DOMESTIC WASTEWATER

The following summary is provided for this pending water quality permit application being reviewed by the Texas Commission on Environmental Quality as required by 30 Texas Administrative Code Chapter 39. The information provided in this summary may change during the technical review of the application and are not federal enforceable representations of the permit application.

City of Albany (CN600343149) operates the Plum Creek Wastewater Treatment Plant RN101612059. an activated sludge process plant operated in the conventional mode. The facility is located approximately one mile southeast of the intersection of US Highway 180 and US Highway 283, approximately 3,200 feet east of US Highway 283, in Albany, Shackelford County, Texas 76430.

The City of Albany has applied for a renewal of the existing permit that authorizes the discharge of treated domestic effluent at a daily average flow not to exceed 0.29 million gallons per day.

Discharges from the facility are expected to contain Biological Oxygen Demand 5-day, Total Suspended Solids and E. Coli. Domestic wastewaters are treated by an activated sludge process plant operated in the conventional mode. Treatment units include a bar screen, a grit chamber, a parshall flume, an oxidation ditch, two final clarifiers, four sludge drying beds, and a chlorine contact chamber.
