#### Texas Commission on Environmental Quality Permit Application to Dispose of Waste In A Class I Injection Well

#### I. General Information

A. Type of Application (check all that apply):

|             | Initial            |
|-------------|--------------------|
|             | Renewal            |
| $\boxtimes$ | Major Amendment    |
|             | Minor Amendment    |
|             | Minor Modification |
|             | Transfer           |
|             | Endorsement        |

#### Submittal for a RCRA CMI Compliance Plan

Type of Waste (check all that apply):

⊠ Hazardous Waste ⊠ Nonhazardous Waste

Type of Facility (check all that apply):

☐ Commercial ⊠ Noncommercial

Source of waste for noncommercial (check all that apply):

| $\boxtimes$ | Onsite  |
|-------------|---|
|             | Captured facility   |
|             | Offsite from facilities owned or effectively controlled by owner/operator |

#### B. Facility Name: Amarillo Copper Refinery

Street Address: 7001 State Highway 136

City, State, Zip: Amarillo, TX 79108

Mailing Address: PO Box 30200

Mailing City, State, Zip: Amarillo, TX 79120

County: Potter

TCEQ Solid Waste Registration (SWR) Number: 30089

EPA ID Number: **<u>TXD087491973</u>** 

Give a description of the location of the facility site with respect to known or easily identifiable landmarks. Detail the access routes from the nearest U.S. or State Highway to the facility: Located in northeast Amarillo adjacent to the north of State Highway 136 (SH 136), approximately 1.5 miles northeast of the intersection of Loop 335 and SH 136.

Is the facility located within the Coastal Management Program boundary? Refer to <u>Texas</u> <u>Coastal Management Boundary Map</u><sup>1</sup> for boundary. For questions regarding the Coastal Management Program, please call (800) 998-4456 (within Texas) or (512) 475-0773. [30 TAC §281.41]

🗌 Yes 🛛 🖾 No

Provide the location of the injection well relative to established surveys: <u>Injection well</u> WDW-129 is located 568 feet from the east line and 2,235 feet from the south line of Section 68, Block 2, Adams, Beaty, and Moulton (AB&M) Survey, A-1194, Potter County, TX.

Enter the geographical coordinates of the injection well in decimal degrees to 6 decimal places:

Latitude: <u>35.286000</u> (35° 17' 09.60" North)

Longitude: -101.726336 (101° 43' 34.81" West)

Provide the depths of the injection zone and injection interval:

Injection Zone: Lower Clear Fork, Red Cave, Wichita Group, and Wolfcamp Series (Brown Dolomite) Formation(s) at depths of 2,893 to 6,688 feet below ground level.

Injection Interval: <u>Wichita Group and Wolfcamp Series (Brown Dolomite)</u> Formation(s) at depths of <u>4,038</u> to <u>5,088</u> feet below ground level

C. Operator/Applicant (Individual, Corporation, or other Legal Entity Name)

Name: **ASARCO, LLC** 

Address: 7001 State Highway 136

City, State and Zip: Amarillo, TX 79108

Telephone Number: **(806) 468 4000** 

If the application is submitted on behalf of a corporation or other business organization with filing requirements, please identify the Charter Filing Number as recorded with the Office of the Secretary of State for Texas.

Charter Filing Number: 800453105

Is the applicant required to designate a registered agent with the Secretary of State of Texas?

<sup>&</sup>lt;sup>1</sup> <u>https://www.glo.texas.gov/coast/coastal-management/forms/files/CoastalBoundaryMap.pdf</u>

🛛 Yes 🛛 🗌 No

If the application is submitted by a business organization that is required to designate and maintain a registered agent, the applicant must provide the name and address of the registered agent.

Agent: CT Corporation System

Address: 1999 Bryan Street, Suite 900

City, State, and Zip: Dallas, TX 75201

Telephone Number: (214) 979 1172

D. Facility Owner(s) (Individual, Corporation, or other Legal Entity Name)

The facility includes all contiguous land, and structures, other appurtenances, and improvements on the land, used for storing, processing, or disposing of waste. The facility owner must be consistent with the owner on the deed filing bearing the stamp of the county property records or other generally accepted identifying reference of the current ownership record provided in Section I.P.5, Attachment C of the application. If the facility owner is the same as the operator, state "same as operator". If the facility land, structures, appurtenances, and improvements on the land are owned by more than one individual, corporation or other legal entity, provide the following information for all owners. Clearly identify the relationship(s) between the operator and all facility owner(s). [THSC §361.087(1)]

Name: Same as Operator

Address: Same as Operator

City, State, Zip: Same as Operator

Telephone Number: Same as Operator

Charter Filing Number: Same as Operator

E. Indicate the ownership status of the facility.

Private:

| $\ge$ | Corporation            |
|-------|------------------------|
|       | Partnership            |
|       | Proprietorship         |
|       | Nonprofit organization |

Public:

| Military  |
|-----------|
| State     |
| Regional  |
| County    |
| Municipal |
| Federal   |

Other (specify):

F. List those persons or firms authorized to act for the applicant during the processing of the permit application. Indicate the capacity in which each person may represent the applicant (engineering, geology, legal, etc.). The person listed first will be the primary recipient of correspondence regarding this application. Include complete mailing addresses, phone numbers and e-mail addresses.

G. For new, renewal, and major amendment applications specify the individual who will be responsible for causing notice to be published in the newspaper. Include the complete mailing address, telephone number, fax number and e-mail address.

