

Texas Commission on Environmental Quality Plain Language Summary of Municipal Solid Waste Permit or Permit Amendment Application

Applicants are required by public notice rules in Title 30 Texas Administrative Code, Chapter 39, Section 39.405(k)¹ to provide this summary of an application.

A. Purpose of the Proposed Facility

Type IV Municipal Solid Waste Disposal Facility for the City of Stephenville, Texas.

B. Information About the Applicant

Name: City of Stephenville

Applicant Type: City Government

Facility Name: City of Stephenville Landfill

Permit Application Number: 664

Customer Number (CN): 600627814

Regulated Entity Reference Number (RN): 102214566

C. Location of the Proposed Facility

Facility Address (or description of site location if no address):

669 Co Rd 385
Stephenville, TX 76401

Link to Map of Facility Location (TCEQ Location Mapper²): <https://arcg.is/0bjTu0>

D. Information about Facility Operation

What types of waste would be received?

Type IV wastes, including yard waste, brush, rubbish, and construction/demolition wastes that are free from other types of solid wastes; Class 2 and Class 3 industrial wastes that are similar to Type IV waste.

What geographical area would the wastes come from?

Erath and surrounding counties.

¹ www.tceq.texas.gov/goto/view-30tac

² www.tceq.texas.gov/gis/hb-610-viewer

What days and hours would the facility operate?

Operating: Monday through Saturday 7:30a.m. - 5:00p.m
Waste Acceptance: Tuesday-Saturday 8:30a.m. - 4:00p.m and 7:30a.m. - 3:30p.m. (Summer Hours)

At what rate would wastes be accepted?

163 tons/day

How would wastes be managed?

Landfilled in accordance with 30 TAC Chapter 330 and following the Site Development Plan and Site Operating Plan.

E. Pollution Control Methods

What methods would the facility use for containing wastes and odors, and monitoring for releases?

Odors that may occur will be controlled via the waste being covered by soil cover in accordance with the Site Development Plan and Site Operating Plan. Containment of waste will be accomplished via screening and containment berms.

What methods would the facility use or require for preventing litter or spills, and for cleanup of litter and spills?

Preventing litter will be accomplished via requiring the entering vehicles be covered and tarped, or otherwise secured. Once onsite, waste will be disposed of at the working face in a timely manner and covered with soil, preventing windblown waste/litter. Any windblown waste/litter in and around the facility will be picked up via litter patrols on a daily basis. The prevention and cleanup of spills will be accomplished using the methods described in the facility's stormwater pollution prevention plan, TXR05FG05.
