### Application Created

This application will appear on your "Activities" page as long as it is awaiting an action that you can perform. To track this application, you will need the following information:

Application Reference Number: 77554      Application Password: hj1t1s

#### About This Password

You may change this password at any time. To change it, use [Set Access Rights](#) now or at anytime from your "Activities" page.

#### Allowing Others Access

If you want other STEERS ER account holders to be able to view or work on this application, you have two options.

Option 1: Give Them The Reference Number and Password.

- This is the more secure choice. Users who access the application this way will not be able to change access rights to it.
- Be sure that their STEERS Participation Agreement is consistent with the work they should do on this application. If their SPA allows them to sign, pay for, and submit applications, they will be able to sign, pay, and submit this application.
- This application will not appear in the list on their "Activities" page. To get it, they will have to click the "Access" button and then enter its reference number and password.

Option 2: Use [Set Access Rights](#) to Add Their STEERS ER Account Number to The Application.

- As with Option 1, they will be able to do whatever their SPA allows. But they will also be able to use [Set Access Rights](#) to decide whether other account holders -- including you -- can view or work on this application. Be sure you trust them with this role as well as all roles available to them instead of their SPA.
- This application will appear in the list of applications shown on their "Activities" page.
