Re: SouthWaste Disposal, LLC – SouthWaste Disposal Dallas Facility
Mansfield, Tarrant County, Texas
MSW Permit No. 2256C
Major Permit Amendment - Technical NOD #2 (TCEQ Tracking No. 32246028)

Dear Mr. Poole:

The revisions made to the application for amendment of MSW Permit 2256B in Mansfield, Tarrant County, Texas are enclosed with this letter. In response to the Technical NOD 2 received on April 13, 2026, we have included each comment as well as our responses to each of the comments including the location in the permit for which it was corrected.

Comment: 1. NOD ID 18 (MRI ID 214) in our February 19, 2026, notice of deficiency requested a new letter of determination from the Army Corps of Engineers (ACE) regarding Section 404 of the Clean Water Act and Section 10 of the Rivers and Harbors Act, or a demonstration to show that conditions to satisfy 30 TAC §330.553(a) and (b) have not changed since the ACE letter dated August 4, 2015.

Your March 16, 2026, response stated that §330.553(b) was not applicable to the facility, and that pertinent facility conditions have not changed since the 2015 ACE letter, including no change in the facility footprint and no new construction being proposed.

Apart from the facility footprint, provide a certification that no changes in hydrology, topography, or other factors have occurred within the permit boundary that would affect the wetlands designation since the August 4, 2015, ACE determination. [§330.553(a)]

Response: Part II, Section 13.0 (Page II-14), and Appendix II.J, Section 1.6 (Page II.J-1), have been revised to state that, since the August 4, 2015, ACE determination, no site improvements have been made and no changes in hydrology, topography, or other factors have occurred within the permit boundary that would affect the wetlands designation. Therefore, the August 4, 2015, ACE determination remains applicable.

Comment: 2. Provide response letters from the following agencies indicating concurrence with, or no objection to, the proposed project:

- a. Texas Department of Transportation (TxDOT). [§330.61(i)(4)]
- b. Texas Parks and Wildlife Department. [§330.61(n)(1)]
- c. Texas Historical Commission. [§330.61(o)]

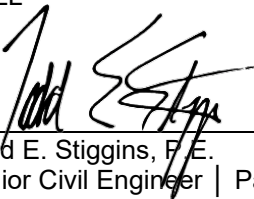

Note that all coordination response letters must be received by TCEQ before the application may be deemed technically complete.

- Response:**
- a. Appendix II.D has been revised in its entirety to include the TxDOT response correspondence documenting coordination regarding traffic and location restrictions for the proposed project.
 - b. Appendix II.E has been revised in its entirety to include the TPWD response correspondence indicating concurrence with, or no objection to, the proposed project.
 - c. Appendix II.G has been revised in its entirety to include the THC response correspondence, which indicates no further review is required under the Antiquities Code of Texas for the proposed project.

If you have any questions or comments, you may contact me at 806.473.3683 [REDACTED]

Sincerely,

PARKHILL

13.0 FLOODPLAINS AND WETLANDS STATEMENT – 30 TAC §330.61(m)

Figure II.A.11 presents the digital National Flood Hazard Layer (NFHL) derived from Flood Insurance Rate Maps (FIRM) for the property and surrounding area. In accordance with 30 TAC §330.547. All storage and processing facilities are located outside of the 100-year flood plain.

No wetlands are present within the Permit Boundary. A site investigation was submitted to the Corp of Engineers in 2015 to confirm that no wetlands are present on site. The Corp of Engineers agreed on August 4, 2015 that Facility operation is not subject to Section 404 of the Clean Water Act or Section 10 of the Rivers and Harbors Act. Since the August 4, 2015, ACE determination, the Owner/Operator certifies that there have been no changes in hydrology, topography, drainage patterns, or other site conditions within the Permit Boundary that would affect the wetlands designation. No site improvements or modifications have occurred that would create, remove, or otherwise alter wetlands within the Permit Boundary; therefore, the 2015 ACE determination remains applicable. Refer to Part II Appendix I for the correspondence with the Corp of Engineers.