Mr. Jarrod Dunavin (Legal, Administrative, and Technical) ASARCO LLC Amarillo Copper Refinery PO Box 30200 Amarillo Texas 79120-0200 (806) 468-4134 jarrod.dunavin@asarco.com

H. Describe the activities conducted by the applicant which require a permit.

# Injection of industrial wastewater and recovered groundwater from processes associated with copper refining.

- I. For amendment, modification, transfer or endorsement applications, briefly describe all requested changes to the permit and to the application contents and the reasons for the changes. This application is requesting a Major Amendment for addition of a Compliance Plan
- J. Business Information
  - 1. Give a brief description of the nature of your business.

#### Electrolytic refining of copper and manufacture of copper products and by-product metals.

List the principal products and/or services which are provided by your plant. Please itemize by Standard Industrial Classification (SIC) codes. Also label the products with their common names, if applicable.

The ASARCO Amarillo Copper Refinery produces refined copper cathode, copper rod, copper cake, and special alloys used in a wide variety of manufactured products.

K. Applicant Compliance History

The TCEQ will utilize compliance history when making decisions regarding the issuance, renewal, amendment, modification, denial, suspension, or revocation of a permit. Violations included in a criminal conviction are considered when evaluating and classifying the site's compliance history.

For the five years preceding the filing date of this application, please submit a complete listing of all criminal convictions (i.e., State or Federal) of the operator and facility owner in which a violation of environmental law was an element of the crime. [30 TAC §60.2(d)(1)(E) and §60.2(d)(2)(F)] If there have been no such convictions then the application should state the following. If the operator is not the facility owner, a separate statement should be provided for each facility owner.

"In the five years preceding the filing of this application (the operator/applicant, owner), <u>ASARCO LLC</u>, has not been convicted of a State or Federal crime in which a violation of environmental law was an element of the crime."

L. TCEQ Core Data Form

The TCEQ requires that a <u>Core Data Form</u><sup>2</sup> (TCEQ-10400) be submitted with all new and renewal applications. Submit the form as "Attachment A". For all other applications, if a Regulated Entity Number (RN) and Customer Reference Number (CN) have been issued by the TCEQ and core data information has not changed, a Core Data Form is not required. For more information regarding the Core Data Form, call (512) 239-5175 or go to the <u>Core Data Form Instructions</u><sup>3</sup> on the TCEQ website.

**Not Required** 

#### RN **<u>101701654</u>**

#### CN <u>602815524</u>

M. Public Interest Demonstration

Section 27.051 of the Texas Water Code (TWC) stipulates certain conditions that must exist for the Commission to grant an application and issue a permit. For all new applications, permit renewals, and major and minor amendments, submit as "Attachment B" information addressing the following considerations:

- 1. That the use or installation of the injection well is in the public interest. [TWC§27.051(a)(1)]
- 2. That no existing rights, including, but not limited to, mineral rights, will be impaired. [TWC §27.051(a)(2)]

<sup>&</sup>lt;sup>2</sup> <u>https://www.tceq.texas.gov/downloads/permitting/central-registry-docs/10400-core-data-form.docx</u>

<sup>&</sup>lt;sup>3</sup> <u>https://www.tceq.texas.gov/downloads/permitting/central-registry-docs/10400-core-data-form-instructions.pdf</u>

- 3. That, with proper safeguards, both ground and surface fresh water can be adequately protected from pollution. [TWC §27.051(a)(3)]
- 4. That the applicant has made a satisfactory showing of financial responsibility if required by Section 27.073 of this code. [TWC §27.051(a)(4)]
- 5. That the compliance history of the applicant and related entities is acceptable. [TWC §27.051(d)(1), 30 TAC § 331.121(b)(1)]
- 6. That there is no practical, economic, and feasible alternative to an injection well reasonably available. Provide justification for subsurface disposal. Include results of treatability studies of alternate, practical, economic and feasible methods of waste disposal. Explain in detail why each method is considered to be less satisfactory in terms of environmental protection than the proposed subsurface disposal method. Indicate whether this waste is presently being produced and, if so, what method is used for disposal. Describe the manufacturing process(es) and product(s) which produce the waste(s). [TWC §27.051(d)(2), 30 TAC § 331.121(b)(2)]
- 7. (for hazardous waste injection wells only) That the applicant has provided for the proper operation of the proposed hazardous waste injection well. [TWC §27.051(a)(5)]
- 8. (for hazardous waste injection wells only) That the applicant for a hazardous waste injection well not located in an area of industrial land use has made a reasonable effort to ensure that the burden, if any, imposed by the proposed hazardous waste injection well on local law enforcement, emergency medical or fire-fighting personnel, or public roadways, will be reasonably minimized or mitigated. [TWC §27.051(a)(6)]
- 9. (for hazardous waste injection wells only) That the applicant owns or has made a good faith claim to own, or has the consent of the owner to utilize, or has an option to acquire, or has the authority to acquire through eminent domain, the property or portions of the property where the hazardous waste injection well will be constructed. [TWC §27.051(a)(7)]
- 10. (for hazardous waste injection wells only) That the applicant will maintain sufficient public liability insurance for bodily injury and property damage to third parties that is caused by sudden and non-sudden accidents or will otherwise demonstrate financial responsibility in a manner adopted by the Commission in lieu of public liability insurance. [TWC §27.051(d)(3), 30 TAC § 331.121(b)(3)]
- 11. (for hazardous waste injection wells only) For on-site generated waste, provide certification by the owner/operator that (1) the generator of the hazardous waste has a program to reduce the volume or quantity and toxicity of the waste to the degree determined by the generator to be economically practicable, and (2) injection of the waste is that practicable method of disposal currently available to the generator which minimizes the present and future threat to human health and the environment. [30 TAC §331.121(b)(4)]

