**Description of Update** *(for Class 3 Modifications and Amendments only)*

List and explain any changes this modification or amendment would make to the two sections above—**Waste Management Information** and **Pollution Control Methods**.

The permit has been updated to remove references to an operating hazardous waste landfill. The landfill has been closed and is not active.

ExxonMobil Oil Corporation is proposing to modify the hazardous waste permit for the Beaumont Refinery to: reflect the closure of a hazardous waste landfill which is no longer active; regular inspections of the closed hazardous waste landfill; use of the surface of the closed hazardous waste landfill for various purposes such as an equipment yard or parking lot; changes to the groundwater monitoring program with the replacement of several groundwater monitoring wells; updated protective concentration levels for protection of human health and the environment; revisions to procedures for the management and recovery of non-aqueous phase liquids; and addition of recently identified areas of historical contamination.
