Section 15. Plain Language Summary (Instructions Page 40)

This information is required for new, major amendment, and renewal applications. It is not required for minor amendment or minor modification applications.

If you are subject to the alternative language notice requirements in 30 Texas Administrative Code §39.426, **you must provide a translated copy of the completed plain language summary in the appropriate alternative language as part of your application package**. For your convenience, a Spanish template has been provided below.

ENGLISH TEMPLATE FOR TPDES or TLAP NEW/RENEWAL/AMENDMENT APPLICATIONS

DOMESTIC WASTEWATER

The following summary is provided for this pending water quality permit application being reviewed by the Texas Commission on Environmental Quality as required by 30 Texas Administrative Code Chapter 39. The information provided in this summary may change during the technical review of the application and are not federal enforceable representations of the permit application.
M/I Homes of Austin, LLC. (CN604305250) proposes to operate the Heritage Subdivision irrigation system (RN111252144). a ground storage tank and subsurface drip irrigation field used to store and dispose of treated effluent. The facility will be located approximately 0.31 miles north and 0.26 miles west of the intersection of US Highway 290 and Ranch Road 12, in Dripping Springs, Hays County, Texas 78620.

This application is for a TLAP permit to authorize the disposal of treated wastewater at a volume not to exceed a daily average flow of 60,000 gallons per day via a subsurface area drip dispersal system on approximately 13.8 acres. This permit will not authorize a discharge of pollutants into water in the state.

Discharges from the facility are expected to contain five-day carbonaceous biochemical oxygen demand ($CBOD_5$), total suspended solids (TSS), ammonia nitrogen (NH_3-N), total phosphorus, and *Escherichia coli*. Domestic wastewater will be treated by a headworks screen, aeration basin, clarifier, aerobic digester, chlorine contact basin, and then disposed of through a subsurface area drip dispersal system.