#### See Attachment B Public Interest Demonstration

N. For applications for new permits, renewals, and major amendments, a copy of the administratively complete application and subsequent revisions must be made available at a public place in the county where the facility is located or proposed to be located for review and copying by the public. Identify the public place in the county (e.g., public library, county courthouse, city hall), including the address, where the application will be located. [30 TAC §39.405(g)]

Amarillo Public Library – Central Branch 413 SE 4th Avenue Amarillo, TX 79101

O. Facility Background Information [30 TAC §305.45(a)(7)]

Indicate (by listing the permit number(s) and governing agency(ies) in the columns below) all existing, pending, interim status, or permit-by-rule State and/or Federal permits, licenses or construction approvals which pertain to pollution control or industrial solid waste management activities conducted by your plant or at your location, or existing at a proposed plant or location. Complete each blank by entering either the **permit number** or **the date of application**, and the **governing agency** or **none**.

#### **Existing Permits**

Note 1. RCRA Permit by Rule to inject hazardous waste is incorporated in the UIC Permit for WDW-129 issued by the TCEQ (Effective December 1, 2021).

#### \* WDW-273 was plugged in July of 2023

\* Use the following acronyms for each agency:

TCEQ = Texas Commission on Environmental Quality RRC = Railroad Commission of Texas DSHS = Department of State Health Services TDA = Texas Department of Agriculture EPA = U.S. Environmental Protection Agency CORPS = U.S. Army Corps of Engineers

- P. Location
  - 1. Is the facility located on Indian lands?

🗌 Yes 🛛 No

If yes, do not complete this application. Contact EPA Region 6 for application and permitting requirements for injection wells located on Indian lands. [40 CFR §147.2205(a)]

2. Is the facility located in an area in which the governing body of the county or municipality has prohibited the processing or disposal of municipal hazardous waste or industrial solid waste?

🗌 Yes 🛛 No

If yes, do not complete this application. TCEQ may not grant an application for an injection well permit in this area. [THSC §363.112(d)]

3. If the facility is a new commercial hazardous waste management facility, or the subsequent areal expansion of such a facility, is the boundary of the well or pre-injection units to be located within ½ of a mile of an established residence, church, school, day care center, surface water body used for public drinking water supply, or dedicated park?

🗌 Yes 🛛 No

If yes, do not complete this application. TCEQ may not issue a permit for a facility in this location. [30 TAC §335.205(a)(3)]

4. Is the location or proposed location of the injection well in the territory of a groundwater conservation district? To determine if the injection well is or will be located in the territory of a groundwater conservation district refer to the <u>Texas</u> <u>Groundwater Conservation District map</u><sup>4</sup> on the TWDB website.

🛛 Yes 🗌 No

<sup>&</sup>lt;sup>4</sup> <u>https://www.twdb.texas.gov/mapping/doc/maps/GCDs\_8x11.pdf</u>

If yes, provide the contact name and mailing address for the groundwater conservation district. To obtain a point of contact and mailing address refer to the <u>Groundwater</u> <u>Conservation Districts Contact List</u><sup>5</sup> on the TCEQ website. [TWC §27.017(b)]

Britney Britten, Manager Panhandle Groundwater Conservation District PO Box 637 White Deer, TX 79097 (806) 883 2501

5. Legal Description of Facility Land

Submit, as "Attachment C", a legal description of the tract or tracts of land upon which the facility is or will be located and the deed filing bearing the stamp of the county property records or other generally accepted identifying reference of the current ownership record. If ownership of the property is transferring and new ownership documents are not final, provide the date upon which the documents will be submitted. The facility includes all contiguous land, and structures, other appurtenances, and improvements on the land, used for storing, processing, or disposing of waste including pre-injection units used for storage and processing waste to be injected into the injection well. The legal description should include the metes and bounds description or for platted urban sites the final plat with appropriate "lot" description(s). [THSC §361.087(2)]

#### See Attachment C

- 6. Submit, as "Attachment D", a drawn-to-scale topographic map of the facility and the tract or tracts of land upon which the facility is or will be located as described in Attachment C and area extending at least one mile beyond the tract boundaries. The map must be prepared by a licensed professional engineer or a registered surveyor. The scale should be adequate to depict the following features: [30 TAC §305.45(a)(6)(A), (C) & (E)]
  - a. the boundary of the tract or tracts of land upon which the facility is or will be located as described in Attachment C; areal size of the tract or tracts of land in acres should be given;
  - b. if different, the boundary of the facility, and the location of all injection wells; each depicted area should be labeled to identify the well(s) and the well status (active, inactive, or proposed); areal size of the facility in acres should be given;
  - c. if applicable, the boundaries of captured facilities that generate waste to be disposed in the injection wells, each depicted area should be labeled to identify the names of the captured facilities;
  - d. the overall facility, each of its surface intake and discharge structures, each of its waste treatment, storage or disposal facilities, including proposed or existing preinjection units for processing or storage of waste to be disposed in the injection wells; and
  - e. all wells (water, oil and gas, disposal, etc.), springs, other surface water bodies, and drinking water wells listed in public records or otherwise known to the applicant within one mile of the facility property boundary, and the purpose for which each water well is used (e.g., domestic, livestock, agricultural, industrial, etc.).

