**Description of Update** (for Class 3 Modifications and Amendments only)

List and explain any changes this modification or amendment would make to the two sections above—**Waste Management Information** and **Pollution Control Methods**.

Only modification that would impact Pollution Control Methods is due to changing the post closure care sampling frequency to biennial (i.e., every two years) because over 32 years of groundwater detection monitoring have indicated no releases from the Waste Chemical Pond (i.e., Permitted Hazardous Waste Management Unit - NOR 006).