Re: SouthWaste Disposal Dallas Facility (MSW # 2256C)
Texas Commission on Environmental Quality (TCEQ) Permit
Municipal Solid Waste (MSW) Type V Processing Facility

Dear Mr. Johnson:

In accordance with 30 TAC §330.61(i)(4), we submit this letter to you regarding the noted Project. SouthWaste Disposal, LLC retained the services of Parkhill to prepare a Permit Application to TCEQ to establish a MSW Type V Liquid Waste Processing Facility. The facility is in Mansfield, Tarrant County, Texas, as illustrated in the Attachment A: Facility Location Figure.

Please review the enclosed information regarding traffic related to the proposed permit amendment. We are not aware of any TxDOT location restrictions that would be applicable to the proposed expansion at the facility. Parkhill would like TxDOT to provide information regarding any traffic or location restrictions in the vicinity of the facility.

For any comments, questions, or further information, please contact me directly at 806.473.3683 or [REDACTED]

Sincerely,

PARKHILL

Re: Wildlife Habitat Assessment – Request for Review
SouthWaste Disposal Dallas Facility (MSW # 2256C)
Texas Commission on Environmental Quality (TCEQ) Permit
Municipal Solid Waste (MSW) Type V Processing Facility

Dear Major Murray:

SouthWaste Disposal, LLC has retained the services of Parkhill to prepare a Permit Amendment Application to TCEQ for their MSW Type V Liquid Waste Processing Facility. The facility is in Tarrant County, Texas, as illustrated in the figure Attachment A: Facility Location Figure.

The facility was constructed in 1996. Correspondence with Texas Parks and Wildlife Department from the 2017 permit modification is enclosed. The proposed facility capacity expansion will not disturb any additional site, nor will it result in destruction or adverse modification of any federally designated critical habitat for any threatened or endangered species. The proposed expansion will not cause or contribute to taking any listed threatened or endangered species.

This letter confirms the current absence of any endangered or threatened Species within the area affected by facility operations and/or any effects on those species.

For any comments, questions, or further information, please contact me directly at 806.473.3683 or [REDACTED]

Sincerely,

PARKHILL

From: Karen Hardin [REDACTED]
Sent: Wednesday, August 19, 2015 10:52 AM
To: Felipe Wescoup
Subject: TPWD Review of Southwaste Disposal Liquid Waste Facility Amendment, TPWD Project 35001

Mr. Felipe Wescoup,

Thank you for providing the Southwaste Disposal, Inc. proposed liquid waste facility amendment project for coordination submitted July 29, 2015. Based on a review of the documentation and description provided, the Wildlife Habitat Assessment Program does not anticipate significant adverse impacts to rare, threatened, or endangered species, or other fish and wildlife resources. However, please note it is the responsibility of the project proponent to comply with all federal, state, and local laws that protect fish and wildlife. Provided the project plans do not change, the Texas Parks and Wildlife Department considers coordination to be complete.

Sincerely,

Karen Hardin

APPENDIX II.G: TEXAS HISTORICAL COMMISSION REVIEW

October 24, 2025

Mr. Joseph Bell, Executive Director
Texas Historical Commission
P.O. Box 12276
Austin Texas 78711-2276

Re: SouthWaste Disposal Dallas Facility (MSW #2256C)
Texas Commission on Environmental Quality Permit
Municipal Solid Waste Type V Processing Facility
Archeological/Historical Resources Review for Registration of Proposed Solid Waste
Management Type V Liquid Waste Processing Facility in Harris County, Texas.

Dear Mr. Bell:

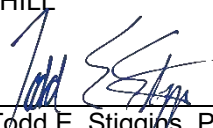

Parkhill, on behalf of SouthWaste Disposal Dallas Facility, LLC, is preparing a Municipal Solid Waste (MSW) Permit Amendment Application for submittal to the Texas Commission on Environmental Quality (TCEQ) Permits Division. SouthWaste Disposal Dallas Facility is an MSW Type V Liquid Waste Processing Facility in Mansfield, Tarrant County, Texas. Project area consists of an approximate 2.5-acre tract in Mansfield along South 6th Avenue. Location and aerial maps of the project area are attached.

In accordance with TCEQ requirements, we are submitting correspondence demonstrating that Texas Historical Commission was contacted during the initial permit application process for the facility. A review was completed by the Texas Historical Commission to determine if the project falls under Title 30 of the Texas Administrative Code, paragraph 330.61(o) for compliance with the Natural Resource Code, Chapter 191, Antiquities Code of Texas, now subsumed in Title 13, Part II of the Texas Administrative Code. The proposed facility expansion will not disturb any additional site, nor will it result in destruction or adverse modification of the existing permitted facility.

