**Description of Update** *(for Class 3 Modifications and Amendments only)*

List and explain any changes this modification or amendment would make to the two sections above—**Waste Management Information** and **Pollution Control Methods**.

The proposed permit modification adds specific municipal non-hazardous solid waste (MNHSW) streams to the list of acceptable wastes at the facility for commingling with the approved industrial non-hazardous solid waste (INHSW) streams. The approved MNHSW will be processed, stored and disposed of in the same manners listed in the Waste Management Information section, and all methods in the Pollution Control Methods Section will apply.

The proposed modification also updates the configuration of the bulk liquids storage tanks on the Site Layout Plan. This update will have no impact to the Waste Management Information section and Pollution Control Methods section.
