LISD consent;
- i) Subordination agreement of any lienholders of the Bell South Property and the LISD Property, if any;
- j) Termination of the Stormwater Easement if the Facilities have not been constructed within two years from the effective date of the Stormwater Easement. Reasonable provisions for notice and opportunity to cure shall be provided.

2. <u>Time for Performance</u>. LISD and Bell South shall use commercially reasonable efforts to agree upon the provisions of the Stormwater Easement, and then execute and record same in the real property records of Williamson County, Texas. The LISD Superintendent shall have the authority to negotiate and execute the Stormwater Easement and all related documents on behalf of LISD. This Agreement shall automatically terminate if the Stormwater Easement has not been executed within one year from the effective date hereof.

3. <u>Expenses of Conveyance</u>. LISD and Bell South shall each be responsible for the costs of their consultants (attorneys, engineers, etc.). However, any closing costs (such as recording fees or desired title policy) shall be the responsibility of Bell South.

4. **<u>Right of Entry</u>**. LISD shall provide Bell South with a right of entry on the LISD Property to perform the necessary design, surveying, and other matters related to the Stormwater

Easement prior to actual execution of the Stormwater Easement. LISD may require reasonable entry rules, such as execution of an indemnification agreement and/or insurance, prior to such entry.

5. <u>Assignment</u>. Bell South may not assign this Agreement without the express, written approval of LISD.

6. <u>Notice</u>. All formal notices and demands hereunder shall be in writing and shall be delivered by personal delivery, overnight mail or delivery service, or United States certified mail, return receipt requested, postage or delivery charges prepaid, addressed as follows:

#### If to LISD:

Leander Independent School District Attn: Bruce Gearing, Superintendent P. O. Box 218 Leander, Texas 78646-0218

With copy to:

Jimmy Disler Leander Independent School District P. O. Box 218 Leander, Texas 78646-0218 jimmy.disler@leanderisd.org

#### If to Bell South :

Bell South Commercial, LLC Attn: Benny Nguyen 675 Bering Drive, Suite 500 Houston, Texas 77057 benny@halonare.com

or to such other address as either party may from time to time designate by notice in writing to the other party. Any such formal notice or demand or communications shall be deemed to have been delivered and received as of the date (i) personally delivered, or (ii) three business days after deposit in the United States certified mail, return receipt requested, or (iii) the next business day after deposit with an overnight delivery service. Refusal by any party to accept delivery shall constitute delivery hereunder. Standard communications between the parties may be conducted by email at the email addresses listed above.

7. <u>Governing Law</u>. This Agreement shall be governed by and construed in accordance with the laws of the State of Texas. Venue shall be in Williamson County, Texas.

8. <u>Counterparts and Amendments</u>. This Agreement may be executed simultaneously in two or more counterparts, each of which shall be deemed to constitute an original. Amendments must be in writing and executed by both Owners.

9. <u>HB 1295 Compliance and No Boycott</u>. Bell South shall verify compliance with HB 1295 and No Boycott requirements of state law, attached and Exhibit "D".

#### EXHIBIT "D"

#### HB 1295 COMPLIANCE AND NO BOYCOTT PROVISIONS+

#### A. HB 1295 Compliance.

+

+

Section 2252.908 of the Texas Government Code requires that for certain types of contracts, the Owner must fill out a conflict-of-interest form ("Disclosure of Interested Parties") and file with the Texas Ethics Commission at the time the signed contract is submitted to the City. For further information please go to the Texas Ethics Commission website via the following link. https://www.ethics.state.tx.us/whatsnew/elf info form1295.htm. +

#### B. No Boycott of Israel; No Terrorist Organization.

Pursuant to Section 2270.002, Texas Government Code, the Owner hereby represents that it and its parent company, wholly- or majority-owned subsidiaries, and other affiliates, if any, do not boycott Israel and, to the extent this Indenture is a contract for goods or services, will not boycott Israel during the term of this Indenture. The foregoing verification is made solely to comply with Section 2270.002, Texas Government Code, and to the extent such Section does not contravene applicable Federal law. As used in the foregoing verification, "boycott Israel" means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes. +

The Owner understands "affiliate" to mean an entity that controls, is controlled by, or is under common control with the Owner and exists to make a profit. +

Pursuant to Subchapter F, Chapter 2252, Texas Government Code, the Owner represents that neither it nor any of its parent company, wholly- or majority-owned subsidiaries, and other affiliates is a company identified on a list prepared and maintained by the Texas Comptroller of Public Accounts under Section 2252.153 or Section 2270.0201, Texas Government Code, and posted on any of the following pages of such officer's internet website: +

https://comptroller.texas.gov/purchasing/docs/sudan-list.pdf, + https://comptroller.texas.gov/purchasing/docs/iran-list.pdf, or + https://comptroller.texas.gov/purchasing/docs/fto-list.pdf. +