For further information or documentation, please contact me directly at 806.473.3683 or

Sincerely,

PARKHILL

TO: Texas Natural Resource Conservation

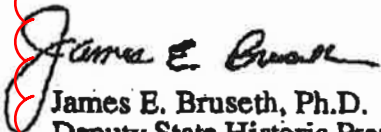

SUBJECT: AEI Waste Disposal
proposed Type V Solid Waste Dewatering Facility
(Texas Natural Resource Conservation Commission, Tarrant, F60) (95-10-0945)

Dear Sir:

Thank you for the opportunity to review and comment on the project referenced above. Because of the scope of the project, the potential for construction activities to affect cultural resources is very low. Accordingly, this project can proceed without further consultation with this office.

It is possible, however, that buried cultural materials may be present in the project area. If such materials are encountered during construction or disturbance activities, work should cease in the immediate area; work can continue in the project area where no cultural materials are present. Please contact this office at 512/463-6096 to consult on any further actions that may be necessary to protect the cultural remains.

Sincerely,

James E. Bruseth, Ph.D.
Deputy State Historic Preservation Officer

JEB/TKP/Albatross

APPENDIX II.J: LOCATION RESTRICTIONS

REV 00 – 10.27.2025

REV 01 – 03.16.2026

REV 02 – 06.11.2026

1.0 LOCATION RESTRICTIONS – 30 TAC §330.543-561

1.1 Easements and Buffer Zones – 30 TAC §330.543

No solid waste unloading, storage, disposal, or processing operations shall occur within any easement, buffer zone, or right-of-way that crosses the Facility. All pipeline and utility easements shall be clearly marked with posts extending at least 6 feet above ground level, spaced at intervals no greater than 300 feet. Refer to Exhibit B of the Special Warranty Deed in Appendix I.C for drainage, pipeline, or utility easements.

The Facility was permitted under MSW #2256B to have a minimum buffer distance between the south wall of the process building and the southern permit boundary of 27-feet. According to the City of Mansfield Fire Department's Fire Lane Requirements (page II.J-4), the minimum required fire lane width is 24-feet. The facility's fire lane occupies the full 27-foot width of the buffer zone, exceeding the minimum requirements, and providing adequate space for safe passage of firefighting and other emergency vehicles. The proposed capacity increase does not decrease the permitted minimum buffer under MSW#2256B. The facility requests the executive director continue authorization for the alternative buffer zone as part of the MSW #2256C application.

30 TAC §330.543 allows for the executive director to consider alternative buffer zone requirements of 30 TAC §330.543 for permitted and registered storage and processing MSW facilities. The buffer distances for the Facility provide adequate width for safe passage for fire fighting and other emergency vehicles.

1.2 Airport Safety – 30 TAC §330.545

Airport safety restrictions apply to landfill units only and not applicable to this Facility.

1.3 Floodplains – 30 TAC §330.547

Figure II.A.11 presents the digital National Flood Hazard Layer (NFHL) derived from Flood Insurance Rate Maps (FIRM) for the property and surrounding area. In accordance with 30 TAC §330.547. All storage and processing facilities are located outside of the 100 year flood plain.

1.4 Groundwater – 30 TAC §330.549

The Facility is not located over the Edwards Aquifer recharge zone nor a Class 1 industrial solid waste landfill unit; therefore, this section is not applicable to this Facility.

1.5 Endangered or Threatened Species – 30 TAC §330.551

The Facility and the operation of the Facility does not result in destruction or adverse modification of critical habitats of endangered or threatened species, nor cause/contribute to taking any endangered species. The proposed capacity increase has no effect on endangered or threatened species.

1.6 Wetlands - 30 TAC §330.553

No wetlands are present within the Permit Boundary. A site investigation was submitted to the Corp of Engineers in 2015 to confirm that no wetlands are present on site. The Corp of Engineers agreed on August 4, 2015 that Facility operations are not subject to Section 404 of the Clean Water Act or Section 10 of the Rivers and Harbors Act. The Owner/Operator certifies that since the August 4, 2015 ACE determination, there have been no changes in hydrology, topography, drainage patterns, or other site conditions within the permit boundary that would affect the wetlands designation. Refer to Part II Appendix I for the correspondence with the Corp of Engineers.