<sup>&</sup>lt;sup>5</sup> <u>https://www.tceq.texas.gov/downloads/groundwater/gcd/gcd-contact-list.pdf</u>

#### See Attachment D

Q. Plain-Language Summary

The TCEQ implemented new rule requirements in 30 TAC Chapter 39 that impact all permit applications subject to the Chapter 39 public notice requirements that are declared administratively complete after May 1, 2022. One of the new rules, 30 TAC §39.405(k), requires the applicant to provide a plain-language summary in English, and in an alternative language if required in accordance with 30 TAC §39.426. The plain-language summaries for all applications will be posted on the TCEQ website.

For new, renewal and major amendment permit applications submit, as "Attachment E", a Plain-Language Summary of the application that is no more than two pages long. The summary should be entitled "Plain-Language Summary" and should be prepared in simple, concise, easy-to-understand terminology. The summary must include the following information. [30 TAC §39.405(k)]

- 1. the applicant/operator name;
- 2. the type of application;
- 3. the type of waste;
- 4. the type of facility;
- 5. the facility name and location;
- 6. the function of the proposed plant or facility;
- 7. the expected output of the proposed plant or facility;
- 8. the expected pollutants that may be emitted or discharged by the proposed plant or facility which require an injection well permit; and
- 9. how the applicant will control those pollutants, so that the proposed plant will not have an adverse impact on human health or the environment.

If the applicant is required to provide notice in an alternative language in accordance with 30 TAC §39.426, provide a copy of the plain-language summary in English and in the alternative language.

In addition, provide a copy of the plain-language summaries in pdf clearly labeled on a flash drive.

#### See Attachment E

R. Public Involvement Plan

TCEQ's Public Participation Plan provides guidance for using preliminary screening and public involvement plans to ensure meaningful public outreach. Applicants who are applying for a new injection well permit are required to complete a Public Involvement Plan. A Public Involvement Plan is intended to provide an applicant and the agency with information to determine if additional public outreach is necessary or beneficial. Applicants may complete a Public Involvement Plan, even if not required, to learn about the communities in which their facilities are located or where their activities may have an impact.

Submit a Public Involvement Plan, as "Attachment F", using the <u>Public Involvement Plan</u> <u>Form</u><sup>6</sup> (TCEQ-20960) and <u>Instructions for Completing a Public Involvement Plan Form for</u> <u>Permit and Registration Applications</u><sup>7</sup> (TCEQ-20960).

For more information regarding <u>Title VI compliance at TCEQ</u><sup>8</sup> or the <u>Public Participation</u> <u>Plan</u><sup>9</sup> go on the TCEQ website.

Not Required – This is not an application for a new injection well permit.

#### II. Information Required to Provide Notice

Submit, as "Attachment G", a mailing list of landowners identified under Section II.A. and a mailing list of mineral rights owners identified under Section II.B. In accordance with 30 TAC §39.405(b), please also submit this mailing list electronically, in Microsoft Word. The electronic list must contain only the name, mailing address, city, state, and zip code with no reference to the lot number or lot location. The list should contain up to 30 names and addresses (10 per column) per page. Each name and address must be typed in the format that meets the United States Postal Service (USPS) requirements for machine readability. The letters in the name and address must be capitalized, contain no punctuation, and the two-character abbreviation must be used for the state. Contact the USPS for further instructions on formatting addresses for machine readability. The applicant may elect to submit pre-printed mailing labels of this mailing list with the application instead of submitting the mailing list electronically. If you wish to provide the list on printed labels, please use sheets of labels that have 30 labels to a page (10 labels per column). Please provide **four complete sets of labels** of the landowners and mineral rights owners list.

- A. Provide a complete mailing address for persons who own the property on which the existing or proposed injection well facility is or will be located and all persons who own tracts of land adjacent to the property on which the existing or proposed injection well facility is or will be located and within a reasonable distance from the proposed point or points of discharge, deposit, injection, or other place of disposal or activity. Identify the tracts of land and landowners on a map and provide the general character of the areas adjacent to the facility, including public roads, towns and the nature of development of adjacent lands (e.g., residential, commercial, agricultural, recreational, industrial or undeveloped) on the map. The property boundary of the tract or tracts of land on which the existing or proposed injection facility is or will be located must be consistent with the legal description of the tract or tracts of land provided in Section I.P.5, Attachment C, of the application. (Refer to Example Application Map) [30 TAC §281.5(6), §305.45(a)(6)(B) & (D) and §39.651(c)(4)(A) & (B)]
- B. Provide a complete mailing address for all persons who own the mineral rights underlying the existing or proposed injection well facility and underlying the tracts of land adjacent to the property on which the existing or proposed injection well facility is or will be located as required by 30 TAC §39.651(c)(4)(C) & (D). Identify the mineral rights owners on the map provided above in Section II.A.

#### See Attachment G

C. If the facility is located adjacent to navigable territorial waters of the state, or the State of Texas is an adjacent landowner and/or owner of mineral rights underlying the facility or underlying adjacent tracts, your application may affect lands dedicated to the permanent school fund. A determination whether lands dedicated to the permanent school fund will be affected by TCEQ formal action on the application will be made by the Texas General Land Office (TXGLO).

