

# Texas Commission on Environmental Quality Plain Language Summary of Municipal Solid Waste Permit or Permit Amendment Application

Applicants are required by public notice rules in Title 30 Texas Administrative Code, Chapter 39, Section [39.405\(k\)](#)<sup>1</sup> to provide this summary of an application.

## A. Purpose of the Proposed Facility

The City of Victoria Landfill is a Type I MSW Landfill. The permit amendment is for a lateral and vertical expansion of the landfill, to extend the life of the existing landfill and allow the option for below-grade disposal of Class 1 Non-Hazardous Industrial Waste within the lateral expansion area.

## B. Information About the Applicant

Name:

Applicant Type:

Facility Name:

Permit Application Number:

Customer Number (CN):

Regulated Entity Reference Number (RN):

## C. Location of the Proposed Facility

Facility Address (or description of site location if no address):

Link to Map of Facility Location ([TCEQ Location Mapper](#)<sup>2</sup>):

## D. Information about Facility Operation

What types of waste would be received?

The facility will be able to accept the following waste types: municipal solid waste from residential and commercial sources; construction and demolition waste; brush; rubbish; used scrap tires that have been processed; Class 1, Class 2 and Class 3 nonhazardous industrial solid waste; and special wastes including sludge, grease and grip trap wastes, RACM, dead animals, and treated medical waste.

What geographical area would the wastes come from?

The landfill is the only Type I MSW landfill serving the Golden Crescent Regional Planning Commission (GCRPC), which is the Counties of: Calhoun, Dewitt, Goliad, Gonzales, Jackson, Lavaca, and Victoria.

<sup>2</sup> [www.tceq.texas.gov/gis/hb-610-viewer](http://www.tceq.texas.gov/gis/hb-610-viewer)

What days and hours would the facility operate?

Waste acceptance hours are seven days a week from 7:00 am to 7:00 pm. Non-waste and heavy equipment operation can occur seven days a week from 5:00 am to 8:00 pm.

At what rate would wastes be accepted?

Solid waste may be accepted for disposal at this site at a rate of approximately 700 tons per operating day, but is not limited to this amount.

How would wastes be managed?

Wastes will be landfilled. If Class 1 wastes are accepted for below-grade disposal, these materials will be managed in dedicated cells designed and constructed in accordance with the requirements of 30 TAC §330 and 30 TAC §335 related to disposal of Class 1 industrial solid waste in Type I MSW landfill units.

## **E. Pollution Control Methods**

What methods would the facility use for containing wastes and odors, and monitoring for releases?

Odors will be controlled by using the appropriate size working face, applying daily and intermediate cover, preventing ponded water, inspecting and maintaining gas and leachate systems, and promptly disposing of any wastes requiring special attention to control odor, such as septage or grease trap waste. Wastes will be contained through litter control and inspection and cleanup of litter and debris on haul and access roads. The landfill includes groundwater and gas monitoring wells to monitor for potential releases.

What methods would the facility use or require for preventing litter or spills, and for cleanup of litter and spills?

The landfill will encourage vehicles hauling waste to the working face or other unloading areas arrive on-site with a tarpaulin, net, or other means to properly secure the load. Signs stating this policy will be posted, and offenders may be reported to proper law enforcement by the Landfill Manager. Litter and other debris along the landfill haul and access roads will be removed and taken to the working face for disposal. Cleanup of any spilled solid waste materials will be performed each day that the site is open for waste acceptance.