The foregoing representation is made solely to comply with Section 2252.152, Texas Government Code, and to the extent such Section does not contravene applicable Federal law and excludes the Owner and each of its parent company, wholly- or majority-owned subsidiaries, and other affiliates, if any, that the United States government has affirmatively declared to be excluded from its federal sanctions regime relating to Sudan or Iran or any federal sanctions regime relating to a foreign terrorist organization. The Owner understands "affiliate" to mean any entity that controls, is controlled by, or is under common control with the Owner and exists to make a profit. +

#### C. Verification Regarding Energy Company Boycotts.

To the extent this Agreement constitutes a contract for goods or services for which a written verification is required under Section 2274.002, Texas Government Code, (as added by Senate Bill 13, 87th Texas Legislature, Regular Session) as amended, the Owner hereby verifies that it and its parent company, wholly- or majority- owned subsidiaries, and other affiliates, if any, do not boycott energy companies and, will not boycott energy companies during the term of this Agreement. The foregoing verification is made solely to comply with Section 2274.002, Texas Government Code, as amended, to the extent Section 2274.002, Texas Government Code does not contravene applicable Texas or federal law. As used in the foregoing verification, "boycott energy companies" shall have the meaning assigned to the term "boycott energy company" in Section 809.001, Texas Government Code. The Owner understands "affiliate" to mean an entity that controls, is controlled by, or is under common control with the Owner and exists to make a profit. +

# D. Verification Regarding Discrimination Against Firearm Entity or Trade Association.

To the extent this Agreement constitutes a contract for the purchase of goods or services for which a written verification is required under Section 2274.002, Texas Government Code, (as added by Senate Bill 19, 87th Texas Legislature, Regular Session, "SB 19"), as amended, the hereby verifies that it and its parent company, wholly- or majority- owned subsidiaries, and other affiliates, if any, +

(1) do not have a practice, policy, guidance or directive that discriminates against a firearm entity or firearm trade association; and +

(2) will not discriminate during the term of this Agreement against a firearm entity or firearm trade association. +

The foregoing verification is made solely to comply with Section 2274.002, Texas Government Code, as amended, to the extent Section 2274.002, Texas Government Code does not contravene applicable Texas or federal law. As used in the foregoing verification, "discriminate against a firearm entity or firearm trade association" shall have the meaning assigned to such term in Section 2274.001(3), Texas Government Code (as added by SB 19). The Owner understands "affiliate" to mean an entity that controls, is controlled by, or is under common control with the Owner and exists to make a profit. +

**B. Drainage Easement Metes and Bounds** 

Exhibit " "

#### LEGAL DESCRIPTION

BEING a 1.2726 acre (55,435 sq. ft.) tract of land situated in the Samuel Damon Survey No. 11, Abstract No 170, Cedar Park, Williamson County, Texas, and being a portion of a called 53.9395 acre tract of land described in that Warranty Deed to the Board of Trustees, Leander Independent School District in Document No. 2011084700 of the Official Public Records of Williamson County, Texas; said 1.2726 acre tract of land being more particularly described as follows, with bearings based on the Texas Coordinate System of 1983, Central Zone:

BEGINNING: at a 1/2-inch iron rod with orange cap found on the northeastern line of the said 53.9395 acre tract, the southwestern line of Lot 1, Block A of the TSSD3 Subdivision as recorded in Document No. 2023009524 of the Official Public Records of Williamson County, Texas for a corner of the said 53.9395 acre tract, a corner of the said Lot 1, Block A, for the POINT OF BEGINNING of this herein described tract;

THENCE: along the northeastern line of the said 53.9395 acre tract, the southwestern line of the said Lot 1, Block A with a non-tangent curve to the right with a Delta angle of 05°01'22", a Radius of 2481.93 feet and an Arc length of 217.58 feet having a Chord bearing of South 36°36'43" East and a distance of 217.51 feet to a calculated point on the northern line of Lot 2, Block A of the Little Elm Subdivision Plat as recorded in Document No. 2013106218 of the Official Public Records of Williamson County, Texas for the easternmost corner of the said 53.9395 acre tract, the southernmost corner of the said Lot 1, Block A, for the easternmost corner of this herein described tract;

THENCE: South 69°59'47" West along the southern line of the said 53.9395 acre tract, the northern line of the said Lot 2, Block A pass at 194.89 feet a 1/2-inch iron rod with cap stamped "ATS Engineers" found for the westernmost corner of the said Lot 2, Block A, the northernmost corner of Lot 1, Block A of the said Little Elm Subdivision Plat, **a distance in all of 203.47 feet** to a calculated point for the southernmost corner of this herein described tract;

THENCE: across the said 53.9395 acre tract the following courses and distances;