In order for the TXGLO to make a determination, the TCEQ will provide notice to the TXGLO regarding the application. Provide the following information for inclusion in the notice to the TXGLO:

- 1. state the location of the permanent school fund land, mineral rights, or waters of the state that may be affected; and
- 2. describe any foreseeable impact or effect of the proposed permitted action may have on permanent school fund land.

A formal action or ruling by the Commission on an application affecting permanent school fund land that is made without the notice required by 30 TAC \$39.651(c)(3) is voidable by the School Land Board as to any permanent school fund lands affected by the action or ruling. [TWC \$5.115(c) and (g)]

#### The State of Texas is NOT an adjacent landowner and/or mineral rights owner.

D. Provide the name and mailing address of the mayor and health authority of the municipality in whose territorial limits or extraterritorial jurisdiction the well is or will be located, and the name and mailing address of the county judge and the health authority of the county in which the facility is located. [30 TAC §39.651(c)(5)]

E. Bilingual Notice Instructions. For new, renewal and major amendment permit applications, public notice in an alternate language may be required. If an elementary school or middle school nearest to the facility offers a bilingual program, notice may be required to be published in an alternative language. The Texas Education Code, upon which the TCEQ alternative language notice requirements are based, requires a bilingual education program for an entire school district should the requisite alternative language speaking student population exist. However, there may not be any bilingual-speaking students at a particular school within a district which is required to offer the bilingual education program. For this reason, the requirement to publish notice in an alternative language is triggered if the nearest elementary or middle school, as part of a larger school district, is required to make a bilingual education program on-site or has students and either the school has students enrolled at such a program on-site or has students who attend such a program. [30 TAC §39.426]

#### Bilingual notice confirmation for this application

1. Is the school district of the elementary or middle school nearest to the facility required by the Texas Education Code to have a bilingual program?

🗌 Yes 🛛 🖾 No

If **no**, alternative language notice publication not required.

2. If **yes** to question 1, are students enrolled in a bilingual education program at either the elementary school or the middle school nearest to the facility?

🗌 Yes 👘 No

If yes to questions 1 and 2, alternative language publication is required. If no to question 2, then consider the next question.

3. If **yes** to question 1, are there students enrolled at either the elementary school or the middle school nearest to the facility who attend a bilingual education program at another location?

🗌 Yes 🛛 🗌 No

If **yes** to questions 1 and 3, alternative language publication is required. If **no** to question 3, then consider the next question.

4. If **yes** to question 1, has the elementary school or the middle school nearest to the facility been granted an exception from the requirement to provide a bilingual education program, as available under 19 TAC §89.1207(a)?

| 🗌 Yes |  | No |
|-------|--|----|
|-------|--|----|

If **yes** to questions 1 and 4, alternative language publication is required. If **no** to question 4, alternative language notice publication not required.

5. Provide the alternative language for which the bilingual education program(s) is provided or for which an exception has been approved. \_\_\_\_\_

## ATTACHMENT B

## ATTACHMENT B ASARCO LLC COMPLIANCE PLAN WDW-129, WDW-324, & WDW-432 Public Interest Demonstration Items Section I.M.1 through 11

# 1. That the use or installation of the injection well is in the public interest. [TWC §27.051(a)(1)]

No practical, economic, alternative to deep well injection reasonably exist to ASARCO that is more protective of the public interest. Deep well disposal of the wastes generated at the ASARCO facility is a historically proven (over 47 years), environmentally safe, low risk method of waste disposal and reduces the potential for human and environmental exposure that could occur if alternate disposal methods were utilized.

# 2. That no existing rights, including, but not limited to, mineral rights, that will be impaired. [TWC §27.051(a)(2)]

No existing rights, including, but not limited to, mineral rights will be impaired. The ASARCO injection wells, and associated facilities, are located on the Amarillo Copper Refinery property, which is wholly owned by ASARCO. In addition, ASARCO owns the mineral rights to all property beneath the plant and properties adjacent to the plant boundary. Finally, the Railroad Commission of Texas (RCT) has issued several letters of understanding that injection activities at ASARCO do not endanger or otherwise affect any known oil and gas resources.

# 3. That, with proper safeguards, both ground and surface fresh water can be adequately protected from pollution. [TWC §27.051(a)(3)]

In accordance with 30 TAC §331.62, all of the ASARCO injection wells have been constructed and completed to standards to prevent the movement of fluids that could result in the pollution of underground sources of drinking water (USDW). The successful long historical operation of the ASARCO deep well system with no indication of impact to groundwater or surface water indicates that the proper safeguards are in place to adequately protect these resources.

# 4. That the applicant has made a satisfactory showing of financial responsibility if required by Section 27.073 of this code. [TWC §27.051(a)(4)]

ASARCO has the proper financial assurance in place in accordance with Section 27.073 of the Texas Water Code. This includes a trust agreement in place for the closure and postclosure care of its existing wells, as well as a certificate of liability insurance to cover the well for bodily injury, and property damages to third parties due to sudden and non-sudden events. See Attachment F for details, as well as the ASARCO-endorsement (on ASARCO letterhead) stating that these requirements are met.

# 5. That the compliance history of the applicant and related entities is acceptable. [TWC §27.051(d)(1), 30 TAC § 331.121(b)(1)]

ASARCO, through its compliance history on record with the TCEQ, has shown that it is a conscientious operator of its deep well system and that its continued efficient and safe operation is in the public interest. According the TCEQ compliance history database (TCEQ Compliance History Search (texas.gov)), ASARCO has a "High" classification as of 09/01/2023.

