

Texas Commission on Environmental Quality Plain Language Summary of Municipal Solid Waste Permit or Permit Amendment Application

Applicants are required by public notice rules in Title 30 Texas Administrative Code, Chapter 39, Section 39.405(k)¹ to provide this summary of an application.

A. Purpose of the Proposed Facility

A proposed permit amendment application to increase the size and waste disposal capacity of the existing Waste Management Skyline Landfill to extend the site life and provide for the ongoing waste disposal needs of individuals, businesses, and communities in Dallas and Ellis Counties and the surrounding areas.

B. Information About the Applicant

Name: Waste Management of Texas, Inc.

Applicant Type: Corporation

Facility Name: Waste Management Skyline Landfill

Permit Application Number: 42E

Customer Number (CN): 600127856

Regulated Entity Reference Number (RN): 100542232

C. Location of the Proposed Facility

Facility Address (or description of site location if no address):

1201 N Central St
Ferris, TX 75125-2101

Link to Map of Facility Location (TCEQ Location Mapper²): <https://arcg.is/1OW41L0>

D. Information about Facility Operation

What types of waste would be received?

Type I municipal solid waste

What geographical area would the wastes come from?

Dallas and Ellis Counties and surrounding areas.

¹ www.tceq.texas.gov/goto/view-30tac

² www.tceq.texas.gov/gis/hb-610-viewer

What days and hours would the facility operate?

Waste Acceptance: 24 Hours Mon. - Fri. and until 5:00 p.m. Sat.
Operating: 24 Hours per Day, 7 Days a Week

At what rate would wastes be accepted?

Maximum daily waste acceptance rate: 6,090 tons/day

How would wastes be managed?

Wastes would be managed with the ongoing landfilling operations.

E. Pollution Control Methods

What methods would the facility use for containing wastes and odors, and monitoring for releases?

The facility employs daily, weekly and intermediate cover as required to containing wastes and odors. Additional odor controls include the management of landfill gas via the existing LFGTE facility, the removal of ponded water, contaminated water and leachate as required, and mixing of wastes with other absorptive waste. Refer to Part IV for more detailed information.

What methods would the facility use or require for preventing litter or spills, and for cleanup of litter and spills?

The facility will conduct daily windblown waste and litter or spill pickups around the site. Waste transportation vehicles will be required to use adequate covers or other means of containment to secure the loads. Refer to Part IV for more detailed information.