- 1. North 31°52'53" West a distance of 246.27 feet to a calculated point;
- With a tangent curve to the right with a Delta angle of 82°49'46", a Radius of 25.00 feet and an Arc length of 36.14 feet having a Chord bearing of North 09°32'00" East and a distance of 33.08 feet to a calculated point for the northwestern corner of this herein described tract;
- 3. North 50°55'22" East a distance of 145.70 feet to a calculated point on the northeastern line of the said 53.9395 acre tract, the southwestern line of the said Lot 1, Block A, TSSD3 Subdivision for the northernmost corner of this herein described tract;

THENCE: South 39°13'22" East a distance of 115.38 feet along the northeastern line of the said 53.9395 acre tract, the southwestern line of the said Lot 1, Block A, TSSD3 Subdivision to the POINT OF BEGINNING and CONTAINING an area of 1.2726 acres (55,435 sq. ft.) of land.

**Bearing Basis:** 

All bearings shown are based on the Texas Coordinate System, Central Zone, NAD 83.

C. Drainage Area Metes and Bounds

#### LEGAL DESCRIPTION

BEING a 6.0945 acre (265,478 sq. ft.) tract of land situated in the Samuel Damon Survey No. 11, Abstract No 170, Cedar Park, Williamson County, Texas, and being a portion of Lot 1, Block A of the TSSD3 Subdivision as recorded in Document No. 2023009524 of the Official Public Records of Williamson County, Texas, being the same property described in that Special Warranty Deed with Vendor's Lien to Bell South Commercial, LLC in Document No. 2023029877 of the Official Public Records of Williamson County, Texas; said 6.0945 acre tract of land being more particularly described as follows, with bearings based on the Texas Coordinate System of 1983, Central Zone:

COMMENCING: at a 1/2-inch iron rod with cap stamped "ATS Engineers" found on the southwestern rightof-way line of U.S. Highway 183 for the easternmost corner of the said Lot 1, Block A, the northernmost corner of Lot 2, Block A of the Little Elm Subdivision Plat as recorded in Document No. 2013106218 of the Official Public Records of Williamson County, Texas;

THENCE: South 69°59'47" West a distance of 45.91 feet along the southern line of the said Lot 1, Block A, the northern line of the said Lot 2, Block A to a calculated point for the POINT OF BEGINNING and the southeastern corner of this herein described tract;

THENCE: South 69°59'47" West a distance of 288.02 feet continuing along the southern line of the said Lot 1, Block A, the northern line of the said Lot 2, Block A to a calculated point for the southernmost corner of the said Lot 1, Block A, the southeastern corner of a called 53.9395 acre tract of land described in that Warranty Deed to the Board of Trustees, Leander Independent School District in Document No. 2011084700 of the Official Public Records of Williamson County, Texas, for the southwestern corner of this herein described tract;

THENCE: along the southwestern line of the said Lot 1, Block A, the northeastern line of the said 55.9395 acre tract the following courses and distances;

- With a non-tangent curve to the left with a Delta angle of 05°01'22", a Radius of 2481.93 feet and an Arc length of 217.58 feet having a Chord bearing of North 36°36'43" West and a distance of 217.51 feet to a 1/2-inch iron rod with orange cap found for a corner of the said Lot 1, Block A, a corner of the said 55.9395 acre tract, for a corner of this herein described tract;
- 2. North 39°13'22" West a distance of 559.02 feet to a calculated point for the northwestern corner of this herein described tract;

THENCE: across the said Lot 1, Block A the following courses and distances;

- 1. North 30°22'45" East a distance of 25.26 feet to a calculated point;
- 2. North 42°35'20" East a distance of 93.38 feet to a calculated point;
- 3. North 58°48'54" East a distance of 61.69 feet to a calculated point;
- 4. North 65°31'15" East a distance of 93.85 feet to a calculated point;
- North 82°52'30" East a distance of 66.32 feet to a calculated point on the southwestern line of U.S. Highway 183, the northeastern line of the said Lot 1, Block A for the northeastern corner of this herein described tract;

THENCE: along the southwestern line of U.S. Highway 183, the northeastern line of the said Lot 1, Block A the following courses and distances;

- 1. South 39°19'32" East a distance of 513.29 feet to a TxDot Type I concrete monument found for a corner of Lot 1, Block A, for a corner of this herein described tract;
- With a non-tangent curve to the right with a Delta angle of 03°56'16", a Radius of 2806.93 feet and an Arc length of 192.91 feet having a Chord bearing of South 37°10'00" East and a distance of 192.87 feet to a calculated point for a corner of this herein described tract;

THENCE: across the said Lot 1, Block A the following courses and distances;

- 1. South 54°11'10" West a distance of 44.71 feet to a calculated point;
- 2. South 33°51'57" East a distance of 122.62 feet to the POINT OF BEGINNING and CONTAINING an area of 6.0945 acres (265,478 sq. ft.) of land.