1.7 Fault Areas – 30 TAC §330.555

Fault areas restriction applies to landfill units only and not applicable to this Facility.

Figure II.A.11 presents the digital National Flood Hazard Layer (NFHL) derived from Flood Insurance Rate Maps (FIRM) for the property and surrounding area. In accordance with 30 TAC §330.547. All storage and processing facilities are located outside of the 100-year flood plain.

No wetlands are present within the Permit Boundary. A site investigation was submitted to the Corp of Engineers in 2015 to confirm that no wetlands are present on site. The Corp of Engineers agreed on August 4, 2015 that Facility operation is not subject to Section 404 of the Clean Water Act or Section 10 of the Rivers and Harbors Act. Since the August 4, 2015, ACE determination, the Owner/Operator certifies that there have been no changes in hydrology, topography, drainage patterns, or other site conditions within the Permit Boundary that would affect the wetlands designation. No site improvements or modifications have occurred that would create, remove, or otherwise alter wetlands within the Permit Boundary; therefore, the 2015 ACE determination remains applicable. Refer to Part II Appendix I for the correspondence with the Corp of Engineers.

Re: SouthWaste Disposal Dallas Facility (MSW # 2256C)
Texas Commission on Environmental Quality (TCEQ) Permit
Municipal Solid Waste (MSW) Type V Processing Facility

Dear Mr. Salazar:

In accordance with 30 TAC §330.61(i)(4), we submit this letter to you regarding the noted Project. SouthWaste Disposal, LLC retained the services of Parkhill to prepare a Permit Application to TCEQ to establish a MSW Type V Liquid Waste Processing Facility. The facility is in Mansfield, Tarrant County, Texas, as illustrated in the Attachment A: Facility Location Figure.

Please review the enclosed information regarding traffic related to the proposed permit amendment. We are not aware of any TxDOT location restrictions that would be applicable to the proposed expansion at the facility. Parkhill would like TxDOT to provide information regarding any traffic or location restrictions in the vicinity of the facility.

For any comments, questions, or further information, please contact me directly at 806.473.3683 or [REDACTED]

Sincerely,

PARKHILL

Re: Wildlife Habitat Assessment – Request for Review
SouthWaste Disposal Dallas Facility (MSW # 2256C)
Texas Commission on Environmental Quality (TCEQ) Permit
Municipal Solid Waste (MSW) Type V Processing Facility

Dear Ms. Bedunah-Ott:

SouthWaste Disposal, LLC has retained the services of Parkhill to prepare a Permit Amendment Application to TCEQ for their MSW Type V Liquid Waste Processing Facility. The facility is in Tarrant County, Texas, as illustrated in the figure Attachment A: Facility Location Figure.

The facility was constructed in 1996. Correspondence with Texas Parks and Wildlife Department from the 2017 permit modification is enclosed. The proposed facility capacity expansion will not disturb any additional site, nor will it result in destruction or adverse modification of any federally designated critical habitat for any threatened or endangered species. The proposed expansion will not cause or contribute to taking any listed threatened or endangered species.

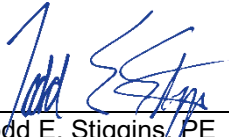

This letter confirms the current absence of any endangered or threatened Species within the area affected by facility operations and/or any effects on those species.

For any comments, questions, or further information, please contact me directly at 806.473.3683 or [REDACTED]

Sincerely,

PARKHILL

Subject: RE: Medium Priority- FW: TCEQ MSW Permit 2256C - Southwaste Disposal Dallas Facility; TPWD Project 59397

Dear Todd Stiggins,

I have reviewed the project materials submitted for the Southwaste Disposal Dallas Facility proposed amendment of TCEQ MSW Permit 2256C to increase the authorized processing and storage capacity of the facility. The expansion involves replacing equipment within the existing building.

Based on a review of the documentation and description provided, the TPWD Environmental Review Team does not anticipate adverse impacts to rare, threatened, or endangered species, or other fish and wildlife resources. However, please note it is the responsibility of the project proponent to comply with all federal, state, and local laws that protect fish and wildlife. Provided the project plans do not change, TPWD considers coordination to be complete.