6. That there is no practical, economic, and feasible alternative to an injection well reasonably available. Provide justification for subsurface disposal. Include results of treatability studies of alternate, practical, economic and feasible methods of waste disposal. Explain in detail why each method is considered to be less satisfactory in terms of environmental protection than the proposed subsurface disposal method. Indicate whether this waste is presently being produced and, if so, what method is used for disposal. Describe the manufacturing process(es) and product(s) which produce the waste(s). [TWC §27.051(d)(2), 30 TAC § 331.121(b)(2)]

ASARCO utilizes deep well injection as an environmentally safe, low risk method of waste disposal that has a long successful history at its Amarillo Copper Refinery facility. Deep well disposal is the best method for ASARCO to dispose of its inorganic waste streams resulting from the refining and production of copper products vital to many manufactured goods and industries. ASARCO has over the year's evaluated alternatives to the disposal of its hazardous wastes in injection wells but determined that no practical, economic, and feasible alternative to an injection well is reasonably available to manage the types and classes of hazardous waste disposed.

The manufacturing process at ASARCO consists of an anode department, a tank house for copper refining, refined casting departments, a copper scrap facility, a precious metals handling facility, and various support departments and facilities. Products produced include refined copper cathode, rod, and cake. Continuously cast copper rod produced at the Amarillo Copper Refinery is shipped to wire manufacturers throughout North America. Copper cakes are fabricated by ASARCO's customers into plates, sheets, strips and bars. Copper cathodes are purchased by customers to manufacture a variety of copper products.

The alternatives to deep well injection evaluated include the following:

- 1. Treatment and on-site irrigation or off-site discharge via NPDES permit;
- 2. Stabilization and off-site landfill disposal;
- 3. Off-site incineration/thermal treatment;
- 4. On-site solar evaporation; and
- 5. Off-site deep well injection.

With regard to treatment and on-site disposal via irrigation or offsite disposal via NPDES discharge, ASARCO's aqueous waste stream is relatively large in volume, contains metals,

and has a pH of less than 2. In simple terms, treatment would require an increase in pH to precipitate metals then the addition of acid to return the pH back to a normal range. This process would generate large volumes of treatment sludge, which would need to be disposed and large volumes of treated wastewater. Additionally, testing has indicated that the arsenic and selenium constituents would require additional treatment to approach acceptable discharge concentration levels. This discharge of treated wastewater would be through an NPDES-type of discharge permit and would certainly have pH and metals concentrations limits. Furthermore, the predominant surface drainage in the Texas panhandle region, where ASARCO located, is primarily into a closed system of playa lakes fed by ephemeral streams. These playa lakes provide a direct infiltration pathway to the Ogallala Aquifer, which is the primary water supply for the region. Therefore, treatment of the wastes and subsequent discharge are not seen as a good alternative to deep well injection because of the increased handling and treatment of the waste, the by-products of the treatment, and the ultimate disposal of the treated waste to the environment.

The second possible disposal method is to stabilize the waste and then dispose of it off-site via landfill. The ASARCO waste stream is aqueous and consists of mainly of very low pH water and dissolved metals. To stabilize this waste stream, large volumes of sludge would be produced. It is probable that the waste would then need to go to a specialized landfill permitted for such waste and would require large transportation and disposal costs and would subject the public to possible exposure to the waste during transit. Therefore, stabilization and offsite solid disposal is not viewed as a good alternative to deep well injection.

The third possible disposal method is offsite incineration/thermal treatment. This method would require that the aqueous waste be stabilized/solidified or in the transport of large volumes of aqueous waste. This method of disposal would be very expensive as it would require long distance transport of the waste and increased potential for public exposure, and ultimately results in the disposal of the material into the biosphere. Therefore, incineration/thermal treatment is not viewed as a good alternative to deep well injection.

The fourth potential alternative disposal method is on-site solar evaporation and waste concentration. This method would require the construction of a vast system of surface impoundments at great capital expense, great operating expense, and would expose the waste to the biosphere during treatment. Additionally, the issue of the waste sludge discussed previously would still exist and need further disposal consideration. Finally, when the plant is ultimately closed and decommissioned, the environmental impact and cost of final closure would be extremely onerous. Therefore, this alternative to deep well injection does not appear to be a good option.

The last alternative disposal method considered is off-site disposal via deep well injection. This method would require the long distance transport of the aqueous waste to a commercial Class I injection well facility permitted for hazardous waste. The closest permitted facilities are located along the Gulf Coast of Texas. This method of disposal would be very expensive because of disposal costs, long distance transport of the waste,

and would include the increased potential for public exposure. Therefore, offsite deep well injection is not viewed as a good alternative to deep well injection.

Overall, on-site deep well injection is the best alternative for ASARCO based on the following observations:

- Deep well injection has a proven excellent long history (42 years) as a good disposal method for the ASARCO waste.
- Pre-treatment and handling of the waste is negligible thus minimizing the potential exposure of personnel or the environment.
- Because there is no need to transport the waste offsite for disposal, the public and environment have minimal potential for exposure to the waste.
- Deep well injection provides a consistent disposal method, which the plant can rely on, and thus provides economic stability.

