Description of Update (for Class 3 Modifications and Amendments only)

List and explain any changes this modification or amendment would make to the two sections above—**Waste Management Information** and **Pollution Control Methods**.

The facility is submitting this Class 3 Permit Modification to remove the requirements of the Compliance Plan from the Hazardous Waste Permit No. 50219 for Corrective Action groundwater monitoring of the former Solid Waste Management Area, Ponds 1A, 1B, 2A, and 2B. As documented in February 2023, groundwater monitoring in the vicinity of Ponds 1A, 1B, 2A, and 2B has confirmed that Groundwater Performance Standards (GWPS) have been achieved. As requested by TCEQ, BASF is submitting a Response Action Completion Report (RACR) with this Class 3 permit modification to document the achievement of GWPS's and proposing that no further groundwater monitoring is required for the Compliance Plan.