Sincerely,

Karen Hardin

APPENDIX II.G: TEXAS HISTORICAL COMMISSION REVIEW

March 23, 2026

Mr. Joseph Bell, Executive Director
Texas Historical Commission
P.O. Box 12276
Austin Texas 78711-2276

Re: SouthWaste Disposal Dallas Facility (MSW #2256C)
Texas Commission on Environmental Quality Permit
Municipal Solid Waste Type V Processing Facility
Archeological/Historical Resources Review for Registration of Proposed Solid Waste
Management Type V Liquid Waste Processing Facility in Harris County, Texas.

Dear Mr. Bell:

Parkhill, on behalf of SouthWaste Disposal Dallas Facility, LLC, is preparing a Municipal Solid Waste (MSW) Permit Amendment Application for submittal to the Texas Commission on Environmental Quality (TCEQ) Permits Division. SouthWaste Disposal Dallas Facility is an MSW Type V Liquid Waste Processing Facility in Mansfield, Tarrant County, Texas. Project area consists of an approximate 2.5-acre tract in Mansfield along South 6th Avenue. Location and aerial maps of the project area are attached.

In accordance with TCEQ requirements, we are submitting correspondence demonstrating that Texas Historical Commission was contacted during the initial permit application process for the facility. A review was completed by the Texas Historical Commission to determine if the project falls under Title 30 of the Texas Administrative Code, paragraph 330.61(o) for compliance with the Natural Resource Code, Chapter 191, Antiquities Code of Texas, now subsumed in Title 13, Part II of the Texas Administrative Code. The proposed facility expansion will not disturb any additional site, nor will it result in destruction or adverse modification of the existing permitted facility.

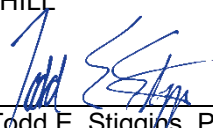

For further information or documentation, please contact me directly at 806.473.3683 or

Sincerely,

PARKHILL

Re: Project Review under the Antiquities Code of Texas
THC Tracking #202609264
Date: 05/11/2026
TCEQ MSW Permit 2256C - Southwaste Disposal Dallas Facility
Harris County

Description: Southwaste has applied before TCEQ to amend the current operating permit (MSW#2256B). Please find the attached letter for the proposed facility for your review.

Dear Todd Stiggins:

Thank you for your submittal regarding the above-referenced project. This response represents the comments of the Executive Director of the Texas Historical Commission (THC), pursuant to review under the Antiquities Code of Texas.

The review staff, led by Caitlin Brashear and Chris Ringstaff, reviewed your submission and has the following comments:

Above-Ground Resources

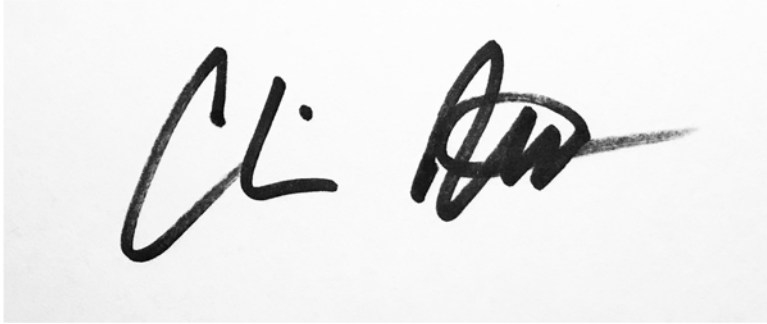

- No further review of potential effects to above-ground historic resources is required under the Antiquities Code of Texas. However, should this project ultimately include any federal involvement, additional consultation with THC/SHPO under Section 106 of the National Historic Preservation Act will be required.

We look forward to further consultation with your office and hope to maintain a partnership that will foster effective historic preservation. Thank you for your cooperation in this review process, and for your efforts to preserve the irreplaceable heritage of Texas. If the project changes, or if new historic properties

are found, please contact the review staff. If you have any questions concerning our review or if we can be of further assistance, please email the following [REDACTED]

This response has been sent through the electronic THC review and compliance system (eTRAC). Submitting your project via eTRAC eliminates mailing delays and allows you to check the status of the review, receive an electronic response, and generate reports on your submissions. For more information, visit <http://thc.texas.gov/etrac-system>.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Bell", is shown on a white background.

for Joseph Bell, State Historic Preservation Officer
Executive Director, Texas Historical Commission

