### **ENGLISH TEMPLATE FOR TPDES or TLAP NEW/RENEWAL/AMENDMENT APPLICATIONS**

#### **DOMESTIC WASTEWATER**

*The following summary is provided for this pending water quality permit application being reviewed by the Texas Commission on Environmental Quality as required by 30 Texas Administrative Code Chapter 39. The information provided in this summary may change during the technical review of the application and are not federal enforceable representations of the permit application.*

City of Conroe (CN600650311 ) operates the Conroe Central Wastewater Treatment Facility RN101607141. a Wastewater Treatment Plant. The facility is located 1890 Ed Kharbat Drive, in Conroe, Montgomery County, Texas 77301.

Renewal to discharge 6 million gallons per day of treated wastewater

Discharges from the facility are expected to contain CBOD, TSS, NH<sub>3</sub>N, and E-Coli. treated domestic wastewater is treated by *the activated sludge process. Wastewater enters the plant and moves through 3 barscreens and two grit removal units. Activated sludge is mixed with raw incoming wastewater at the beginning of the 5 aeration basins. After being treated with air, the wastewater travels to 2 clarifiers where the clear water is separated from the sludge. The clear water moves to 1 of 3 pre-filter chambers and is disinfected with Ultraviolet light. After disinfection the effluent is discharged into Stewarts Creek, then to the San Jacinto River.*