# 7. (for hazardous waste injection wells only) That the applicant has provided for the proper operation of the proposed hazardous waste injection well. [TWC §27.051(a)(5)]

ASARCO has a 47 year history of satisfactory and safe operations of the injection well system at the Amarillo Copper Refinery. ASARCO currently utilizes three of four injection wells at the facility, the first of which was installed in 1976. One well, WDW-432 is installed but is not yet in service. One well, WDW-273, was plugged and abandoned in accordance with all applicable standards in 2023. All of the wells are operated in accordance with State of Texas rules as provided for in 30 TAC Chapters 305 and 331. The testing, operation and compliance history of the ASARCO injection well system shows that proper continued operation of the injection well system can be expected going forward.

8. (for hazardous waste injection wells only) That the applicant for a hazardous waste injection well not located in an area of industrial land use has made a reasonable effort to ensure that the burden, if any, imposed by the proposed hazardous waste injection well on local law enforcement, emergency medical or fire-fighting personnel, or public roadways, will be reasonably minimized or mitigated. [TWC §27.051(a)(6)]

All of the ASARCO injection wells are located in an area of industrial land use, which includes the Amarillo Copper Refinery and the Xcel Energy regional power generating facility located adjacently to the west. The remaining land surrounding the ASARCO facility is also owned by ASARCO and is agricultural (cultivated fields and pasture). Additionally, the facility is easily accessible via public roadways. ASARCO has 24/7 staffing and injection well operating parameters are continuously monitored, allowing for an immediate response to any potential emergency incident.

9. (for hazardous waste injection wells only) That the applicant owns or has made a good faith claim to, or has the consent of the owner to utilize, or has an option to acquire, or has the authority to acquire through eminent domain, the property or portions of the property where the hazardous waste injection well will be constructed. [TWC §27.051(a)(7)]

ASARCO owns, in entirety, the property on which the injection wells and injection well facilities are located and operated.

10. (for hazardous waste injection wells only) That the applicant will maintain sufficient public liability insurance for bodily injury and property damage to third parties that is caused by sudden and non-sudden accidents or will otherwise demonstrate financial responsibility in a manner adopted by the Commission in lieu of public liability insurance. [TWC §27.051(d)(3). 30 TAC § 331.121(b)(3)]

ASARCO has the required financial assurance and public liability insurance in place (see Attachment F).

11. (for hazardous waste injection wells only) For on-site generated waste, provide certification by the owner/operator that (1) the generator of the hazardous waste has a program to reduce the volume or quantity and toxicity of the waste to the degree determined by the generator to be economically practicable, and (2) injection of the waste is that practicable method of disposal currently available to the generator which minimizes the present and future threat to human health and the environment. [30 TAC §331.121(b)(4) and 40 CFR §146.70(d)]

ASARCO has programs and processes in operation to recover by-products for further use in conjunction with the copper refining operation. As detailed in item #6 of this attachment, injection of the waste produced is the most practicable method for disposal with regard to minimizing the present and future threat to human health and the environment.

#### Waste Minimization Certification:

By Signature below, I certify that ASARCO is large quantity generator, and has a program in place to reduce the volume and toxicity of waste generated to the degree determined to be economically practicable. To the best of my knowledge, ASARCO has selected the most feasible method of treatment, storage, or disposal currently available, which minimizes the present and future threat to human health and the environment.

# WARRANTY DEED 763028

Additional Information Concerning Tract 5 Mineral Rights (See Figure C-1, Attachment C)

VOL. 2305 PAGE 455

#### 763028

#### SPECIAL WARRANTY DEED

Date: Effective as of July 26, 1991

Grantor: Ollie L. Thomason, widow of M.H. Thomason, whose mailing address is 3308 Cumberland, Wichita Falls, Wichita County, Texas; and Ollie L. Thomason, Hugh Lee Matthews and Joseph N. Sherrill, Jr., Independent Executors of the Estate of M.H. Thomason, Deceased, and Trustees of the Jo Trust created under the terms of the Last Will and Testament of M.H. Thomason, Deceased, whose mailing addresses are c/o Sherrill & Pace, 1100 Hamilton Building, Wichita Falls, Wichita County, Texas, 76301.

Grantee: ASARCO Incorporated

#### Grantee's Mailing Address:

Post Office Box 30200 Amarillo, Potter County, Texas 79120

**Consideration:** Ten and No/100 Dollars (\$10.00) and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged by Grantor.

#### Property (including any improvements):

All of our right, title and interest in and to all of Section 68, Block 2, AB&M Survey, Potter County, Texas, being not less than an undivided one-quarter interest in the oil, gas, and other minerals in, on, under and that may be produced from such section.

#### Reservations from and Exceptions to Conveyance and Warranty:

None

Grantor, for the consideration set forth above, grants, sells, and conveys to Grantee the property, together with all and singular the rights and appurtenances thereto in any wise belonging, to have and hold it to Grantee, Grantee's heirs, executors, administrators, successors, or assigns forever. Grantor binds Grantor and Grantor's heirs, executors, administrators, and successors to warrant and forever defend all and singular the property to Grantee and Grantee's heirs, executors, administrators, successors, and assigns against every person whomsoever lawfully claiming or to claim the same or any part thereof, except as to the reservations from and exceptions to conveyance and warranty, by, through, or under Grantor, but not otherwise.

Grantor represents to Grantee that the M.H. Thomason Trust created pursuant to the Will of M.H. Thomason, Deceased, probated in cause number 18,125 in Wichita County, Texas, has been fully funded by assets of the estate separate and apart from the Property conveyed herein and, therefore, that the joinder of the Trustees of such M.H. Thomason Trust (being Ollie L. Thomason, Hugh Lee Matthews and Joseph N. Sherrill, Jr.) is not required in this Special Warranty Deed.

