#### SUBMITTED ELECTRONICALLY AND VIA CERTIFIED MAIL

RE: Tyler County Transfer Station (MSW Registration No. 40343) Response to NOD 3 - TCEQ Tracking No. 30272375 Supplemental Submittal with THC Comments

Dear Mr. Zhang:

This submittal is made in response to your e-mail dated April 11, 2025. The following table lists the relevant comments from your April 11<sup>th</sup> e-mail (in bold print for clarity of reading) followed by a response. The response also includes the location of revisions by reference to part, section, and page number:

NOD ID	TCEQ Comment and Response	Location of Revision
NT1	<ul> <li>Correct the inconsistencies in Part II Table of Contents (TOC):         <ul> <li>a) Revise the title of Section 9 to "Transportation [30 TAC 330.61(i)]" in the clean copy. This is correct in the marked copy.</li> </ul> </li> <li><u>Response:</u> In the clean copy of the TOC, the title of Section 9 has been revised to "Transportation [30 TAC 330.61(i)]".</li> </ul>	Part II, Table of Contents (Page II-A)
	b) Delete subsections A through F under Section 9.2.2 from TOC or provide a revised Section 9.2.2 to include these subsections.	Part II, Table of Contents
	<u>Response:</u> Subsections A through F under Section 9.2.2 have been deleted from the TOC.	(Page II-A)
	<ul> <li>c) Revise the revision note of "Rev 032/2025" to "Rev 03/2025" in the clean copy.</li> <li><u>Response:</u> Revision note has been revised to read "Rev 03/2025".</li> </ul>	Part II, Table of Contents (Page II-A)
NOD ID	TCEQ Comment and Response	Location of Revision
ТЗ	Correct the inconsistency in the intended destination for final disposal of construction waste between Section 4.4 of Part IV and Section 2.1.2 of Part II. <u>Response:</u> In Section 4.4 of Part IV, "or LCEQ" has been deleted from last paragraph.	Part IV, Page IV-7

Xiaodong Zhang, P.E., Project Manager Tyler County Transfer Station (MSW Registration No. 40343) Supplemental Response to NOD 3 - TCEQ Tracking No. 30272375 April 23, 2025; Page 2 of 2

The following is a summary of the revised pages of the application that are submitted with this cover letter:

- A completed Correspondence Cover Sheet (Form TCEQ-20714)
- Part II Revised Table of Contents, Page II-A. Note that each page has been stamped by the project engineer
- Part IV Revised Page IV-7
- New applicant certification and signature page (Pages 13 and 14 of Form TCEQ-00650)

An original and two (2) un-marked copies of the revised pages are attached herewith. An additional marked copy (in redline/strike-out format) is also included for applicable pages. As requested, an unmarked copy has been submitted directly to the TCEQ Region 10 Office addressed to the attention of the waste section manager. The above listed pages have all been three-hole punched for inclusion or replacement in this project's previously submitted three-ring binders.

If you have any questions, comments, or need any additional information regarding this project, please contact me via telephone at 936-634-5528 or via e-mail at the second secon

Sincerely,

6 Aquila

Eddie Aguilar, P.E.

In all operations (including customer rentals) the Owner currently utilizes twelve 30 yard open containers, four 20 yard open containers, and three 40 yard closed containers.

Please note that the Owner parks the trucks and spare boxes on site.

A maximum of 45 tons waste will be stored at any one point in time at the facility. At the present time, municipal solid waste makes up approximately 95% of the incoming waste stream to this facility, while construction debris amounts to approximately 3% and white goods approximately 2%.

Municipal solid waste will be stored at the facility for an average length of time of two days up to a maximum length of time not to exceed 5 days. Local Sanitation curbside garbage trucks and private residents enter the compactor building and transfer their loads of municipal solid waste to the of the facility's 5.0 cubic yard compactor. The solid waste is then compacted and deposited to a 40 cubic yard covered container where it awaits transport for final disposal. Compaction of the municipal solid waste will normally be conducted daily when the facility is in operation. This compacted municipal solid waste will then be transported to a TCEQ approved landfill for final disposal.

Metal and white goods (such as refrigerators, washers, dryers, etc.) deposited at the site will be accumulated on the existing concrete slab in the southwest corner of the site and they are typically hauled to a recycler of white goods once or twice a year as needed.

Construction debris is deposited in a dedicated 40 CY container and is transported as required to a TCEQ approved landfill on an as-needed basis when full, so its average storage time on site varies.

## **Property Owner Affidavit**

#### **Property Owner Affidavit for Landfill Facility**

I acknowledge in accordance with 30 TAC 330.59(d)(2) that the State of Texas may hold me either jointly or severally responsible for the operation, maintenance, and closure and post-closure care of the facility. For a facility where waste will remain after closure, I acknowledge that I have a responsibility to file with the county deed records an affidavit to the public advising that the land will be used for a solid waste facility prior to the time that the facility actually begins operating as a municipal solid waste landfill facility, and to file a final recording upon completion of disposal operations and closure of the landfill units according to 30 TAC 330.19 (relating to Deed Recordation). I further acknowledge that the facility owner or operator and the State of Texas shall have access to the property during the active life and post-closure care period for the purpose of inspection and maintenance.

 Everett Griffith, Jr. & Associates, Inc.
 Tyler County Solid Waste Transfer Station (MSW No. 40343)

 03/1994 (Rev 09/2024)(Prelim-Review 10/2024)(Rev 032/2025)(Rev 04/2025)
 Part II - Table of Contents, Page II-A

garbage trucks with their next 5 Year Plan.

- One roll-off truck to remove the dumpsters from the transfer station along with some outside customer rental boxes
- In all operations (including customer rentals) the Owner currently utilizes twelve 30 yard open containers, four 20 yard open containers, and three 40 yard closed containers.

Please note that the Owner parks the trucks and spare boxes on site.

A maximum of 45 tons waste will be stored at any one point in time at the facility. At the present time, municipal solid waste makes up approximately 95% of the incoming waste stream to this facility, while construction debris amounts to approximately 3% and white goods approximately 2%.

Municipal solid waste will be stored at the facility for an average length of time of two days up to a maximum length of time not to exceed 5 days. Local Sanitation curbside garbage trucks and private residents enter the compactor building and transfer their loads of municipal solid waste to the of the facility's 5.0 cubic yard compactor. The solid waste is then compacted and deposited to a 40 cubic yard covered container where it awaits transport for final disposal. Processing Compaction of the municipal solid waste will normally be conducted daily when the facility is in operation. This compacted municipal solid waste will then be transported to either a TCEQ approved landfill in Texas for final disposal or to a LCEQ approved landfill in Louisiana for final disposal (the exact destination varies depending on disposal fees and fuel costs at any given time).

Metal and white goods (such as refrigerators, washers, dryers, etc.) deposited at the site will be accumulated on the existing concrete slab in the southwest corner of the site and they are typically hauled to a recycler of white goods once or twice a year as needed.

Construction debris is deposited in a dedicated 40 CY container and is transported as required to a TCEQ or LCEQ approved landfill on an as-needed basis when full, so its average storage time on site varies.