AUSTIN, TEXAS 78711

(512)463-6096

DEPARTMENT OF ANTIQUITIES PROTECTION

10/6/95

TO: Texas Natural Resource Conservation

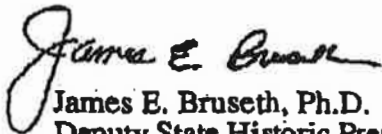

**SUBJECT: AEI Waste Disposal
proposed Type V Solid Waste Dewatering Facility
(Texas Natural Resource Conservation Commission, Tarrant, F60) (95-10-0945)**

Dear Sir:

Thank you for the opportunity to review and comment on the project referenced above. Because of the scope of the project, the potential for construction activities to affect cultural resources is very low. Accordingly, this project can proceed without further consultation with this office.

It is possible, however, that buried cultural materials may be present in the project area. If such materials are encountered during construction or disturbance activities, work should cease in the immediate area; work can continue in the project area where no cultural materials are present. Please contact this office at 512/463-6096 to consult on any further actions that may be necessary to protect the cultural remains.

Sincerely,

James E. Bruseth, Ph.D.
Deputy State Historic Preservation Officer

JEB/TKP/Albatross

APPENDIX II.J: LOCATION RESTRICTIONS

1.0 LOCATION RESTRICTIONS – 30 TAC §330.543-561

1.1 Easements and Buffer Zones – 30 TAC §330.543

No solid waste unloading, storage, disposal, or processing operations shall occur within any easement, buffer zone, or right-of-way that crosses the Facility. All pipeline and utility easements shall be clearly marked with posts extending at least 6 feet above ground level, spaced at intervals no greater than 300 feet. Refer to Exhibit B of the Special Warranty Deed in Appendix I.C for drainage, pipeline, or utility easements.

The Facility was permitted under MSW #2256B to have a minimum buffer distance between the south wall of the process building and the southern permit boundary of 27-feet. According to the City of Mansfield Fire Department's Fire Lane Requirements (page II.J-4), the minimum required fire lane width is 24-feet. The facility's fire lane occupies the full 27-foot width of the buffer zone, exceeding the minimum requirements, and providing adequate space for safe passage of firefighting and other emergency vehicles. The proposed capacity increase does not decrease the permitted minimum buffer under MSW#2256B. The facility requests the executive director continue authorization for the alternative buffer zone as part of the MSW #2256C application.

30 TAC §330.543 allows for the executive director to consider alternative buffer zone requirements of 30 TAC §330.543 for permitted and registered storage and processing MSW facilities. The buffer distances for the Facility provide adequate width for safe passage for fire fighting and other emergency vehicles.

1.2 Airport Safety – 30 TAC §330.545

Airport safety restrictions apply to landfill units only and not applicable to this Facility.

1.3 Floodplains – 30 TAC §330.547

Figure II.A.11 presents the digital National Flood Hazard Layer (NFHL) derived from Flood Insurance Rate Maps (FIRM) for the property and surrounding area. In accordance with 30 TAC §330.547. All storage and processing facilities are located outside of the 100 year flood plain.

1.4 Groundwater – 30 TAC §330.549

The Facility is not located over the Edwards Aquifer recharge zone nor a Class 1 industrial solid waste landfill unit; therefore, this section is not applicable to this Facility.

1.5 Endangered or Threatened Species – 30 TAC §330.551

The Facility and the operation of the Facility does not result in destruction or adverse modification of critical habitats of endangered or threatened species, nor cause/contribute to taking any endangered species. The proposed capacity increase has no effect on endangered or threatened species.

1.6 Wetlands - 30 TAC §330.553

No wetlands are present within the Permit Boundary. A site investigation was submitted to the Corp of Engineers in 2015 to confirm that no wetlands are present on site. The Corp of Engineers agreed on August 4, 2015 that Facility operations are not subject to Section 404 of the Clean Water Act or Section 10 of the Rivers and Harbors Act. The Owner/Operator certifies that since the August 4, 2015 ACE determination, there have been no changes in hydrology, topography, drainage patterns, or other site conditions within the permit boundary that would affect the wetlands designation. Refer to Part II Appendix I for the correspondence with the Corp of Engineers.

1.7 Fault Areas – 30 TAC §330.555

Fault areas restriction applies to landfill units only and not applicable to this Facility.