ATTACHMENT E

## ATTACHMENT E ASARCO LLC MAJOR AMENDMENT FOR ADDITON OF A COMPLIANCE PLAN WDW-129 (WDW-324 AND WDW-432) Plain Language Summary Items Section I.Q.1 through 9

In accordance with the requirements in 30 TAC Chapter 39, rule, 30 TAC §39.405(k), this Major Amendment application requires the applicant to provide a plain-language summary in English, and in an alternative language if required in accordance with 30 TAC §39.426.

This application is a Texas Commission of Environmental Quality (TCEQ) requirement for a major amendment to add a Compliance Plan of the Corrective Measures Implementation (CMI) program to the Underground Injection Control (UIC) permit for WDW-129. The CMI is a process of designing, constructing, operating, maintaining, and monitoring the performance of the corrective measure(s) selected for a hazardous waste site. The CMI is approved by the regulator based on the information presented in the Corrective Measures Study (CMS). The applicant/operator is responsible for the performance of CMI while the regulator is responsible for CMI oversight

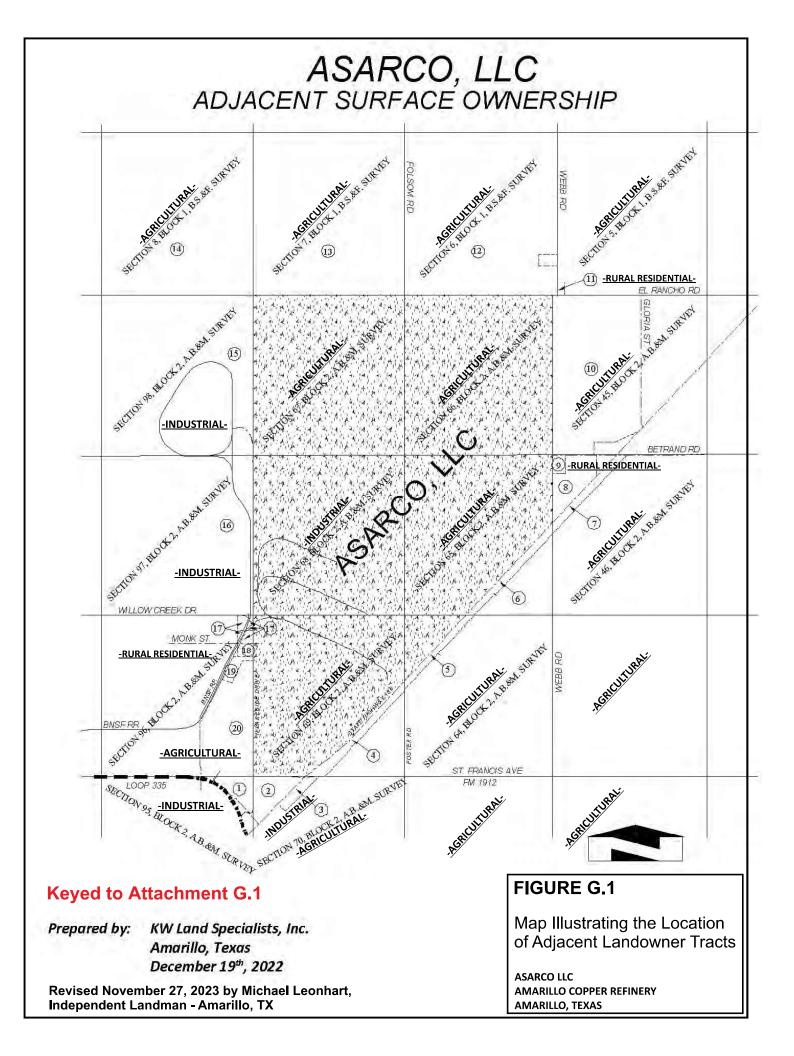

The applicant and operator for WDW-129 is ASARCO LLC (ASARCO). WDW-129 is located at the Amarillo Copper Refinery (ACR) facility. The ASARCO ACR is located eight miles northeast of Amarillo, Potter County, Texas, adjacent to the north of State Highway 136 (SH 136), approximately 1.5 miles northeast of the intersection of Loop 335 and SH 136. The existing facility was constructed in 1976 and has the capability to produce refined copper and copper products used by a variety of critical industries.

The type of waste at the ASARCO ACR is industrial wastewater from processes associated with copper refining and recovered groundwater. The ACR has the capability to produce millions of tons of refined copper and copper products. Products produced include refined copper cathode, copper rod, and copper cake. Copper cathodes are purchased by customers to manufacture a variety of copper products that support many critical industries. Continuously cast copper rod produced at the Amarillo Copper Refinery is shipped to wire manufacturers throughout North America. Copper cakes are fabricated by ASARCO's customers into plates, sheets, strips, and bars. Byproducts, such as Tankhouse Anode Slimes, are sold for precious metals recovery.

The ASARCO ACR utilizes stringent administrative and engineering controls in the refining process to contain and control any produced wastes. Additionally, the plant is located within a large property that buffers the physical manufacturing facilities and waste storage and disposal facilities from public exposure. All of the ASARCO ACR and associated injection wells are located in an area of industrial and agricultural land use.
